2QFY26 RESULT REVIEW

Accenture

Modest upgrade amid ongoing demand caution

Global News

- The Nasdaq ended the day down 61.73 points or 0.3 percent at 22,090.69 but had slumped by as much as 1.4 percent to a six-month intraday low. The S&P 500 also fell 18.21 points or 0.3 percent to 6,606.49, while the Dow slid 203.72 points or 0.4 percent to 46,021.43.
- Japanese stocks fell sharply on Thursday, with the Nikkei 225 dropping 3.38% to 53,372 and the Topix Index losing 2.91% to 3,609, reversing gains from the previous session. The decline came as oil prices surged after fresh attacks on Middle East energy facilities, raising inflation concerns for Japan, which relies heavily on imported oil. Weakness in Wall Street overnight also weighed on sentiment, as strong US inflation data reduced expectations for interest rate cuts.

Sector & Corporate News

- **Tata Consultancy Services (TCS)** and **Amadeus** have entered into global strategic partnership. The alliance is designed to accelerate innovation and drive digital transformation across the global travel ecosystem spanning airlines, airports, travel distribution, hospitality, and payments. By combining TCS' deep expertise in the travel domain, AI, cloud, data analytics, and platform engineering with Amadeus' industry-leading travel technology capabilities, the collaboration aims to modernize airline retailing and servicing while delivering seamless, customer-centric travel experiences at scale.
- **Delhivery** has expanded its Economy Air Parcel Service under '**Delhivery International**' to the United Kingdom (UK), Canada, and Australia. This launch is strategically timed to coincide with a transformative era in Indian foreign trade, particularly as the India-UK Free Trade Agreement (FTA) is expected to go live in coming months, alongside ongoing trade negotiations with Canada and Australia. Available through the company's One platform, the service provides competitive rates for Economy Air Parcel shipments. Features include end-to-end visibility from pickup to delivery, automated customs documentation to reduce transit delays, and a unified dashboard for managing domestic and international shipping, billing, and returns.

COMPANY UPDATE

HDFC Bank

Chairman resignation casts shadow despite improving earnings outlook

HDFC Bank in its press release announced the resignation of its part-time chairman Mr. Atanu Chakraborty, who cited that certain developments and practices observed over the past two years were not aligned with his personal values and ethics. He also noted that the benefits of the merger with HDFC Ltd are yet to fully fructify. The pre-mature exit, original tenure extending to May 2027, has raised governance-related questions, although no specific instances were highlighted by him nor the management. The Board subsequently have taken approval from the RBI for appointing Mr. Keki Mistry as interim part-time chairman for a 3 months period, effective March 19, 2026, to provide stability to the operations at the bank. In the conference call, the board and management highlighted that there are no known governance or operational issues at the bank underlying the resignation and highlighted the absence of adverse observations from internal audits or regulatory inspections. On the ethics-related remark, the board indicated it is not aware of any specific concern, suggesting limited visibility on the exact cause of the resignation, while attributing the development partly to relationship-driven differences. Management also reiterated that the bank continues to operate under a strong audit, risk, and compliance framework.

RBI reassures on governance and stability of the bank

The Reserve Bank of India, in its statement on HDFCB, acknowledged the recent developments and approved the interim transition for the part-time chairman. The regulator reiterated that the bank remains fundamentally strong, with a professionally managed board and competent leadership. Importantly, RBI highlighted that its supervisory assessments do not indicate any material concerns regarding governance or conduct. The bank continues to remain well-capitalized with adequate liquidity, and RBI will stay engaged with the board and management through the transition period.

Change in our estimates

We factor in the recent hardening of the wholesale/retail deposit rates and revise our NII estimates downwards for the forecast period by c. 1-2%. We also adjust our operating expense and credit cost estimates moderately resulting in c. 2-3% cut to our earnings estimates. Our FY27/FY28 earnings estimate are 2%/3% below consensus estimate respectively.

Investment summary and view

In our view, the chairman's resignation, in his second term, on the reason of "certain happenings and practices within the bank which are not in congruence with his personal values and ethics" casts a shadow over the board and the management team. Lack of any stated specific instances wherein such incongruency would have occurred, neither by Mr Atanu Chakraborty nor by the interim chairman/management and board members, during the analyst call, remains a point of concern. Prompt support by the regulator for the bank, during this time of crisis, has been the key highlight of the incident. During the course of time, we expect the regulator and the board to make further disclosures on the actions undertaken to assuage the concerns of the outgoing chairman and the investor community at large. Considering the valuations of the bank and the expectation of the fruits of the merger playing out, in the upcoming quarters, we retain our Buy rating on the stock with a revised TP of INR 1,090 per share (INR 1,200 earlier), valuing the bank at 2x FY28 BVPS (earlier 2.3x) and the subsidiaries at INR 150 per share.

COMPANY UPDATE

Sansera Engineering

Structural transformation, superior visibility | BUY

Sansera Engineering (Sansera) is transitioning from an ICE-linked precision auto component supplier into a diversified, technology-led engineering platform with strong exposure to Aerospace, Defence & Semiconductor (ADS), xEV, and tech-agnostic automotive components. Supported by a robust multi-year order book with peak annual revenue of INR 24 bn, disciplined capacity expansion (INR 3.5–4 bn annually over the next two to three years), and an improving product mix, the company has built several structural levers to drive sustained growth, margin expansion, and superior return ratios over the medium to long term. Management's aspiration of 20% growth, 20% EBITDA margin, and 20% RoCE appears increasingly credible given current execution and visibility. Though near-term geopolitical uncertainty persists, we believe this to be largely transient and maintain a BUY rating, valuing the stock at 35x PE on FY28 EPS to arrive at a TP of INR 2,520/share, implying 17% upside from CMP.

Shridhar kallani
+91 22 6911 3478
Shridhar.kallani@antiquelimited.com

Plant Visit: We visited automotive Plant 11 and ADS Plant 9 of the company in Bengaluru, and interacted with the management team: Mr. S. Sekhar Vasan (Promoter), Mr. B.R. Preetham (ED and Group CEO), Mr. Vikas Goel (CFO), Mr. Hari Krishnan (CEO – ADS), and Mr. Rakesh S.B. (Head, Aerospace Division). Management indicated that the forging plants are largely electrified with very low usage of PNG — fortifying them against the ongoing energy crisis to a large extent. However, the impact of a prolonged geopolitical situation may affect the supply chain for OEMs and the broader industry in the near term.

ADS Business—The Structural Growth Engine: The segment has emerged as Sansera's long-term value driver, offering superior growth visibility and structurally higher margin (25%-30%). The company firmly on track to meet FY26 targets (>~INR 3 bn) and INR ~6 bn annually by FY27 (~INR 13 bn by FY30), supported by existing cumulative lifetime orders (~38.7 bn ADS) and capacity expansion. From being a Tier-2 suppler to being single source suppliers for certain products like actuation gimbal, actuator housing among others to certain aircraft manufactures marks a key milestone in their growth plans. The company has also developed advanced capabilities (1) to manufacture 3.6m x 1.8m load bearing stabilizer parts for aircrafts; (2) to assemble Intensive Care Transport modules (~60% of overall value produced in-house); (3) Highly complex semiconductor chambers for fabrication machines. On the product portfolio the management expressed confidence into moving from stationary/ structural aerospace components to rotary/ engine component in the medium term. The second hangar having a peak annual revenue generating capability of INR 6 bn is expected to begin commercial production in 2HFY27.

In-House Machine Building capabilities: Sansera possesses integrated machine-building capabilities, with special purpose machines manufactured entirely in-house by a highly experienced team. The company builds extremely reliable, resilient, and efficient machines to counter shorter product lifecycles, escalating costs, and stiff competition, and currently operates over 1,200 CNC-SPMs across its manufacturing facilities. Machine types built in-house include automated gantry cells, internal grinding machines, vertical honing machines, and balancing machines, among others.

Investment Summary

Though near term geopolitical uncertainty persists, given factors such as a) A higher sales mix in non-auto ICE components, b) Increased premiumization trend, c) A focused approach on improving margin trends, d) Strong ability to generate operating cash flows, e) India's FTA with the EU/ UK removes tariff uncertainty accelerating precision component export demand manufactured by the company, and f) Capacity expansion plans (~INR 3.5 bn annually) , we expect revenue, EBITDA, and PAT to grow at a CAGR of 14%, 18%, and 27% respectively over FY25-28E. We expect RoCE to improve to 17.5% in FY28 from 13.8% in FY25. **We value the stock at 35 PE on FY28 EPS to arrive at our TP of INR 2,520 per share, which implies 17% upside from CMP.**

Key highlights and why we believe Sansera will be a long term compounder

1. Business overview and strategic evolution

Sansera is one of India's leading manufacturers of complex, high-precision forged, and machined components in iron, steel, and aluminum. Historically, strong in ICE-linked components such as connecting rods, rocker arms, and gear shifter forks, the company has leveraged its deep manufacturing, tooling, and process engineering capabilities to expand into:

- Tech-agnostic automotive components (common to ICE, hybrids and EVs);
- xEV and energy-related applications;
- Aerospace, Defence and Semiconductor (ADS) equipment and components.

With 17 manufacturing facilities (16 in India and one in Sweden), Sansera has evolved into a global supplier catering to premium OEMs across India, Europe and North America.

2. ADS business—The structural growth engine

Scale, visibility and order book

- Cumulative unexecuted ADS order book: ~INR 38.7 bn to be executed over the next 4–5 years (till FY30).
- 9MFY26 ADS revenue: >INR 2.15 bn, keeping the company firmly on track to meet FY26 targets.
- Management expects ADS revenues to scale to INR 5.5–6.0 bn annually by FY27, supported by existing lifetime orders and capacity expansion.
- Sansera currently has one major customer in the semiconductor segment and is in active dialogue with others. The company has developed capabilities to manufacture chambers used in wafer fabrication machines.

Margin profile and economics

- ADS EBITDA margin is guided at 25%–30%, significantly higher than the core automotive business.
- Working capital cycle in ADS is longer (~180 days), but returns are supported by strong pricing power, long-term contracts and high entry barriers.

Capabilities as a differentiator

- Sansera has upgraded its capabilities from handling 1.5–2 meter components to 4 meter components, a rare capability in India. The company can consistently execute mass production on large 5-axis configurations, a critical differentiator in aerospace, defence and semiconductor equipment.
- Strong positioning in semiconductor equipment aligns well with the government's upcoming Semiconductor Mission 2.0, which focuses on equipment, materials, Indian IP and supply chain localization. The components require machining on 5-axis machines with tolerances <5 micron.

3. Content per vehicle expansion—Pantnagar plant

The newly inaugurated Pantnagar, Uttarakhand plant (2.7 lakh sq. ft.) is a strategic milestone:

- Focused on crankshafts and crankshaft assemblies for domestic 2W OEMs. The OEMs are increasingly outsourcing crankshaft manufacturing, creating a significant opportunity.
- Enables higher content per vehicle in the ICE segment.
- Potential revenue opportunity of up to INR 5 bn per annum at peak utilization over the next three years.

4. JV with Nichidai Corporation—opening new avenues

The JV with Nichidai Corporation (Japan) is strategically transformative.

- Access to cold and warm forging technologies, where Sansera previously had negligible presence.
- Portfolio diversification: Entry into driveline, differential, and steering components—categories common across ICE, hybrids, and EVs.
- Exposure to high-precision tools, dies and advanced forging knowhow from Nichidai's operations in Japan and Thailand.
- Margin accretive: Cold and warm forged components are expected to deliver margins superior to current corporate averages.
- Global market access: Enables penetration into new customer segments and international markets.

Sansera plans to invest INR 500 mn in tranches, leveraging its mass manufacturing strength and India's low-cost base combined with Japanese technology.

5. Exports, EV, and new-age opportunities

- Europe revenues grew 27% YoY, while other international markets more than doubled on a small base.
- Interim India-US trade arrangements are positive for both existing exports and incremental opportunities.
- Sansera has secured a ~INR 700 mn per annum order from the largest EV producer in North America (including energy applications), to be executed from next year. Management highlighted emerging opportunities in energy, autonomous vehicles and humanoids, indicating optionality beyond traditional auto cycles.

3. Investment (MMRFIC Stake)

Sansera holds ~31% in MMRFIC with an option to increase to 51% (at a predefined valuation formula). MMRFIC is a Research, Design, and Manufacturing entity based out of Bengaluru, building sub-systems for next-generation radars by leveraging machine learning with AI; and mm-wave Sensors with hybrid beam forming capabilities targeting 5G, wireless connectivity solutions for healthcare, reliable products for defence radar applications, and future potential in telecom, security, and autonomous driving subsystems. The objective of the company behind this strategic investment is to enter into high technology space and have access to a strong R&D and engineering team to address priority market segments viz., Defence, Aerospace, Autonomous Driving Vehicles, and Security. MMRFIC revenues projected at Rs.350–400 mn in FY26 with strong EBITDA margin profile. Long-term scale-up from FY27 remains the key inflection point for growth.

7. International operations

The Sweden business grew ~70% YoY, driven by connecting rods for CV engines (9–19 liters); EBITDA margin of 10%–12% with expected ~20% YoY growth in FY27. Sansera has secured a ~INR 700 mn per annum order from the largest EV producer in North America (including energy applications), to be executed from 2HFY27. Management highlighted emerging opportunities in energy, autonomous vehicles, and humanoids, indicating to optionality beyond traditional auto cycles.

8. Why a US machining Facility is being considered

Under USMCA rules, regional value content thresholds for automotive goods is expected to rise to 70% by 2027. This is accelerating the shift towards localised manufacturing, especially in the US and within the US-Mexico-Canada (USMCA) corridor. The business model envisaged is likely a forging in India and machining in USA approach to meet the RVC thresholds required under USMCA. Currently the US plant remains under consideration and final decisions continue to hinge on tariff outcomes and customer orders — though management describes the potential as significant.

9. Traditional Business:

Connecting rods account for approximately ~36% of Sansera's total revenue as of FY25, making it the single largest product revenue contributor — and within India, Sansera holds a commanding ~80% market share in connecting rods and rocker arms combined. At a 5–7% share of the 380 million unit ex-China market, Sansera currently serves ~19 to 25 mn connecting rods per year globally. Even a 2–3 percentage point gain in market share — entirely plausible given the OEM outsoucing trends would represent a 30–60% increase in connecting rod volumes for Sansera, with no new product development required. As per management US/EU OEMs are increasingly exploring the option of outsourcing precision components as part of their efforts to streamline operations and concentrate on core product development, particularly as product lifecycles have shortened considerably compared to a decade ago, led by increased frequency of new model launches.

2QFY26 RESULT REVIEW

Accenture

Modest upgrade amid ongoing demand caution

Accenture reported 2QFY26 revenue of USD 18.0 bn, up 4.0% YoY in CC terms and above the street estimate of 3.6%. Management raised the lower end of its full-year revenue growth guidance by 100 bps to 3%–5% in local currency (4%–6% ex-Federal). Bookings this quarter were slightly below street expectations at USD 22.1 bn (vs. estimate of USD 22.4 bn), with Consulting bookings at USD 11.3 bn (vs. street estimate of USD 11.0 bn) and Managed Services bookings at USD 10.8 bn (vs. street estimate of USD 11.3 bn). The guidance upgrade is supported by a strong pipeline and improving visibility, though it factors in continued client caution, with management remaining mindful of macro and geopolitical uncertainties. On demand, management highlighted that the market environment remains broadly unchanged clients are prioritizing large-scale and strategic transformation programs. Spending patterns for CY26 look similar to CY25. Discretionary decisions continue to reflect deliberate budgeting discipline, but large deal flow is strong and conversion is healthy, given Accenture's role at the center of clients' reinvention agendas.

Contrary to market belief, Accenture believes AI is emerging as a clear structural tailwind across three dimensions: 1) Foundational programs – Clients are implementing cloud, data, and security modernization programs with ecosystem partners to capture the full opportunity of AI. 2) Managed services reinvention – Clients are leveraging Accenture's proprietary platforms to achieve efficiencies through managed services across the enterprise, freeing up investment capacity for new areas. 3) Larger AI programs – Clients with advanced digital cores are moving from proof of concept to production at scale. Approximately 100 new clients initiated advanced AI projects with Accenture this quarter alone.

2QFY26 result highlights

Accenture reported 2QFY26 revenue of USD 18.0 bn (4.0% YoY in CC terms), marginally ahead of the street estimate of 3.6%, led by Managed Services (+5.0% YoY CC) and Consulting (+3.0% YoY). The company upgraded the lower end of FY26 revenue growth guidance by 100 bps to 3.0%–5.0% in CC terms (excluding a 1% impact from the U.S. federal business). Record bookings and large-deal momentum signal sustained demand, marking the third consecutive USD 20 bn+ quarter, with 41 clients at >USD 100 mn — up sharply from the low 30s. APAC was the standout geography (+10% in CC terms), led by Japan and Australia. U.S. Federal remains a 2% drag on the Americas but is expected to normalise and return to growth in Q4. Growth was largely driven by Financial Services (+7.0% YoY CC) and CMT (+10.0%), followed by Products (+3.0%) and Resources (+2.0%), while Health & Public Services declined 1% YoY due to the impact of the federal business. Geographically, growth was led by the Americas (+3.0% YoY CC), followed by EMEA (+2.0%) and Asia Pacific (+10.0%).

Our View

Accenture's 2QFY26 results were broadly in line with expectations, with a modest guidance upgrade of 100 bps at the lower end to 3.0%–5.0% for FY26, reflecting steady execution and improving demand visibility. For Indian IT, the Accenture print is a mild positive — sustained outsourcing/managed services demand and resilient BFSI and APAC growth are constructive signals for peers. However, Discretionary consulting headwinds persist, and meaningful re-acceleration remains elusive in the near term. Within our coverage universe, we maintain a Hold rating on large-cap IT stocks. Among mid-caps, Coforge and Mphasis remain our preferred picks, given their relative positioning in managed services, niche verticals, and AI-ready delivery models.

Important Disclaimer:

This report has been prepared by Antique Stock Broking Limited (hereinafter referred to as ASBL) to provide information about the company(ies) and/sector(s), if any, covered in the report and may be distributed by it and/or its affiliated company(ies).

ASBL is a Stock Broker having SEBI Registration No. INZ000001131 and Depository Participant having SEBI Registration No. IN-DP-721-2022(CDSL) registered with and regulated by Securities & Exchange Board of India. SEBI Registration Number: INH000001089 as per SEBI (Research Analysts) Regulations, 2014. CIN: U67120MH1994PLC079444.

ASBL and its affiliates are a full-service, integrated investment banking, investment management, brokerage and financing group.

This report is for personal information of the selected recipient/s and does not construe to be any investment, legal or taxation advice to you. This research report does not constitute an offer, invitation or inducement to invest in securities or other investments and ASBL is not soliciting any action based upon it. This report is not for public distribution and has been furnished to you solely for your general information and should not be reproduced or redistributed to any other person in any form. This report does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Before acting on any advice or recommendation in this material, investors should consider whether it is suitable for their particular circumstances and, if necessary, seek professional advice. The price and value of the investments referred to in this material and the income from them may go down as well as up, and investors may realize losses on any investments. Past performance is not a guide for future performance, future returns are not guaranteed and a loss of original capital may occur.

We and our affiliates have investment banking and other business relationships with a some companies covered by our Research Department. Our research professionals may provide input into our investment banking and other business selection processes. Investors should assume that ASBL and/or its affiliates are seeking or will seek investment banking or other business from the company or companies that are the subject of this material and that the research professionals who were involved in preparing this material may educate investors on investments in such business. The research professionals responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting information. Our research professionals are paid on the profitability of ASBL which may include earnings from investment banking and other business.

ASBL generally prohibits its analysts, persons reporting to analysts, and members of their households from maintaining a financial interest in the securities or derivatives of any companies that the analysts cover. Additionally, ASBL generally prohibits its analysts and persons reporting to analysts from serving as an officer, director, or advisory board member of any companies that the analysts cover. Our salespeople, traders, and other professionals or affiliates may provide oral or written market commentary or trading strategies to our clients that reflect opinions that are contrary to the opinions expressed herein, and our proprietary trading and investing businesses may make investment decisions that are inconsistent with the recommendations expressed herein. In reviewing these materials, you should be aware that any or all of the foregoing among other things, may give rise to real or potential conflicts of interest. ASBL and its affiliated company(ies), their directors and employees and their relatives may; (a) from time to time, have a long or short position in, act as principal in, and buy or sell the securities or derivatives thereof of companies mentioned herein. (b) be engaged in any other transaction involving such securities and earn brokerage or other compensation or act as a market maker in the financial instruments of the company(ies) discussed herein or act as an advisor or lender/borrower to such company(ies) or may have any other potential conflict of interests with respect to any recommendation and other related information and opinions.; however the same shall have no bearing whatsoever on the specific recommendations made by the analyst(s), as the recommendations made by the analyst(s) are completely independent of the views of the affiliates of ASBL even though there might exist an inherent conflict of interest in some of the stocks mentioned in the research report.

Reports based on technical and derivative analysis center on studying charts company's price movement, outstanding positions and trading volume, as opposed to focusing on a company's fundamentals and, as such, may not match with a report on a company's fundamental analysis. In addition ASBL has different business segments / Divisions with independent research separated by Chinese walls catering to different set of customers having various objectives, risk profiles, investment horizon, etc, and therefore may at times have different contrary views on stocks sectors and markets.

Unauthorized disclosure, use, dissemination or copying (either whole or partial) of this information, is prohibited. The person accessing this information specifically agrees to exempt ASBL or any of its affiliates or employees from, any and all responsibility/liability arising from such misuse and agrees not to hold ASBL or any of its affiliates or employees responsible for any such misuse and further agrees to hold ASBL or any of its affiliates or employees free and harmless from all losses, costs, damages, expenses that may be suffered by the person accessing this information due to any errors and delays. The information contained herein is based on publicly available data or other sources believed to be reliable. Any statements contained in this report attributed to a third party represent ASBL's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. This Report is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. While we would endeavor to update the information herein on reasonable basis, ASBL and/or its affiliates are under no obligation to update the information. Also there may be regulatory, compliance, or other reasons that may prevent ASBL and/or its affiliates from doing so. ASBL or any of its affiliates or employees shall not be in any way responsible and liable for any loss or damage that may arise to any person from any inadvertent error in the information contained in this report. ASBL or any of its affiliates or employees do not provide, at any time, any express or implied warranty of any kind, regarding any matter pertaining to this report, including without limitation the implied warranties of merchantability, fitness for a particular purpose, and non-infringement. The recipients of this report should rely on their own investigations.

This report is intended for distribution to institutional investors. Recipients who are not institutional investors should seek advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents.

ASBL and it's associates may have managed or co-managed public offering of securities, may have received compensation for investment banking or merchant banking or brokerage services, may have received any compensation for products or services other than investment banking or merchant banking or brokerage services from the subject company in the past 12 months.

ASBL and it's associates have not received any compensation or other benefits from the subject company or third party in connection with the research report.

Subject Company may have been a client of ASBL or its associates during twelve months preceding the date of distribution of the research report.

ASBL and/or its affiliates and/or employees and /or relatives may have interests/positions, financial or otherwise of over 1 % at the end of the month immediately preceding the date of publication of the research in the securities mentioned in this report. To enhance transparency, ASBL has incorporated a Disclosure of Interest Statement in this document. This should, however, not be treated as endorsement of the views expressed in the report.

There are no material disciplinary action that been taken by any regulatory authority impacting equity research analysis activities.
