ADS Growth Momentum & Capacity Expansion to Drive Visibility

Est. Vs. Actual for Q3FY26: Revenue – BEAT; EBITDA – BEAT; PAT – MISS

Change in Estimates Post Q3FY26

FY26E/FY27E: Revenue: 3.8%/9.9%; **EBITDA:** 3.8%/11.2%; **PAT:** 5.8%/16.3%.

Recommendation Rationale

- **ADS Segment Demonstrates Strong Momentum and Visibility:** Sansera's Aerospace, Defence and Semiconductor (ADS) segment continues to exhibit strong performance, reaffirming its position as a key growth engine for the company. The highest ever Revenue reported stood at Rs 119 Cr in Q3FY26, taking 9MFY26 sales to Rs 206 Cr, with management maintaining its full-year guidance of ~Rs 300 to 320 Cr, supported by consistent QoQ growth visibility. Segment margins remain significantly above the company average, estimated at 25-30%, and are currently trending toward the higher end of the range. The ADS business holds a robust cumulative order backlog exceeding Rs 3,868 Cr (lifetime value through FY30), ensuring strong multi-year revenue visibility. To support this growth trajectory, the company is augmenting capacity with a new 80,000 sq. ft. facility around two-thirds the size of the existing plant, expected to be operational by H1FY27.
- **Diversified Order Book:** Sansera's order book stands at Rs 2,412 Cr in peak annual revenue potential, well-diversified across ADS (24%), xEV (10%), tech-agnostic auto components (8%), ICE PV+CV (29%), and two-wheelers (16%). In 9MFY26, the company secured multiple new orders, demonstrating its strong execution capabilities and resilience amid challenging market conditions. Key business wins includes equipment component supplies to Malaysia in the semiconductor space with participation in India's Semiconductor Mission 2.0, a Rs 70 Cr per annum order from a leading North American EV player in the energy segment, and the formation of a Nichdai JV to manufacture high-precision transmission and driveline components using advanced cold and warm forging, collectively improving medium-term revenue visibility and reinforcing Sansera's positioning in premium, technology-agnostic, high-value segments supportive of sustained margin expansion.
- **EBITDA Margins:** The company reported an EBITDA margin of 18.1% in Q3FY26, supported by strong scale-up in Sweden operations (62.5% YoY revenue growth). Profitability was further supported by improved exports and highest ever quarterly performance from the ADS segment and a higher contribution from this segment. Continued efforts toward manpower optimisation and enhanced capacity utilisation also contributed positively to profitability. The impact of US tariffs has been largely passed on to customers, thereby mitigating margin pressures and limiting downside risks, while management continues to anchor its long-term strategy around the "20-20-20" vision of 20% EBITDA margins, 20% growth, and 20% ROCE.

Sector Outlook: Positive

Company Outlook & Guidance: The company is driving manufacturing growth and strengthening its position as a key exporter, creating more opportunities within the auto component sector. It has visible growth in xEV, Tech Agnostic, and Non-Auto products, supported by a strong order book and an increasing contribution to overall sales.

Current Valuation: 31x PE FY28E EPS (Earlier Valuation: 30x on FY28E EPS).

Current TP: Rs 2,275/share (Earlier TP: Rs 1,775/share).

Recommendation: We **maintain our BUY** rating on the stock.

Financial Performance

Sansera's consolidated revenue rose 24.7% YoY and 10% QoQ, ahead of our estimates. EBITDA increased 29% YoY and 14.6% QoQ, beating our estimates, while EBITDA margins stood at 18.1%, expanding 72 bps YoY and 60 bps QoQ. PAT missed our estimates by 10%, rising 24% YoY but declining 2.8% QoQ, driven by one-time costs related to changes in labour code regulations.

Outlook

Given factors such as a) A higher sales mix in Non-Auto ICE components, b) Increased premiumisation trend, c) A focused approach on improving margin trends, d) Strong ability to generate operating cash flows, and e) Capacity expansion plans, we expect revenue, EBITDA, and PAT are expected to grow at a CAGR of 16%, 18%, and 28%, respectively, over FY25-28E.

Valuation & Recommendation

Sansera's engineering depth, order visibility, non-auto scale-up, and global market expansion give us high conviction on sustained earnings growth. **We recommend BUY**, viewing the current price as an attractive entry point for long-term investors**.** We assign a forward PE multiple of 31x on FY28 EPS (earlier 30x on FY28) to arrive at a TP of Rs 2,275/share, implying an upside of 12% from the CMP.

Key Concall Highlights

- **Exports Show Divergent Trends; Strong Momentum in Sweden and Other Foreign Countries:** The international business delivered a strong performance during Q3FY26. Exports from the US grew by a strong 50.5% YoY, driven by improved demand in off-road, industrial engine, and ADS segments. Exports to Europe (excluding the Sweden plant) remain flat due to supply chain challenges and weakness in the PV segment, while exports to other international markets recorded the highest growth within the portfolio, up almost 3x, largely led by the semiconductor business. The Sweden operations posted 62.5% YoY growth on a low base, with quarterly revenue of Rs 70.8 Cr, and remain on track to deliver 20–25% full-year growth, supported by higher volumes, capacity utilisation, automation, and improved customer pricing.
- **Cash Flow & Capex:** Operating cash flow (net of taxes) stood at Rs 25 Cr, representing 17% of EBITDA. 9MFY26 Capex was ~Rs 365 Cr, with investments primarily directed toward non-auto segments and Auto PV/CV. Depreciation and amortisation continue to trend upward due to capacity additions supporting growth initiatives, while finance costs declined YoY sharply, owing to sustained debt reduction.
- **Two-wheelers (2W):** A newly inaugurated facility in Pantnagar is dedicated to domestic two-wheeler OEMs. This plant focuses on producing crankshaft assemblies, which allows Sansera to increase its "component content per vehicle". The facility is highly automated and currently employs a 60% women workforce, with a goal to reach 100%.
- **Product Line Expansion:** Sansera is steadily shifting toward high-complexity manufacturing, highlighted by its capability to mass-produce large-scale components up to 4 meters in length for semiconductor and aerospace applications, its expansion into advanced cold and warm forging technologies through the Nichdai JV, and its proactive exploration of next-generation opportunities such as components for humanoid robotics and autonomous vehicles.
- **Commercial Vehicles (CV) & Off-road:** The CV business continues to gain traction, supported by the addition of new high-volume programs, while the off-road segment also reported healthy growth during the quarter.
- **Exports & Global Headwinds:** Global trade policy uncertainty has temporarily slowed decision-making among certain international customers amid tariff-related concerns, though the interim US-India trade arrangement and the potential EU FTA are expected to support export momentum going ahead, while in aerospace, earlier volatility stemming from Boeing-linked regulatory inspections is easing, with underlying demand trends remaining strong.
- **Digital Transformation and Data Analytics:** The company is moving toward a more data-driven manufacturing model. The new Pantnagar plant is being built with high levels of automation, IoT, and data analytics to monitor production in real-time. This focus on "speed to market" and precision is a core component of its joint venture strategy with Nichdai, where it combines Japanese technology with Sansera's established mass-manufacturing processes to achieve higher efficiency and better margin profiles.

are advised to see the Risk Disclosure Document to understand the risks associated before investing in the securities markets. Actual results may differ materially from those set forth in projections. Forward-looking statements are not predictions and may be subject to change without notice. Axis Securities or its associates might have managed or co-managed a public offering of securities for the subject company or might have been mandated by the subject company for any other assignment in the past twelve months. Axis Securities or its associates might have received any compensation from the companies mentioned in the report during the period preceding twelve months from the date of this report for services in respect of managing or co-managing public offerings, corporate finance, investment banking or merchant banking, brokerage services or other advisory services in a merger or specific transaction. Axis Securities or its associates might have received any compensation for products or services other than investment banking or merchant banking, or brokerage services from the companies mentioned in the report in the past twelve months. Axis Securities encourages independence in research report preparation and strives to minimise conflict in the preparation of research reports. Axis Securities or its associates, or its analysts, did not receive any compensation or other benefits from the companies mentioned in the report or a third party in connection with the preparation of the research report. Accordingly, neither Axis Securities nor Research Analysts and/or their relatives have any material conflict of interest at the time of publication of this report. Please note that Axis Securities has a proprietary trading desk. This desk maintains an arm's length distance from the Research team, and all its activities are segregated from Research activities. The proprietary desk operates independently, potentially leading to investment decisions that may deviate from research views.

Compensation of our Research Analysts is not based on any specific merchant banking, investment banking or brokerage service transactions.

Research Analyst may have served as an officer, director or employee of the subject company(ies). Axis Securities or Research Analysts, or their relatives, do not own 1% or more of the equity securities of the Company mentioned in the report as of the last day of the month preceding the publication of the research report. Since associates of Axis Securities and Axis Securities as an entity are engaged in various financial service businesses, they might have financial interests or actual/beneficial ownership of one per cent or more or other material conflicts of interest in various companies, including the subject company/companies mentioned in this report. Axis Securities may have issued other reports that are inconsistent with and reach different conclusions from the information presented in this report. Certain transactions-including those involving futures, options and other derivatives as well as non-investment grade securities - involve substantial risk and are not suitable for all investors. Reports based on technical analysis centre on studying charts of a stock's price movement and trading volume, as opposed to focusing on a company's fundamentals and as such, may not match with a report on a company's fundamentals.

We and our affiliates/associates, officers, directors, and employees, Research Analyst(including relatives) worldwide may: (a) from time to time, have long or short positions in, and buy or sell the securities thereof, of company (ies) mentioned herein or (b) be engaged in any other transaction involving such securities and earn brokerage or other compensation or act as a market maker in the financial instruments of the subject company/company (ies) discussed herein or act as advisor or lender/borrower to such company (ies) or have other potential/material conflict of interest with respect to any recommendation and related information and opinions at the time of publication of Research Report or at the time of public appearance. Axis Securities may have proprietary long/short positions in the above-mentioned scrip(s) and therefore may be considered as interested. This should not be construed as an invitation or solicitation to do business with Axis Securities. Axis Securities is also a Portfolio Manager. Portfolio Management Team (PMS) takes its investment decisions independently of the PCG research, and accordingly, PMS may have positions contrary to the PCG research recommendation.

This research report is issued in India by Axis Securities Limited in accordance with the Securities and Exchange Board of India (Research Analysts) Regulations, 2014. It is intended solely for persons residing in India. The report is not directed at or intended for distribution to, or use by, any person or entity resident in the United States of America, Canada, or in any jurisdiction where such distribution, publication, availability, or use would be contrary to applicable securities laws, including the U.S. Securities Exchange Act of 1934, regulations of the U.S. Securities and Exchange Commission (SEC), and regulations of the Canadian Securities Administrators (CSA).
