Global News

- The Dow spiked 1,325.46 points or 2.9 percent to 47,909.92, the Nasdaq surged 617.15 points or 2.8 percent to 22,635.00 and the S&P 500 shot up 165.96 points or 2.5 percent to 6,782.81.
- The Nikkei 225 Index surged 5.39% to close at 56,308.42, while the broader Topix jumped 3.32% to 3,775.30 on Wednesday, with both benchmarks hitting over one-month highs after the US, Iran and Israel agreed to a two-week ceasefire to allow negotiations for a potential deal to end the war. President Donald Trump delayed planned strikes on Iranian civilian infrastructure in what he called a "double-sided ceasefire," while Iran agreed to reopen the Strait of Hormuz for two weeks, stipulating that transit be coordinated with Iran's Armed Forces. Meanwhile, Prime Minister Sanae Takaichi is seeking separate talks with US and Iranian leaders amid efforts to secure peace and Japan's energy supplies. Tech stocks led the advance as risk appetite returned, with strong gains from Kioxia Holdings (18.6%), Advantest (13.6%), Fujikura (11.6%), Disco Corp (7.3%) and SoftBank Group (7.2%). Power companies, banks and carmakers also rallied.

Sector & Corporate News

- **Bharti Airtel deploys 4, 300 new 5G sites across UP East:** Bharti Airtel on Monday said it has deployed more than 4,300 new 5G sites across Uttar Pradesh (East) in the past 12 months to strengthen its presence in the region. This network expansion covered 48 districts of the UP East circle covering 34 million people across urban centres, towns and remote rural areas. Customers in Lucknow, Kanpur, Varanasi, Prayagraj, Ayodhya and other districts will immensely benefit from this move. This will help facilitate the roll-out of high speed internet, ensuring users seamless experience for work, education, entertainment and digital payments.
- **JP Morgan upgrades Hindalco Industries to Overweight:** JP Morgan has upgraded Hindalco Industries from neutral to Overweight betting on the elevated prices of Aluminum due to the US-Israel-Iran conflict which is impacting supply chains. This shortage is causing Aluminium prices to skyrocket. This is likely to lead to substantial earnings growth over the next several quarters.

SECTOR REPORT

Banking: 4QFY26 Preview

NIMs to moderate slightly; Loan growth momentum remains intact

We expect banks to report 4QFY26 profit growth of 4% YoY/-2% QoQ within which, private banks earnings growth is expected to be at 11% YoY/6% QoQ while for PSU banks earnings is expected to decline by 3% YoY/10% QoQ. The decline in earnings for the PSU banks is primarily due to decline in other income on account of lower treasury gains coupled with higher opex due to seasonality. NIM is expected to be range bound from +2bps to -8bps for our coverage universe as the impact of last Dec'25 policy cut of 25bps will reflect into yields fully in the current quarter which will be partly offset by residual TD repricing. Fee income growth is expected to be strong in the current quarter due to the seasonality and hence, overall core PPP growth for our coverage universe is expected to be at 10% YoY/1% QoQ (Pvt/PSU banks at 11% YoY/ 7% YoY). Loan growth has sustained its momentum and deposits growth has increased given the 4Q seasonality, leading to decline in LDR for most banks. RoA for our coverage universe is expected to decline from 1.4% to 1.3% QoQ led by decline for PSU banks from 1.2% to 1% QoQ while for private banks it is expected to be stable at 1.7%. Management commentary on growth outlook and the impact of the middle east crisis will be the key monitorable. Our preferred picks are: ICICIBC, HDFCB, Ujjivan SFB; and SBIN, UNBK amongst PSU banks.

Loan growth momentum has sustained, deposits growth has improved on seasonality: Based on RBI's last fortnightly data as on 15th Mar'26, system loan growth stood at 14.2% YoY/2.2% QTD and deposits growth at 11.4% YoY/0.7% QTD. Business updates released so far indicates that loan growth momentum across the banks have sustained its momentum and seen an uptrend with growth averaging around 4-5% QoQ/12-14% YoY. Amongst private banks, AXSB, HDFCB and KMB reported sequential growth of 3-6% QoQ while for KVB QoQ growth was tad soft at 1.7% QoQ (17% YoY) and amongst PSU banks - BOB and UNBK reported growth of 6-6.3% QoQ while for PNB growth was relatively soft at 2.5% QoQ (13% YoY). Given the 4Q seasonality, deposits growth has also increased from 10.3% YoY/2.3% QoQ in Q3FY26 to 10.8% YoY/5% QoQ in 4QFY26 with higher increase seen for private banks. CD issuances during the quarter has increased by 52% YoY/63% QoQ on an aggregate basis (Refer table no. 6) and weighted avg. cost of CD issuances has also risen by 90-95 bps QoQ on average basis. Overall, we expect credit growth momentum to sustain, with FY27 loan growth likely to be at the 13%-13.5% YoY for our coverage universe.

NIM is expected to range bound

NIM for the current quarter is expected to be range bonud, reflecting the impact of the last 25 bps rate cut in the Dec'25 policy. This will result into decline in yields, which should be partly offset by a decline in the CoF. NII growth for our coverage universe is expected to be at 7.4% YoY/3.4% QoQ within which private banks NII growth expected to be at 9% YoY/ 4% QoQ while for PSU banks it is expected to be at 6% YoY/3% QoQ. On a sequential basis, NIMs for most banks are expected to decline marginally, with the exception of HDFCB, which is likely to witness a marginal increase. The highest contraction is anticipated for KVB (~8 bps QoQ), while KMB, AXSB, and ICICIBC are expected to witness a decline of ~3-5 bps QoQ. For PSU banks, NIM compression is expected to be in the range of 3-5 bps QoQ barring for SBIN, where margins are likely to remain broadly stable. Non-core income growth for the quarter is expected to be lower due to lower treasury gain on account of spike in bond yields (10-year G-sec on average basis increased by 16 bps QoQ) with higher impact is expected for PSU banks. Opex growth expected to increase by 8% QoQ mainly due to 14% QoQ increase for PSU banks.

Asset quality to remain stable

Asset quality in 4Q is expected to remain largely stable, with slippages for large private banks likely to decline sequentially, primarily due to higher agri slippages in the previous quarter. Slippages in the MFI segment are also expected to moderate further, supported by improving collection efficiency in the X bucket. Credit costs for the quarter are likely to remain broadly stable on a sequential basis. However, management commentary and any potential impact on the MSME segment arising from the middle east crisis will be key monitorables.

Loan growth momentum has sustained

Business updates released so far indicate that loan growth momentum across the banks have sustained and seen an uptrend with growth averaging around 4-5% QoQ / 12-14% YoY. Private banks' loan growth for the quarter is expected to improve from 10.5% YoY/3.2% QoQ in Q3FY26 to 12.4% YoY/4.2% QoQ in 4QFY26 while PSU banks outperformance in terms of growth is expected to continue at 14.4% YoY/4% QoQ (vs. 13.8% YoY in 3QFY26). As per the last fortnight sector data as on 15th Mar'26, loan growth for the sector stood at 14.2% YoY/2.2% QTD and deposits growth at 11% YoY/0.6% QTD.

Amongst private banks, AXSB, HDFCB and KMB reported sequential growth of 3-6% QoQ while for KVB QoQ growth was tad soft at 1.7% (17% YoY) and amongst PSU banks - BOB and UNBK reported growth of 6-6.3% QoQ while for PNB growth was relatively soft at 2.5% QoQ (13% YoY). RBI's sectoral deployment data as of Feb'25 indicates that retail credit growth is increasing gradually and large corporate credit growth has improved from its low while MSME growth continues to remain healthy.

Deposits growth has increased sequentially due to seasonality

Given the 4Q seasonality, deposits growth for the sector has increased from 10.3% YoY/ 2.3% QoQ in Q3FY26 to 10.8% YoY/5.2% QoQ in 4QFY26 with higher improvement seen for private banks. Deposits accretion for private banks was strong and growth stood at 12.4% YoY/6.6% QoQ (vs. 11.3% YoY/2.6% QoQ in 3QFY26). PSU banks have also reported increase in deposits growth at 9.6% YoY/4.3% QoQ (vs. 9.5% YoY/2% QoQ in 3QFY26). Amongst private banks strong deposits growth seen for most banks like HDFCB, AXSB and KMB. Given the higher deposits growth, LD ratio has declined for most of the bank's barring few. PSU banks have also witnessed moderation in LD ratio.

Pharma & Healthcare: 4QFY26 Preview

DF to drive growth amid US weakness; Diagnostics growth to be volume-led

On aggregate basis, we expect pharma & healthcare companies under our coverage to post sales growth of 9% YoY to INR 218bn. This growth is expected to be led by 17% YoY growth in healthcare companies under our coverage (ARTMSL, DLPL, METROHL, VIJAYA) and 8% YoY growth in pharma companies under our coverage (CIPLA, CONCORDB, DRRD, TRP). On the profitability front, we expect EBITDA margin contraction of 450bps YoY to 21.5%. APAT expected to decline 28% YoY reaching INR 26bn.

Pharma: Strong DF sales to be offset by weaker US performance

On aggregate basis, we expect pharma companies under our coverage to post sales growth of 8% YoY to INR 202bn. This growth is expected to be led by domestic formulation (DF) segment growing at 13% YoY on account of new launches and increased traction in base business. As per IQVIA, chronic therapy (cardiac, anti-diabetic) continues to outperform IPM. However, the US segment is likely to exhibit de-growth of 27% YoY largely due to lower gRevlimid sales and continued price erosion in the base portfolio slightly offset by new launches. Additionally, INR depreciation (+5% YoY v/s USD) to aid revenue growth. On the profitability front, due to lower gRevlimid sales, increase in marketing & advertising costs due to the recent GLP launches in Mar'26 and increase in freight costs due to the ongoing middle east conflict, we expect EBITDA margin contraction of 500bps YoY to 21%. APAT expected to decline 31% YoY reaching over INR 23bn.

Key factors to watch out for: Management commentary on the US pipeline, traction in GLP launch in India. **CIPLA**: Update on progress on Yurpeak performance; **TRP**: Update on progress of JBCP integration; **DRRD**: Status on Semaglutide approval in Canada and update on litigation with Novo Nordisk for Semaglutide in India; **CONCORDB**: Volume growth and price realization

US: Weak performance due to lower gRevlimid sales

For our coverage universe, we expect US sales of USD 489mn (down 27% YoY) for the quarter. Company-wise, lower gRevlimid sales is likely to impact DRRD/CIPLA. DRRD's US sales is expected to decline 33% YoY to USD 274mn. Also, CIPLA's US sales growth is expected to decline 21% YoY to USD 174mn. However, TRP is expected to witness sales growth of 19% YoY on account of increased traction and new launches.

DF: Chronic therapy to continue to drive growth

As per IQVIA, during Jan-Feb'26, IPM grew 16% YoY led by healthy growth in cardiac and anti-diabetes. However, this was offset by slow growth in anti-infective, gastro and derma. We expect DF sales to grow 13% YoY to INR 62bn for our coverage universe. Company-wise, we expect TRP to post 14% YoY sales growth due to increased traction in key therapies, new launches and increase in MR productivity. DRRD is expected to witness 14% YoY growth led by strong performance in gastro/pain/respiratory therapy. CIPLA's DF segment is expected to post 12% YoY growth driven by respiratory portfolio.

Expect profitability to decline YoY

For pharma companies under our coverage, we expect EBITDA margin contraction of 500bps YoY to 21%. Company-wise, CONCORDB/CIPLA/DRRD are likely to witness margin contraction of 1060bps/ 580bps/560bps YoY respectively, while TRP is expected to witness 360bps margin contraction to 30%.

Top Pick: TRP

Healthcare: Volume-led growth expected to continue

We expect the healthcare coverage universe to report 17% YoY revenue growth reaching ~INR 16bn in 4QFY26E. It will largely be driven by robust volume growth. For diagnostics companies, mix optimization and bundled test packages continue to drive test volumes for the companies. Also, continued traction in wellness tests augur well for test/patient volumes. EBITDA is likely to grow 21% YoY, with margins expanding 110bps to 27.4% driven by increased operating leverage. APAT is expected to grow 20% YoY.

Hospitals (ARTMSL) – Strong traction in domestic market partially offset by lower MVT volumes

We expect ARTMSL to deliver 15% YoY revenue growth to INR 2.8bn, led by stable occupancies and ARPOB expansion. EBITDA margin is likely to expand 370bps YoY to ~18.7%.

Diagnostics (DLPL, METROHL, VIJAYA) – Higher volumes to drive growth

DLPL: We expect 12% YoY revenue growth with test volume/realization growth of 10%/2% YoY. EBITDA margins likely to be stable at ~28% and APAT to grow 12% YoY.

METROHL: On group level, METROHL is expected to deliver revenue growth of 23% YoY with test volume/realization growth of 9%/13% YoY. EBITDA margins expected to expand 110bps YoY to 25.5%. APAT to deliver growth of 36% YoY.

VIJAYA: We expect VIJAYA to deliver 23% YoY revenue growth, with test volume/realization growth of 18%/5% YoY. EBITDA margins to expand 180bps YoY to 41.6%. APAT growth likely at 27% YoY.

Key factors to watch out for: Progress on expansion plans, competition from hospital-based labs and traction in wellness tests

Top Picks: ARTMSL, VIJAYA

SECTOR UPDATE

Fertilizer

Higher NBS rates impart limited respite; pricing action inevitable

The Government of India (GoI) has approved nutrient-based subsidy (NBS) rates on P&K fertilizers for 1HFY27 (for the Kharif season). As expected, NBS rates have been revised upward considering higher key raw material prices and rupee depreciation. Based on media reports, Nitrogen (N), Phosphate (P) and Sulphur (S) have witnessed a 10% increase in NBS rates compared to 2HFY26. While Potash (K) remain flat. GoI's budgetary expectation for the same is INR 415 bn (vs. INR 372 bn in 1HFY26) as against a non urea budgetary allocation of INR 540 bn in FY27. Considering current raw material costs and forex trends, we expect NPK and DAP manufacturers to face margin pressure in 1HFY27 unless they undertake price hikes. Our channel checks indicate that 1QFY27 phosphoric acid prices are stable at USD 1,300/MT, which should benefit backward-integrated players with healthy margin profiles in the coming quarters. However, Ammonia/Sulphur prices seen a sharp jump by 30%/ 21% on QoQ basis. Importers are likely to see steep profitability pressure. and the overall fertilizer sector margins are expected to remain subdued in 1HFY27. We continue to like both, Coromandel International and Paradeep Phosphate in the fertilizer sector.

GoI approved an upward revision in NBS rates on P&K fertilizers for 1HFY27

GoI has approved NBS rates on P&K fertilizers for 1HFY27. For the first half (Apr'26-Sept'26), GoI has revised the subsidy/kg for Nitrogen (N), Phosphate (P), Potash (K), and Sulphur to INR 47.32/ INR 52.76/ INR 2.38/ INR 3.16 respectively, costing the government INR 415 bn (vs. INR 372 bn last year) vs. a budgeted amount of INR 540 bn for the full year of FY27. The budgeted subsidy outgo for phosphatic fertilizer for the FY26 Rabi season (Oct'25-Mar'26) was INR 379 bn. When compared to 2HFY26 announced NBS rates, N, P and S witnessed a 10% increase while K remain flat YoY. DAP subsidy is revised upward to INR 32,787/MT vs. INR 27,800/MT in 1HFY26 (excluding special package of INR 3500/MT).

Expect key RM prices to go down in 1HFY27 once the Middle-East conflicts end

Prices of key raw materials for complex fertilizers remain mixed in 1QFY27, with phosphoric acid stable at ~USD 1,300/MT, while Ammonia and Sulphur have surged 30% and 21% QoQ amid Middle-East tensions. Given India's heavy dependence on imports for these inputs (75% for Ammonia and 53% for Sulphur), any easing of geopolitical issues should help normalize costs and support margins. **Overall, we view the current margin pressure for phosphatic fertilizer players as short-lived, with room for mitigation through timely price actions.**

Sector Outlook: Backward integrated players continued to benefit; importers to continue registering losses

In 1HFY27, phosphoric acid prices remain elevated at USD 1,300/MT+, while rock phosphate has corrected ~10-15% in recent quarters, supporting margin expansion for backward-integrated players like Coromandel and Paradeep in the coming periods. However, high DAP prices at ~USD 780/MT continue to pressure profitability for import-dependent companies. Given current raw material costs and the exchange rate, the recent subsidy increase appears insufficient, suggesting a need for calibrated price hikes to protect margins. We continue to like both, Coromandel International and Paradeep Phosphate in the fertilizer sector.

ANTIQUE'S INDIA ECONOMIC MONITOR

Monetary Policy

Growth-inflation outlook deteriorates!

Monetary Policy committee (MPC) kept repo rate unchanged at 5.25% (unanimously) and policy stance at "neutral", given the uncertainties related to the intensity and duration of West Asia conflict. MPC introduced FY27 real GDP growth and inflation estimate of 6.9% YoY (lower than 7.6% YoY for FY26e) and 4.6% YoY (significantly higher than 2.1% YoY for FY26e) respectively. MPC tweaked 1HFY27 growth lower by 20bps (to 6.75% YoY from its February estimate) and inflation higher by 10bps (to 4.2% YoY from its February estimate). Moreover, MPC for the first time projected FY27 core inflation at 4.4% YoY. In the Governor's statement, key additional measures announced are a) Completion of consolidation exercise of 9,000 regulatory instruction into 238 Master directions; b) Support bank capital adequacy norms by removing the condition regarding NPA provisioning for inclusion of quarterly profits in CRAR computation and to dispense with the requirement to maintain an Investment Fluctuation Reserve (IFR); and c) RBI to continue to be proactive and pre-emptive in liquidity management and ensure sufficient liquidity in the banking system. RBI MPC noted that upside risk exist for both inflation outlook (due to geo-political uncertainties and weather disturbances) and growth outlook (due to any supply chain disruption). We believe that we are at the end of the current rate cut cycle (with an upside risk of 25bps rate hike in H2FY27) given the current inflation-growth outlook.

Expect FY27 real GDP growth of 6.9%% YoY

RBI MPC expects FY27 real GDP growth of 6.9% YoY (with Q1/ Q2/ Q3/ Q4 at 6.8%/ 6.7%/ 7.0%/ 7.2% respectively). MPC has revised lower 1HFY27 growth by 20bps as compared to its February estimates. MPC highlighted factors supporting growth are a) Sustained momentum in services sector; b) Persisting impact of GST rationalization; c) Rising capacity utilisation in manufacturing, and healthy balance sheets of financial institutions and corporates; and d) Scaling up domestic manufacturing in several strategic and frontier sectors. However factors dragging growth are a) Heightened volatility in global financial markets; b) Merchandise exports may be adversely impacted from disruptions to key shipping routes and rise in freight and insurance costs; and c) Higher commodity prices due to any damage in energy infrastructure or weather related disruption.

Expect FY27 inflation at 4.6% YoY

RBI MPC expects FY27 inflation of 4.6% YoY (with Q1/ Q2/ Q3/ Q4 at 4.0%/ 4.4%/ 5.2%/ 4.7% respectively). These forecasts are based on a) FY27 crude oil assumption of USD 85/bbl (as compared to Antique estimate of $75/bbl); b) FY27 INR assumption of 94/ USD (as compared to Antique estimate of $92/bbl); and c) Normal monsoon (El-Nino risk may result in below normal monsoon). FY27 core inflation is projected at 4.4% YoY and, excluding precious metals, it is even lower indicating that underlying inflation pressures are expected to remain contained. MPC has revised higher 1HFY27 inflation estimate by 10bps as compared to its February estimates.

Measures announced to support bank capital adequacy norms

RBI has proposed to remove the condition regarding NPA provisioning for inclusion of quarterly profits in CRAR computation. It is incrementally positive for all banks as it augments the CRAR and consequently the lending capacity of banks. Also RBI has proposed to dispense with the requirement to maintain an Investment Fluctuation Reserve (IFR) as an additional buffer to hedge against depreciation in the value of investments. This measure will improve Tier-1 ratios for all banks, however, PSU banks are likely to benefit more given their relatively lower Tier-1 ratios.
