Developing a solid business model in e-bus segment

Setting up capabilities to be future-ready

We met with the management of JBM Auto Limited (JBMA) and visited their bus and battery manufacturing plants along with the bus depot. Below are the key takeaways from our visit.

A unique business model in the e-bus segment

JBMA has developed a distinctive business model in the Electric Bus (e-bus) segment, with end-to-end capabilities in the Build-Own-Operate model. JBMA has established the world's largest dedicated integrated e-bus manufacturing facility (outside China), spanning 4m sq ft in Delhi-NCR. The facility is dedicated to the manufacturing of e-buses and special-purpose vehicles (SPVs) with a capacity of 20,000 units annually. The facility has also provisioned vendor parks and integrated electronics manufacturing capabilities. This facility will also serve as an export hub for international markets such as Europe, Middle East, Africa, Asia Pacific among others. JBMA has also set up an advanced lithium-ion battery manufacturing facility in Delhi-NCR, having an annual capacity of 3 Gwh and will expand to 5 Gwh this year. Both these manufacturing facilities have been recognized by the Department of Scientific and Industrial Research, Ministry of Science & Technology, Govt. of India for their in-house Research & Development infrastructure and capabilities. Moreover, the company is also engaged in developing and deploying sustainable charging infrastructure solutions and is the frontrunner in electrifying buses pan India. JBMA has developed in-house capabilities to deploy fast charging infrastructure at depots, ensuring superior total cost of ownership benefits, owing to the availability of dual-gun fast-charging facilities, high density batteries, in-house management of depots, and lower maintenance costs. These factors have allowed it to profitably operate with their e-mobility platform through gross cost-contract (GCC) model with attractive returns.

Thus, JBMA has successfully developed and deployed a comprehensive in-house EV ecosystem aligned to its 'Well-to-Wheel' philosophy. Today, the company is a one-stop solution provider in e-mobility, encompassing manufacturing electric vehicles, lithium-ion batteries, power electronics, EV charging infrastructure solutions and has expertise in customizing them based on the operating pattern across various geographies across the globe. JBMA has been featured amongst the top 15 in the NSE EV Index recently.

Developed a range of buses with best-in-class quality

In terms of the addressable market, JBMA has developed a complete portfolio of e-buses for various applications, such as, Intra-city, Inter-city, luxury Coach, Tarmac, Schools, Staff buses and has recently added special purpose vehicles, i.e. Ambulance, Business Class Tarmac Coach and Defense buses to its portfolio. In fact, JBMA is the market leader in the Tarmac e-bus category catering to marquee customers from the airports and airlines domain. According to the management, JBMA e-buses have established benchmarks in the areas of passenger comfort, safety, affordability, and innovation. JBMA's lithium batteries are equipped with high-energy density delivering longer battery life and faster charging rates, which in turn translates into superior total cost of ownership (TCO) vs competition.

Aniket Mhatre - Research analyst (Aniket.Mhatre@MotilalOswal.com)

e-bus segment: Growing from strength to strength

Given its unique ability to build-own-operate seamlessly with the requisite charging infra in place, JBMA now enjoys a leadership position in the e-bus segment with a market share of ~35% on order book and the executed level, as per the management. JBMA's current order book stands at more than 5,000 buses from the public transport authorities on GCC basis. Further, in response to the growing consumer needs, Vertelo (a Macquarie-owned platform dedicated to providing EV solutions in India) has inked an agreement with JBMA to execute 2,000 e-buses in the next 3 years. This is a strong growth lever for JBMA and will help the company service the private fleet operators along with their financing requirements. The fact that JBMA buses have been backed by Macquarie, which is a large global AMC, speaks volumes about its technical capabilities in the e-bus segment in India. JBMA has been the first OEM with whom the execution of this MOU has commenced, and the first lot of ~50 buses has already been delivered. Further to expand its footprint globally for electric buses, JBMA launched its Luxury Coach – Galaxy and Citybus – ECOLIFE at Bus World in Brussels, Belgium and was the only Indian company to have been invited to showcase its products and e-mobility solutions. Thereafter, JBMA also launched its buses in other parts of Europe and MEA region.

Auto systems and assemblies: a steady growth business

JBMA is a well-established Tier-1 auto systems & assemblies supplier, with presence across all key automotive segments and customers. It supplies to all categories of the auto sector: the PV segment contributes 70-75% of its revenue, followed by CVs with a 15% contribution, and farm equipment at 5%. This is currently the largest division of JBMA and contributes ~59% to its consolidated revenue.

Tools and dies business – the most profitable segment

JBMA possesses the largest tool room in the industry and has well established credentials in the tooling business in India. It has the capacity to produce ~1250 dies per annum. JBMA works with most of the OEMs and caters to over 50 customers and 110 vehicle platforms globally. The tool room has forayed into the non-auto segment. Class leading design and execution capabilities are the cornerstone of JBMA Tooling division.

Healthy financials during FY22-24

JBMA's consolidated revenue clocked ~25% CAGR over FY22-24 to reach INR 50.1b. The Auto OEM division (e-bus segment)'s revenue surged 3.2x YoY in FY24 to reach INR17.4b, which led to its higher contribution in the overall mix to 35% in FY24 from 14% in FY23. Overall, the company has clocked a margin expansion of 100bp during the last two years to reach 11.7%, fueled by an improvement in the OEM segment. The company reported healthy improvements in return ratios as its RoE/ RoCE expanded to 16.3%/14.4% in FY24 from 12.9%/11.8% in FY23.

About the company

JBMA, a part of the JBM Group, manufactures and sells auto systems & assemblies, tools and dies. It is also the market leader in the e-bus segment across various e-bus applications. JBMA specializes in the manufacturing of high-tech electric buses and low-emission CNG buses, with a strong focus on technology and innovation. Its business segments include auto systems, assemblies & sub-assemblies (Component Division); tools, and dies (Tool Room Division), and Electric Bus manufacturing business and E-Mobility business as an original equipment manufacturer (OEM Division). The Auto Component Division is engaged in the business of manufacturing automobile components for PVs, CVs and Farm Equipment. The Tool Room Division manufactures and sells dies to OEMs. The OEM Division performs activities related to the development, design, manufacture, assembly, and sale of buses and operations of the buses by way of the e-mobility platform as well as parts, accessories and maintenance contracts for the same.

19 Plants of JBMA are spread across 13 locations in India, covering all the auto hubs in the country. It currently has two technology joint ventures with Yorozu Corporation (Japan), and Ogihara (Japan).

The largest bus manufacturing facility globally, outside China

- JBMA has established the world's largest dedicated integrated e-bus manufacturing facility outside China, spanning 4m sq ft in Delhi-NCR. The facility is dedicated to e-bus manufacturing and special-purpose vehicles (SPVs), with a capacity of 20,000 units annually.
- An integrated vendor park is part of the facility, promoting close collaboration with suppliers and streamlining the supply chain for faster and more efficient production processes.
- Multiple Centers of Excellence (COE) have been set up to cover the entire EV ecosystem. These COEs will focus on the different aspects of EV development, including design, manufacturing, and innovation, ensuring a holistic approach to EV production.
- The facility features state-of-the-art innovation centers and test labs. These centers are equipped with the latest in materials science and technology, enabling the development and testing of new-age materials and innovative solutions for EVs.
- This facility also houses R&D labs, that support extensive R&D activities, thus fostering innovation and improving the performance, safety, and efficiency of JBMA's EV offerings.

- The EV plant is designed to achieve the highest levels of productivity with advanced automation and economical engineering practices.
- The facility is fully digitalized, incorporating Industry 4.0 standards, Manufacturing Execution Systems (MES), and virtual manufacturing capabilities. This integration ensures real-time monitoring, improved production accuracy, and the ability to simulate and optimize manufacturing processes before implementation.

Well-integrated EV ecosystem

- JBMA has also set up an advanced lithium-ion battery manufacturing facility in Delhi-NCR, with an annual capacity of 3 Gwh that will expand to 5 Gwh this year.
- JBMA also has the in-house capability to set up best in class ultra-fast charging infrastructure at various depots pan India and in multiple geographies.
- Further, we understand that the monocoque chassis structure of its buses are also manufactured in-house.

Ability to maintain and operate depots

- As per reports from World Bank, there will be substitution demand in India for 0.8m EVs buses by 2030. This includes 0.2m buses from state transport undertakings (STUs) and 0.55m buses from private operators, and 50k school buses.
- Given the mixed financials of different STUs in India, the government, in partnership with both public and private stakeholders, worked out a solution to enable EV transition in buses without burdening the STUs. The current procurement model followed by the Government of India is known as the Gross Cost Contracting (GCC) model, which works on the 'own and operate' principle for OEMs. It requires the operator to procure e-buses as well as implement the charging infrastructure. The advantage of this model is that it saves the cash-starved STUs from making the initial capital investment. For its troubles, the operator is paid based on the number of km the buses are operated.
- The GCC model works as follows: 1) various STUs would list down their EV bus requirements at the State / regional level; 2) this demand would be aggregated by CESL (another govt. body) at the Central level; 3) based on the demand, tenders would be floated to bid for these orders; 4) OEMs would bid for such tenders and the best tender would win the contract.
- Under the GCC model, the tenders are based on a realization per km basis over the life of the contract. Also, under the GCC model, the OEMs would be responsible to supply, own, operate and maintain the fleet.
- In order to accelerate EV-adoption in the country, the Government of India rolled out the PM-eBus Sewa Scheme on 16th Aug'23 with an ambition of enhancing the bus operations by introducing 10,000 e-buses through a public-private partnership (PPP) model.
- JBMA has more than 3 years' experience of executing and operating buses and managing depot under existing GCC concession. As per the management, JBMA team has developed proficiency in maintaining and operating bus depots. Once the tender is floated, JBMA analyses the tender conditions and bids for the tender basis its key fundamentals and parameters. One of the advantages that JBMA enjoys is that it also designs and deploys fast charging infrastructure solutions. A superior TCO, owing to the availability of dual-gun fast-charging facilities, high density batteries, in-house management of depots, and lower maintenance costs, has allowed it to profitably operate through the GCC model with attractive returns. This unique ability to build-own-operate seamlessly, with the requisite charging infra in place, has been one of the key reasons for JBMA's leadership position in the e-bus segment today.
- Recently, CESL placed an order for the procurement, supply, operations, and maintenance of 2,155 e-buses, of which JBMA has been awarded 1,390 buses.

Developed a range of buses with best-in-class quality

Developed multiple variants for varied applications

At the Auto Expo 2023, JBMA unveiled a range of EV buses, including Intra-city, Inter-city and luxury Galaxy Coach for multiple applications (viz., city travel, corporates, tarmac bus required in aviation, school transit and Defense buses). The company also launched its Luxury Coach – Galaxy and Citybus – ECOLIFE at Bus World 2023 in Brussels, Belgium and was the only Indian company to have been invited to showcase its products and e-mobility solutions. JBMA also launched its Intercity bus and Staff bus at the Bharat Mobility Show 2024 in New Delhi.

According to the management, JBMA's e-buses have established benchmarks in the areas of passenger comfort, safety, affordability, and innovation. JBMA buses come with a lightweight monocoque, full stainless steel body structure (optional). Its ECOLIFE e-buses are equipped with fast-charging lithium-ion batteries and boast modern features such as a real-time Passenger Information System (PIS), Panic Buttons for emergencies, Automatic Bus Vehicle Location System, CCTV cameras, public address system, advanced telematics providing 24x7 access to the vehicle's state of health.

Further, JBMA Galaxy coaches are designed with luxury in mind, including convenience and style, comfort, safety, and performance. The 12-meter, high-floor coaches are equipped with the latest infotainment systems, modern utilities like Wi-Fi, mobile charging ports, comfortable reclining seats, saloon lighting, and best-in-class safety features. With a seating capacity of upto 49 passengers, the new coaches are powered with high-energy-density, advanced-chemistry lithium-ion batteries, offering a range of up to 1,000km per day.

Exhibit 7: JBMA's key products

ECO LIFE - e12

- Available in low floor and high floor platforms
- Capacity - **72 passengers**
- Daily Coverage of **300 kms**
- Exhibits high performance reliability and safety
- Uptime - **>97%**
- World class IM and IL safety standard

ECO LIFE - e9

- Available in low floor and high floor platforms
- Capacity – **42 passengers**
- Daily Coverage of **300 kms**
- Best in class performance
- Uptime - **>97%**
- World class IM and IL safety standard

GALAXY

- Available in 12-meter platform
- Capacity – **47 passengers**
- Daily Coverage of **1000 kms**
- ADAS, ECAS,EBS, EVSC, hill hold for driver convenience
- Bus torque and battery durability and enabled by our unique power management methodology
- World class IM and IL safety standard

e-SKCOLIFE

- Availablein 9m and 12m platforms
- Capacity – **78 students capacity**
- Daily Coverage of **300 kms**
- Built in best inclass safety standards
- Adaptable to demographic and geographic diversity of India
- Can be customized based on customer needs

e-BIZLIFE

- Available in 9m and 12m platforms
- Capacity – **63 corporate leaders capacity**
- Daily Coverage of **300 kms**
- Offers stress free and noiseless commute
- Loaded with new-age technology to ensure exceptional performance
- Can be customized based on customer needs

e-SKYLIFE

- Available in 9m and 12m low floor platforms
- Capacity – **72 passengers capacity**
- **20 hrs** of operation per day
- Offer quiet and environmentally pleasing ride to passengers
- World class IM and IL safety standard

Source: Company

In terms of safety features, JBMA's electric buses are equipped with the proprietary Advanced Driver-Assistance System (ADAS) technology, which assists the driver to detect obstacles and check driving errors for the utmost safe transit. A host of other additional safety features include, Advance Emergency Braking System (AEBS), Forward Vehicle Collision Warning System (FVCWS), Lane Departure Warning System, Pedestrian and Cyclist Collision Warning (MOIS), Fire Detection and Suppression System (FDSS), and 360-degree camera, et al.

Over the last five years, the company has clocked more than 150 million e-kms, having catered to over 1b passengers to date.

Best-in-class battery technology ensures superior TCO

- According to the management, JBMA's lithium batteries are equipped with high-energy density delivering longer battery life and faster charging rates, which in turn translates into superior total cost of ownership (TCO).
- According to the company, JBMA has had a 98% uptime from the start during the project tenure. This is much better than the competition.
- The depth of discharge (upto 85%) is much better than competitors, which helps JBMA improve its range and battery life.
- Higher battery density and superior uptime translate into superior TCO relative to the competition, as per management.

e-bus segment: Growing from strength to strength

Enjoys market leadership in the e-bus segment

- Given its unique business model highlighted above, JBMA has evolved as a market leader in the e-bus segment, with ~35% market share on order book and the executed level, as per the management. The company is the only EV ecosystem player that has bagged key prestigious projects from the government. We enumerate below some of the recent order wins for JBMA with STU's:
  - ✓ In FY22, CESL awarded a tender for ~4000 buses. Of this, while TTMT won ~2,400 units, JBMA won the balance ~1,600 units.
  - ✓ In Dec'22, CESL floated another tender of ~6,400 buses, of which JBMA won ~2,400 buses. The balance order was split among other players.
  - ✓ In the recently announced PM e bus Sewa tender, contracts for about 2,155 buses were awarded. JBMA bagged the order for 1,390 units.

Macquarie's global fund has partnered with JBMA

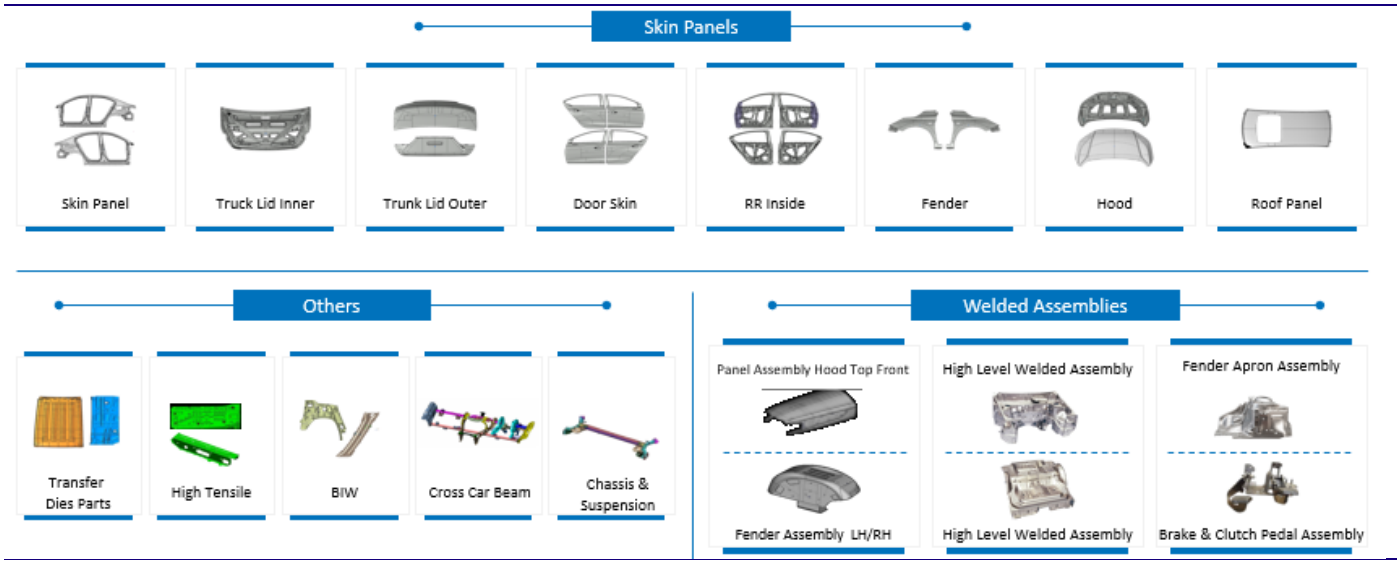
- Macquarie Asset Management, a division of the Macquarie Group, has launched Vertelo, a platform dedicated to providing fleet electrification solutions within the Indian market. Vertelo secured an initial investment from the Green Climate Fund (GCF), pledging up to USD200m and outlining its intentions to invest USD1.5b over a span of 10 years. This substantial investment aims to potentially mitigate greenhouse gas emissions by 9.6m metric tons of CO_2 equivalent. Vertelo has inked an agreement with JBMA to fund 2,000 e-buses in next 3 years.
- Vertelo has finalized a substantial lease arrangement with Chalo Mobility Private Ltd, an Indian transport technology firm, to deploy 50 e-buses manufactured by JBMA for operational use in Mumbai. These buses have already been deployed.
- This is a strong growth lever for JBMA and will help the company service the private fleet operators along with their financing requirements. JBMA will sell these buses to Macquarie and the contract would involve maintaining and operating the buses (like for STUs).
- The fact that JBMA buses have been backed by Macquarie, which is a large global AMC, speaks volumes about its technical capabilities in the e-bus segment in India.

Auto components: a steady growth business

JBMA is a well-established Tier 1 auto systems & assemblies supplier with a presence across all the key automotive segments and customers. Its portfolio includes safety-critical products such as BIW parts (including the chassis & suspension systems, exhaust systems, cross-car beams, lower control arm, etc), as well as numerous aesthetic components. This is currently the largest division of JBMA and contributes ~59% of its consol. revenue.

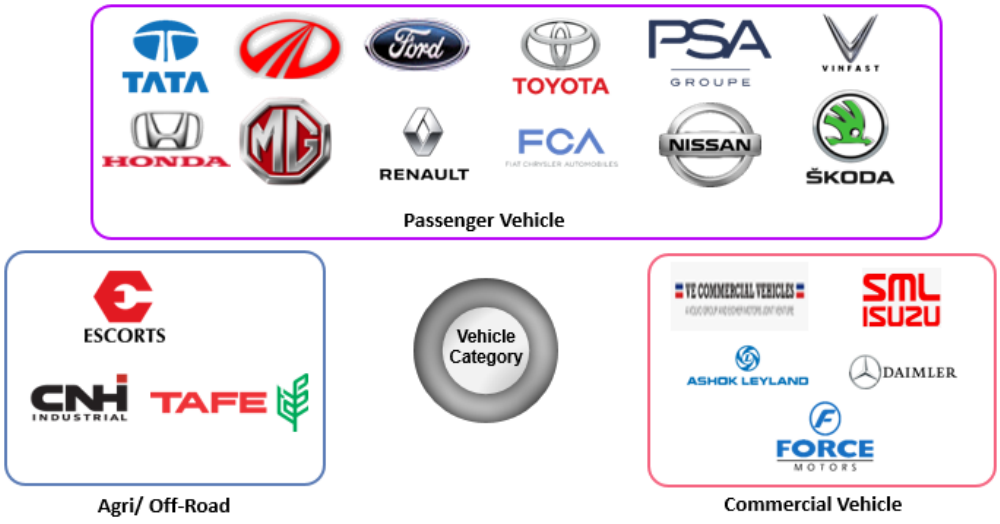
- **The division's key products include:** i) Skin panels – door skin, hood, trunk lid outer, roof panel, etc. ii) welded assemblies – panel assembly hood top front, fender assembly, high-level welded assembly, etc. and iii) others – transfer die parts, skin, high tensile, etc.
- **It supplies to all categories of the auto sector:** The PV segment contributes 70-75% of its revenue, followed by CVs with a 15% contribution, and Farm Equipment at 5%.

Exhibit 8: Key auto components and tooling



Source: Company

Exhibit 9: Key customers for auto components and tooling



Source: Company

Tools and Dies business – the most profitable segment

This segment contributed 7-8% of the consolidated revenue in FY24. It has the capacity to produce over 1250 dies per annum. It serves more than 90% of the OEMs in India and caters to over 50 customers globally. According to the management, over 7m vehicles have been produced across 110 vehicle platforms with JBMA tooling.

- Its key stamping dies include transfer dies, skin panels, BIW, chassis. These facilities are in Greater Noida, Faridabad, and Indore.
- **Import reduction:** Historically, OEMs sourced 50% of their tools from imports and 50% domestically. However, there is a current trend towards reducing imports, which is driving the strong demand for this segment.
- **Burgeoning demand:** The shortened lifespan of vehicle models is fueling an increased demand for tools and dies.
- **Market presence:** JBMA possesses the largest tool rooms in the industry.

Healthy financials during FY22-24

Revenue/EBITDA/PAT clocked a CAGR of ~18%/18%/13% over FY19-24

- JBMA's consol. revenue grew ~30% YoY to INR50.1b in FY24, largely driven by the ~3.2x surge in the OEM division, resulting in the segment revenue of INR17.4b.
- The company's growth is becoming more balanced and holistic with increasing contribution from OEM division. Revenue contribution of the OEM division expanded to 35% in FY24 from 14% in FY23. During FY24, JBMA successfully achieved its revenue guidance of INR50b.
- JBMA's EBITDA jumped ~47% YoY to INR5.8b led by improved utilization in the OEM division and cost-control measures. EBITDA margin expanded 140bp YoY to 11.7% in FY24 owing to new products, technology innovation and reduced time to market.
- The OEM division's EBIT margin witnessed a sharp improvement of ~420bp YoY to 9.4%. Margin for the auto component division largely remained stable YoY at 6.5%, while it contracted 110bp YoY to 21.5% for the tooling business.
- JBMA's healthy operational performance led to ~44% YoY PAT growth at INR1.8b.
- Owing to the higher working capital requirement, net debt increased to INR20.6b in FY24 from INR13.5b in FY22.
- The company reported healthy improvements in return ratios as its RoE/ RoCE expanded to 16.3%/14.4% in FY24 from 12.9%/11.8% in FY23.

Disclosures

The following Disclosures are being made in compliance with the SEBI Research Analyst Regulations 2014 (herein after referred to as the Regulations).

Motilal Oswal Financial Services Ltd. (MOFSL) is a SEBI Registered Research Analyst having registration no. INH000000412. MOFSL, the Research Entity (RE) as defined in the Regulations, is engaged in the business of providing Stock broking services, Depository participant services & distribution of various financial products. MOFSL is a listed public company, the details in respect of which are available on www.motilaloswal.com. MOFSL (erstwhile Motilal Oswal Securities Limited - MOSL) is registered with the Securities & Exchange Board of India (SEBI) and is a registered Trading Member with National Stock Exchange of India Ltd. (NSE) and Bombay Stock Exchange Limited (BSE), Multi Commodity Exchange of India Limited (MCX) and National Commodity & Derivatives Exchange Limited (NCDEX) for its stock broking activities & is Depository participant with Central Depository Services Limited (CDSL) National Securities Depository Limited (NSDL),NERL, COMRIS and CCRL and is member of Association of Mutual Funds of India (AMFI) for distribution of financial products and Insurance Regulatory & Development Authority of India (IRDA) as Corporate Agent for insurance products. Details of associate entities of Motilal Oswal Financial Services Limited are available on the website at http://onlinereports.motilaloswal.com/Dormant/documents/List%20of%20Associate%20companies.pdf

MOFSL and its associate company(ies), their directors and Research Analyst and their relatives may; (a) from time to time, have a long or short position in, act as principal in, and buy or sell the securities or derivatives thereof of companies mentioned herein. (b) be engaged in any other transaction involving such securities and earn brokerage or other compensation or act as a market maker in the financial instruments of the company(ies) discussed herein or act as an advisor or lender/borrower to such company(ies) or may have any other potential conflict of interests with respect to any recommendation and other related information and opinions.; however the same shall have no bearing whatsoever on the specific recommendations made by the analyst(s), as the recommendations made by the analyst(s) are completely independent of the views of the associates of MOFSL even though there might exist an inherent conflict of interest in some of the stocks mentioned in the research report.

MOFSL and / or its affiliates do and seek to do business including investment banking with companies covered in its research reports. As a result, the recipients of this report should be aware that MOFSL may have a potential conflict of interest that may affect the objectivity of this report. Compensation of Research Analysts is not based on any specific merchant banking, investment banking or brokerage service transactions. Details of pending Enquiry Proceedings of Motilal Oswal Financial Services Limited are available on the website at https://galaxy.motilaloswal.com/ResearchAnalyst/PublishViewLitigation.aspx

A graph of daily closing prices of securities is available at www.nseindia.com, www.bseindia.com. Research Analyst views on Subject Company may vary based on Fundamental research and Technical Research. Proprietary trading desk of MOFSL or its associates maintains arm's length distance with Research Team as all the activities are segregated from MOFSL research activity and therefore it can have an independent view with regards to Subject Company for which Research Team have expressed their views.

Regional Disclosures (outside India)

This report is not directed or intended for distribution to or use by any person or entity resident in a state, country or any jurisdiction, where such distribution, publication, availability or use would be contrary to law, regulation or which would subject MOFSL & its group companies to registration or licensing requirements within such jurisdictions.

For Hong Kong:

This report is distributed in Hong Kong by Motilal Oswal capital Markets (Hong Kong) Private Limited, a licensed corporation (CE AYY-301) licensed and regulated by the Hong Kong Securities and Futures Commission (SFC) pursuant to the Securities and Futures Ordinance (Chapter 571 of the Laws of Hong Kong) "SFO". As per SEBI (Research Analyst Regulations) 2014 Motilal Oswal Securities (SEBI Reg. No. INH000000412) has an agreement with Motilal Oswal capital Markets (Hong Kong) Private Limited for distribution of research report in Hong Kong. This report is intended for distribution only to "Professional Investors" as defined in Part I of Schedule 1 to SFO. Any investment or investment activity to which this document relates is only available to professional investor and will be engaged only with professional investors." Nothing here is an offer or solicitation of these securities, products and services in any jurisdiction where their offer or sale is not qualified or exempt from registration. The Indian Analyst(s) who compile this report is/are not located in Hong Kong & are not conducting Research Analysis in Hong Kong.

For U.S.

Motilal Oswal Financial Services Limited (MOFSL) is not a registered broker - dealer under the U.S. Securities Exchange Act of 1934, as amended (the"1934 act") and under applicable state laws in the United States. In addition MOFSL is not a registered investment adviser under the U.S. Investment Advisers Act of 1940, as amended (the "Advisers Act" and together with the 1934 Act, the "Acts), and under applicable state laws in the United States. Accordingly, in the absence of specific exemption under the Acts, any brokerage and investment services provided by MOFSL, including the products and services described herein are not available to or intended for U.S. persons. This report is intended for distribution only to "Major Institutional Investors" as defined by Rule 15a-6(b)(4) of the Exchange Act and interpretations thereof by SEC (henceforth referred to as "major institutional investors"). This document must not be acted on or relied on by persons who are not major institutional investors. Any investment or investment activity to which this document relates is only available to major institutional investors and will be engaged in only with major institutional investors. In reliance on the exemption from registration provided by Rule 15a-6 of the U.S. Securities Exchange Act of 1934, as amended (the "Exchange Act") and interpretations thereof by the U.S. Securities and Exchange Commission ("SEC") in order to conduct business with Institutional Investors based in the U.S., MOFSL has entered into a chaperoning agreement with a U.S. registered broker-dealer, Motilal Oswal Securities International Private Limited. ("MOSIPL"). Any business interaction pursuant to this report will have to be executed within the provisions of this chaperoning agreement.

The Research Analysts contributing to the report may not be registered /qualified as research analyst with FINRA. Such research analyst may not be associated persons of the U.S. registered broker-dealer, MOSIPL, and therefore, may not be subject to NASD rule 2711 and NYSE Rule 472 restrictions on communication with a subject company, public appearances and trading securities held by a research analyst account.

For Singapore

In Singapore, this report is being distributed by Motilal Oswal Capital Markets (Singapore) Pte. Ltd. ("MOCMSPL") (UEN 201129401Z), which is a holder of a capital markets services license and an exempt financial adviser in Singapore.This report is distributed solely to persons who (a) qualify as "institutional investors" as defined in section 4A(1)(c) of the Securities and Futures Act of Singapore ("SFA") or (b) are considered "accredited investors" as defined in section 2(1) of the Financial Advisers Regulations of Singapore read with section 4A(1)(a) of the SFA. Accordingly, if a recipient is neither an "institutional investor" nor an "accredited investor", they must immediately discontinue any use of this Report and inform MOCMSPL .

The views expressed in this research report accurately reflect the personal views of the analyst(s) about the subject securities or issues, and no part of the compensation of the research analyst(s) was, is, or will be directly or indirectly related to the specific recommendations and views expressed by research analyst(s) in this report.

Terms & Conditions:

This report has been prepared by MOFSL and is meant for sole use by the recipient and not for circulation. The report and information contained herein is strictly confidential and may not be altered in any way, transmitted to, copied or distributed, in part or in whole, to any other person or to the media or reproduced in any form, without prior written consent of MOFSL. The report is based on the facts, figures and information that are considered true, correct, reliable and accurate. The intent of this report is not recommendatory in nature. The information is obtained from publicly available media or other sources believed to be reliable. Such information has not been independently verified and no guaranty, representation of warranty, express or implied, is made as to its accuracy, completeness or correctness. All such information and opinions are subject to change without notice. The report is prepared solely for informational purpose and does not constitute an offer document or solicitation of offer to buy or sell or subscribe for securities or other financial instruments for the clients. Though disseminated to all the customers simultaneously, not all customers may receive this report at the same time. MOFSL will not treat recipients as customers by virtue of their receiving this report.

Disclaimer:

The report and information contained herein is strictly confidential and meant solely for the selected recipient and may not be altered in any way, transmitted to, copied or distributed, in part or in whole, to any other person or to the media or reproduced in any form, without prior written consent. This report and information herein is solely for informational purpose and may not be used or considered as an offer document or solicitation of offer to buy or sell or subscribe for securities or other financial instruments. Nothing in this report constitutes investment, legal, accounting and tax advice or a representation that any investment or strategy is suitable or appropriate to your specific circumstances. The securities discussed and opinions expressed in this report may not be suitable for all investors, who must make their own investment decisions, based on their own investment objectives, financial positions and needs of specific recipient. This may not be taken in substitution for the exercise of independent judgment by any recipient. Each recipient of this document should make such investigations as it deems necessary to arrive at an independent evaluation of an investment in the securities of companies referred to in this document (including the merits and risks involved), and should consult its own advisors to determine the merits and risks of such an investment. The investment discussed or views expressed may not be suitable for all investors. Certain transactions -including those involving futures, options, another derivative products as well as non-investment grade securities - involve substantial risk and are not suitable for all investors. No representation or warranty, express or implied, is made as to the accuracy, completeness or fairness of the information and opinions contained in this document. The Disclosures of Interest Statement incorporated in this document is provided solely to enhance the transparency and should not be treated as endorsement of the views expressed in the report. This information is subject to change without any prior notice. The Company reserves the right to make modifications and alternations to this statement as may be required from time to time without any prior approval. MOFSL, its associates, their directors and the employees may from time to time, effect or have effected an own account transaction in, or deal as principal or agent in or for the securities mentioned in this document. They may perform or seek to perform investment banking or other services for, or solicit investment banking or other business from, any company referred to in this report. Each of these entities functions as a separate, distinct and independent of each other. The recipient should take this into account before interpreting the document. This report has been prepared on the basis of information that is already available in publicly accessible media or developed through analysis of MOFSL. The views expressed are those of the analyst, and the Company may or may not subscribe to all the views expressed therein. This document is being supplied to you solely for your information and may not be reproduced, redistributed or passed on, directly or indirectly, to any other person or published, copied, in whole or in part, for any purpose. This report is not directed or intended for distribution to, or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction, where such distribution, publication, availability or use would be contrary to law, regulation or which would subject MOFSL to any registration or licensing requirement within such jurisdiction. The securities described herein may or may not be eligible for sale in all jurisdictions or to certain category of investors. Persons in whose possession this document may come are required to inform themselves of and to observe such restriction. Neither the Firm, not its directors, employees, agents or representatives shall be liable for any damages whether direct or indirect, incidental, special or consequential including lost revenue or lost profits that may arise from or in connection with the use of the information. The person accessing this information specifically agrees to exempt MOFSL or any of its affiliates or employees from, any and all responsibility/liability arising from such misuse and agrees not to hold MOFSL or any of its affiliates or employees responsible for any such misuse and further agrees to hold MOFSL or any of its affiliates or employees free and harmless from all losses, costs, damages, expenses that may be suffered by the person accessing this information due to any errors and delays.
