SAMHI Hotels is a leading Indian hotel platform operating 31 hotels and 4,862 rooms across 13 major cities, managed by top international brands like Marriott, Hyatt, and IHG under long-term agreements. The company follows an acquisition-led growth strategy, leveraging a strong track record of turning around hotels to become one of the fastest-growing hotel owners. The company aims to capitalize on the strong structural tailwinds within the hospitality space by expanding its portfolio by rebranding 473 rooms, and adding 1,500 rooms through expansion and new openings, which supports revenue growth. Over FY25–30E, we foresee the company's revenue & EBITDA growing at 14% and 18% CAGR, while the EBITDA margin should improve by 600 bps to around ~42%. We initiate coverage on SAMHI Hotels with a BUY rating and a target price of INR 260, valuing the stock at 12x FY28E EV/EBITDA.

Unlocking value from underappreciated assets—acquisition & turnaround: Samhi's strategy centers around acquiring under-valued hotels in high-potential markets and rapidly upgrading them instead of pursuing slower new-build projects. The company purchases assets at attractive valuation, which reduces development risk, and partners with top brands like Marriott, Hyatt, and IHG to renovate, reconfigure, and rebrand. Its proven turnaround model product upgrades, cluster efficiencies, and data-led asset management boosts margins, improves guest experience, and lifts occupancy and RevPAR.

Upper-upscale expansion drives faster revenue growth: SAMHI's upper-upscale portfolio, already contributing 43% of room revenue currently, is set to rise to ~60% by FY30, with revenue expected to grow from INR 4.8 bn to INR 12 bn and revenue per key from INR 4.5 mn to INR 6.5 mn. The expansion is into premium micro-markets via brands like Westin, W, Hyatt Regency, Sheraton, and Renaissance along with major upgrades in Hyderabad, Pune, and Bengaluru. These upper-upscale assets offer stronger pricing power, deeper corporate demand, and superior MICE traction, positioning them as key drivers of SAMHI's accelerated growth.

Increased market share in emerging commercial markets: With the 1,000-room pipeline expansion dual branding & asset-light leases, SAMHI unveiled two major expansion initiatives in 2QFY26 that materially strengthens its footprint in high-growth commercial markets. The headline project is nearly a 700-room dual-branded Westin + Fairfield hotel in Navi Mumbai, marking the company's debut in the Mumbai Metropolitan Region. Phase 1 will add about 400 rooms, with scope to scale up to 700, strategically positioned near the upcoming Navi Mumbai International Airport and DY Patil Stadium, and supported by new infrastructure such as the Atal Setu. With an estimated investment of ~INR 10 bn and a cost per key well below typical Mumbai replacement rates, this will be SAMHI's largest asset and a significant long-term driver of ARR and RevPAR.

Revenue and EBITDA growth to remain strong; debt reduction on track: We expect the company to sustain its strong double-digit revenue growth over the near to medium term, supported by its expanding portfolio and a highly favorable industry backdrop. As SAMHI accelerates its premiumization strategy and deepens its presence in high-growth micro-markets, we model revenue and EBITDA CAGR of ~14% and ~18%, respectively, over FY25–30E, and expect EBITDA margin should improve by 600 bps to around ~42%. Profitability is also expected to strengthen meaningfully as we build-in a reduction in net debt/EBITDA from 2.9x as of 2QFY26 to 1.7x by FY28, supported by rising free cash flows, scale benefits, and disciplined capital recycling.

Investment Summary

We expect the hospitality sector to sustain its strong growth trajectory over the near to medium term, supported by enduring structural tailwinds. Against this backdrop, we estimate Samhi Hotels' revenue to grow at 14.0% CAGR over FY25–30E, with the EBITDA margin expanding by 600 bps, driven by a robust pipeline and an improving portfolio mix. We initiate coverage of Samhi Hotels with a BUY recommendation and a target price of INR 260, implying 44% upside. We value the stock at 12x FY28E EV/EBITDA, after factoring in net debt and the GIC JV. *(see table 5 for details).*

Investment Rationale

Internal growth projects to accelerate future growth

The company currently operates 4,862 rooms and is driving future growth through a mix of rebranding, expansion, and new hotel openings. A total of 473 rooms are being rebranded and around 1,500 rooms are being added across mid-scale and upscale segments to enhance revenue. Key projects recently completed include rebranding of the Holiday Inn Express Greater Noida, a new Holiday Inn Express in Kolkata, and expansion of the Sheraton Hyderabad and Holiday Inn Express Whitefield, Bengaluru. Several upscale properties, including Hyatt Regency (Pune), W, Hitec City, Hyderabad, are in advanced fit-out or design stage, alongside conversion to Tribute Portfolio by Marriott in Bengaluru and Jaipur. The pipeline extends through FY26–30, with sizeable addition expected in Westin Whitefield Bengaluru, a mid-scale asset in Financial District Hyderabad, and the upcoming Westin & Fairfield by Marriott in Navi Mumbai. Overall, the internal development pipeline positions the portfolio for strong scale-up and improved revenue traction over the coming years.

SAMHI has outlined a significant expansion pipeline that adds ~1,500+ new rooms to the portfolio, taking the total to ~6,300 rooms over the medium term:

1. Navi Mumbai dual-branded development (Westin + Fairfield by Marriott) phase 1: ~400 rooms; expandable to ~700 rooms.
2. Marks entry into Mumbai Metropolitan Region—filling a gap in the current network. Cost: ~INR 6.5 bn for phase 1 (400 keys), cost per key INR 16.5–17 mn, below replacement cost. Potential full-scale capacity EBITDA (700 rooms) ~INR 1.80–1.85 bn annually as per the company.
3. Hyderabad – Financial District (new 260-room hotel through long-term variable lease). The third SAMHI asset in Hyderabad Financial District alongside Sheraton and Fairfield. Allows SAMHI to operate across three price points in a high-demand tech corridor.

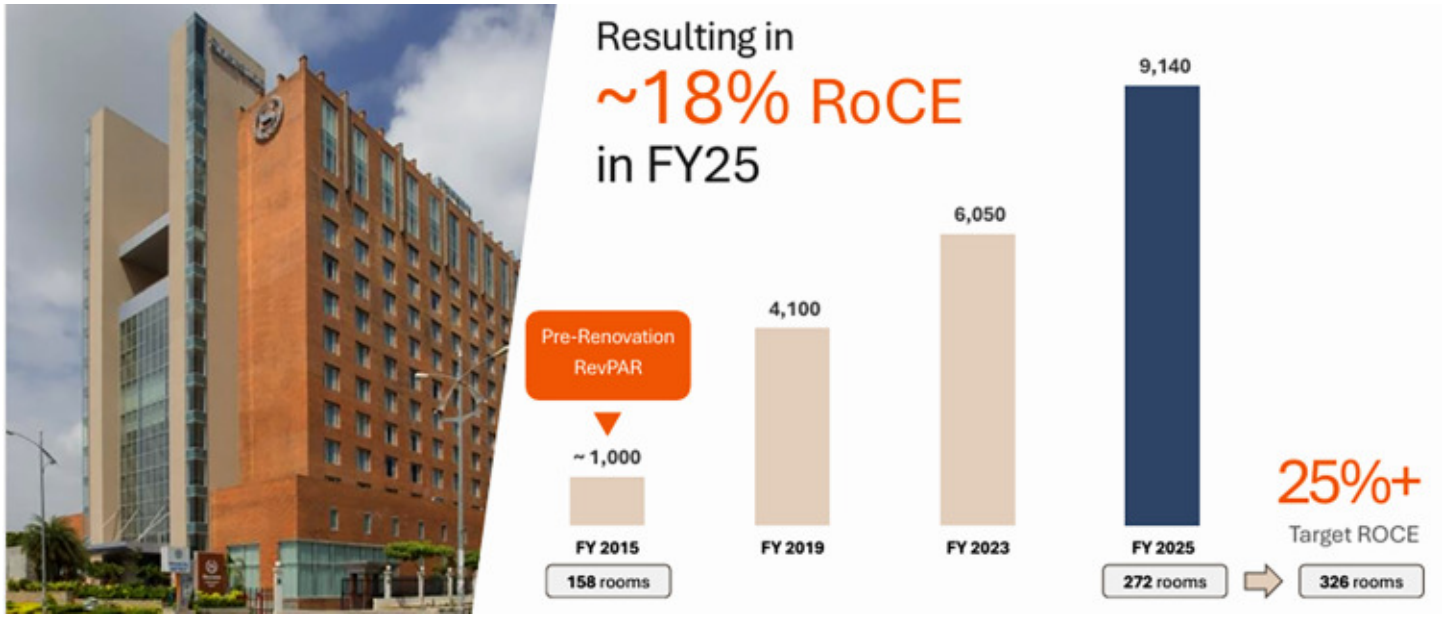
Acquisition & turnaround strategy: Unlocking value from underappreciated assets

Samhi Hotels' core strategy is focusing on acquiring and revitalizing under-appreciated hotel assets in high-potential, high-density markets, such as key business and airport corridors, rather than undertaking slow new-build development. The company targets existing properties at attractive entry valuations to minimize development risk and accelerate return on capital. By partnering with premium global brands like Marriott, Hyatt, and IHG, it implements product reconfiguration, renovation, and rebranding to reposition these assets effectively. This pragmatic acquisition model has rapidly scaled its portfolio, making it one of India's largest branded hotel ownership platforms.

The turnaround playbook utilizes product upgrades, cluster operating efficiencies, and data-driven asset management to enhance operating margins, improve guest experience, and achieve superior price positioning. These interventions leverage robust distribution and loyalty systems to significantly uplift occupancy and revenue RevPAR. The disciplined approach to making capital work more efficiently, particularly in faster-stabilizing leasehold and rebranded assets, consistently targets a high Return on Capital Employed (RoCE) in the mid-teen to +25% range, driving sustainable value for stakeholders.

Exhibit 7: Sheraton Hyderabad: A 2% yield buy in 2015 turning into 18% RoCE



Source: Investor Presentation, Antique

Upper-upscale expansion drives faster revenue growth

Upper-upscale assets benefit from India's fastest growing business regions (Bengaluru, Hyderabad, Pune, NCR). The company's upper-upscale segment currently contributes 43% room revenue and is expected to increase to ~61% by FY30. With revenue increasing from INR 4.8 bn to INR 12 bn, we believe revenue per key should improve from INR 4.5 mn to INR 6.5 mn. SAMHI's expanding upper-upscale footprint is emerging as a key driver of faster revenue growth, supported by a maturing portfolio and a strong pipeline of high-quality assets. The company is deliberately increasing its presence in premium micro-markets through brands such as Westin, W Hotels, Hyatt Regency, Sheraton, and Renaissance, which consistently deliver industry leading ARR and RevPAR. With several upgrade and expansion projects underway across Hyderabad, Pune, Bengaluru and the landmark ~700-room dual-branded Westin Fairfield development in Navi Mumbai, SAMHI is structurally raising the quality and earnings potential of its portfolio. These assets naturally command higher pricing power, deeper corporate demand, and stronger MICE traction, accelerating revenue growth beyond portfolio averages.

The company's rebranding and conversion strategy is also playing a crucial role in raising the upper-upscale revenue mix. Through targeted upgrades such as Tribute Portfolio conversion in Bengaluru and Jaipur, addition of Westin in Whitefield, and expansion of established premium hotels, SAMHI is transforming mid-scale and upper mid-scale inventory into higher-yielding categories. Management expects this shift to drive upscale and upper-upscale contribution from ~43% today to ~61% upon completion of committed projects, significantly improving blended ARR and RevPAR. This structural uplift is supported by favorable demand conditions in tier 1 office markets, where premium hotels are benefiting from strong commercial absorption, rising corporate travel, and improving event-led demand.

SAMHI currently operates 1,086 rooms in the upper-upscale & upscale segments across five hotels, including Hyatt Regency Pune, Renaissance Ahmedabad, Sheraton Hyderabad, Courtyard ORR Bangalore, and Hyatt Place Gurugram. This base is now set for a major scale-up, with the company expanding to over 2,300 rooms in this category through a robust pipeline of high-quality projects. The upcoming additions include marquee developments such as the ~700-room Westin + Fairfield dual-branded hotel in Navi Mumbai, the 170-room W Hotel in Hyderabad, the 220-room Westin in Whitefield, and multiple Tribute Portfolio conversion and upscale expansion across Pune, Bengaluru, and Hyderabad. Together, these projects more than double SAMHI's upper-upscale & upscale inventory, significantly raising the portfolio mix toward higher-yield assets and reinforcing its positioning in India's strongest commercial micro-markets.

GIC partnership accelerates upper-upscale growth

The ~INR 7,500 mn investment from GIC has become a pivotal enabler of SAMHI's upper-upscale expansion strategy, providing the company long-term equity support to grow its premium hotel platform without over-leveraging the balance sheet. Of the total infusion, INR 6,000 mn was deployed towards debt reduction, bringing down its finance costs and improving cash flows. The outcome was a lower leverage profile and increased flexibility to pursue value-accretive initiatives. This partnership allows SAMHI to channel more capital toward growth initiatives; capex, new developments, and acquisitions rather than pure consolidation, which is critical in a hospitality business marked by high fixed costs, capital intensity, and cyclical volatility. Importantly, following this infusion and strong operating performance, SAMHI's net debt stood at INR ~13.70 bn and its debt-to-EBITDA has reduced to ~2.9x as of 2QFY26. Adjusting for capital allocated towards growth projects, which is not creating any meaningful EBITDA at present, the net debt-to-EBITDA stands at 2.4x. The reduction in the interest cost has improved the company's free cash generation and gives it sufficient capacity to fund the current growth pipeline. GIC took 35% stake in the five upscale hotel properties that form the seed portfolio of the joint venture.

Furthermore, SAMHI highlighted that the earlier capital expenditure for Bengaluru and Hyderabad acquisitions were funded through GIC infusion, preserving their capital amounting to roughly INR 1.5 bn in savings on outlay in the initial 18 months. Overall, the GIC partnership has delivered three major benefits: (1) Deleveraging: large equity inflows used for debt reduction; (2) Growth capital: ability to pursue developments like W Hyderabad, Tribute rebranding, Westin Whitefield, and other pipeline assets without equity dilution; (3) Capital efficiency: GIC funding acts as a buffer while SAMHI ramps up inventory and FCF. With a de-levered balance sheet and strong equity backing from GIC, SAMHI now has far greater financial flexibility to accelerate upper-upscale additions for future premium acquisitions, while selectively evaluating upscale assets for inclusion within the GIC JV platform.

Increased market share in emerging commercial markets

SAMHI's 1,000-room pipeline expansion announced in 2Q: Dual branding & asset-light leases

SAMHI unveiled two major expansion initiatives in 2QFY26 that materially strengthen its footprint in high-growth commercial markets. The headline project is a nearly 700-room dual-branded Westin + Fairfield hotel in Navi Mumbai, marking the company's debut in the Mumbai Metropolitan Region. Phase 1 will add about 400 rooms, with scope to scale to 700, strategically positioned near the upcoming Navi Mumbai International Airport and DY Patil Stadium, and supported by new infrastructure such as the Atal Setu. With an estimated investment of ~INR 10 bn and a cost per key well below typical Mumbai replacement rates, this will be SAMHI's largest asset and a significant long-term driver of ARR and RevPAR.

The second initiative is a ~260-room mid-scale hotel in Hyderabad's Financial District, secured through a capital-efficient long-term variable lease. The lessor will construct the building structure and core services, while SAMHI funds only the interiors, keeping project cost competitive at INR 45–50 lakh per key. This addition becomes SAMHI's third property in the micro-market alongside the Sheraton and Fairfield giving it full price-segment coverage in one of India's fastest-growing office hubs. Together, these will roughly 1,000 rooms to SAMHI's pipeline and reinforces its strategy of expanding in top commercial districts through a mix of dual-brand assets and asset-light leasing.

Financial Overview

Revenue and EBITDA growth to remain strong; debt reduction on track: We expect the company to continue with the strong double digit revenue growth momentum in the near to medium term aided by expansion of its portfolio and structural tailwinds continuing to remain favorable fueled by the demand-supply imbalance, resurgent of the MICE segment, and the recovery of foreign tourist arrival. We also expect the company to witness an improvement in EBITDA margin from current levels to near 40% supported by portfolio premiumization and cost optimization. We are building in revenue and EBITDA to grow at ~15% and ~19% CAGR from FY25 to FY28, with EBITDA margin expansion of roughly 400 bps. Additionally, profits are expected to improve with the company aiming to reduce its net debt/EBITDA from 2.9x as of 2QFY26 to 1.7x by FY28 through operating leverage and capital recycling.

Revenue expected to continue growing in double digits: The company witnessed a strong revenue growth of 60% CAGR from FY21 to FY25 driven by a healthy domestic demand and the expansion of its portfolio from 3,839 keys to 4,862 keys from the ACIC acquisition. Growth was largely driven by the company's acquisition and turnaround strategy which helped it to significantly reduce the revenue conversion cycle as compared to greenfield developments. Further, we expect the company to maintain healthy double digit growth momentum over the next few years. In the medium term, we expect the company to benefit from strong structural tailwinds like favorable demand-supply imbalance, resurgent MICE segment, and the recovery of foreign tourist arrival. SAMHI aims to capitalize on these tailwinds by expanding its portfolio with the addition and upgradation of ~700 rooms from FY25–28. The upgradation of existing assets to upper-upscale segment shall drive ARR growth over the medium term, while occupancy is expected to remain stable. We are building in a revenue growth of ~15% CAGR from FY25 to FY28 aided by ~9% CAGR growth in RevPAR on same store basis and the rest from the incremental revenue earned from the addition of new inventory.

EBITDA margin expected to improve by 400 bps: The company witnessed steady improvement in its margin profile over the last few years aided by cost optimization and operational efficiencies. Further, we expect the EBITDA margin to expand by 400 bps from FY25–28 aided by: i) Increasing inventory in the upper upscale segment from 1,086 rooms to ~1,650 rooms by FY28, which operates at a higher EBITDA margin compared to other segments; ii) Lower ESOP cost; iii) Cost optimization; and iv) Lower online travel agency commission.

Debt reduction remains key priority: Samhi Hotels' net debt stands at INR 13.70 bn and net debt/EBITDA stood at 2.9x as of 2QFY26. The company is confident of funding its capital expenditure over the next few years from internal accruals and would not need to raise debt.

Valuation & Outlook

SAMHI Hotels delivered strong operating performance over the last few years driven by an increase in domestic demand post Covid-19. Further, the company's strategy to capitalize on this opportunity by rapidly expanding its portfolio through acquisitions helped it reduce the revenue conversion cycle. We believe the near to medium term outlook continues to remain favourable for the hospitality sector aided by industry wide demand supply mismatch. We are constructive of strong operating performance by SAMHI Hotels over the next few years aided by a strong pipeline and portfolio mix. We expect Samhi Hotels' revenue to grow at ~15% CAGR over FY25–28E, while the EBITDA margin should improve by 400 bps. The stock is currently trading at ~12x one-year forward EV/EBITDA versus 30x/ 19x for IHCL/ Chalet Hotels. We initiate coverage on Samhi Hotels with BUY rating and a TP of INR 260, valuing the stock at 12x FY28 EV/EBITDA which is in-line with the valuation multiple of small cap hotel companies. This implies an upside of 44% from current levels and reduce the enterprise value by a net debt and GIC JV. We value minority investment by GIC at INR6 mn per key with EBITDA margins of 40%.

Table 5: Valuation based on EV/EBITDA methodology

	EBITDA fwd	Multiple	Current Enterprise Value

Industry Overview

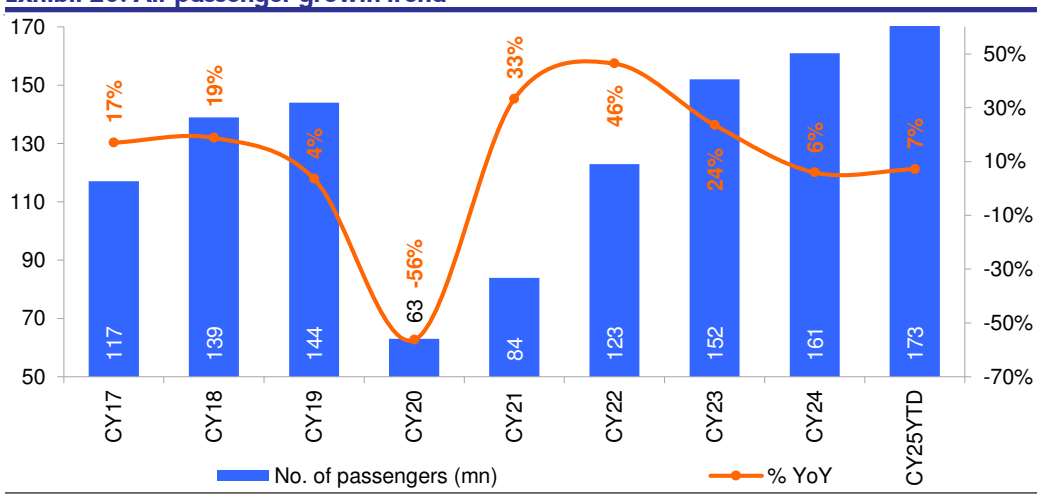
Key macro demand drivers

The Indian hospitality industry has demonstrated a remarkable recovery from the disruptions caused by the Covid-19 pandemic, benefiting from a surge in demand that has led to significant revenue growth. This revival was driven by higher economic activities resulting in strong demand for both business travel and leisure, while the supply of hotels has not kept pace. This mismatch is primarily due to factors like long development timelines, lack of sufficient equity and debt capital, and other financial constraints that slowed the addition of new hotel inventory. The Indian hospitality and tourism industry's prospects remains promising fueled by favorable government policies, infrastructure expansion, demand-supply imbalance expected to remain wide over the medium term, surge in commercial real estate absorption, increase in air passenger traffic, resurgent MICE, increase in large scale events like concerts and conferences, and the recovery of foreign tourist arrival.

Demand continues to outpace supply: As per Hotelivate report, Oct25 edition, India's hotel industry continues to benefit from a healthy demand-supply imbalance. Branded room supply remains relatively constrained and is growing at a slower pace, while strong domestic leisure travel, corporate mobility, and events are driving demand higher. As a result, occupancies have climbed to multiyear highs and pricing power has improved, supporting steady ADR and RevPAR growth. A large future pipeline exists, but its staggered rollout means demand is likely to stay ahead of supply in the near to medium term, keeping the industry fundamentals strong.

Air passenger growth and infrastructure expansion: The substantial increase in air passenger traffic in FY23 and FY24, surpassing pre-Covid-19 levels, underscores the rising demand for travel. This growth is supported by strong infrastructure development and government initiatives such as Regional Connectivity Scheme (RCS-UDAN), facilitating improved air connectivity to remote destinations, massive infrastructure investments of over INR 1.6 trn in projects like airports, roads, and railways to attract more tourists, and policy reforms such as e-visa facilities and tax incentives creating a conducive environment for investments. Indian carriers added over 150 aircrafts in 2024, accounting for 37% increase from the previous year. Further, the government aims to double the number of operational airports to 300 by FY47. This expansion will accommodate a growing number of air travelers and enhance travel experience, further fueling the demand for hotel accommodations.

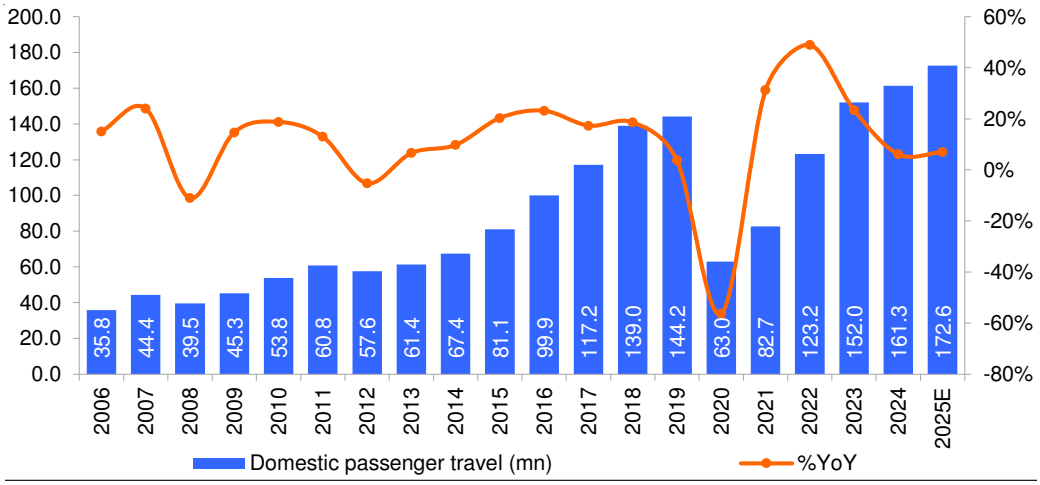
Exhibit 20: Air passenger growth trend



Source: DCGA, Antique

Domestic travel continues to remain the key growth driver: The travel and tourism industry in India is experiencing a boom, largely driven by millennials seeking unique and meaningful experiences. This demographic, with its growing disposable income, is playing a key role in driving the expansion of the hospitality sector. Moreover, MICE continue to remain strong driven by rising business travel and corporate event planning. The Indian MICE market is expected to grow at 18% CAGR to USD 10.52 bn from 2023–2030 as per Coherent Market Insights.

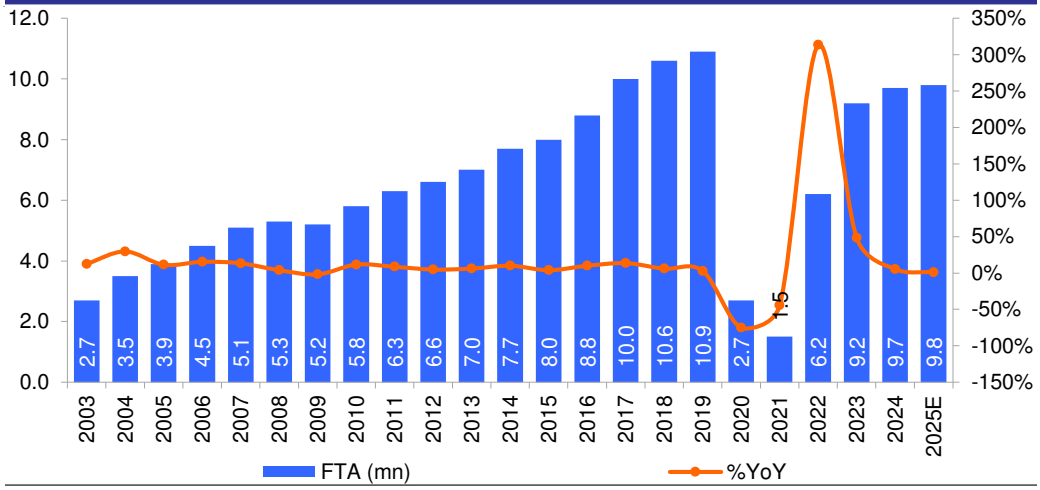
Exhibit 21: Domestic air passenger trend



Source: MoT, Antique

Recovery of foreign tourist arrivals: Foreign tourist arrival continues to remain below pre-Covid-19 levels, however, easing of travel restrictions coupled with a growing global interest in India's diverse tourism offerings is expected to gain momentum in coming years. Also, the expansion of air connectivity, enhanced tourism infrastructure, and targeted government initiatives to promote India as a key travel destination shall be vital for recovery in FTAs.

Exhibit 22: Foreign tourist arrival trend



Source: MoT, Antique

Office space absorption and business travel: Office space absorption and business travel are closely linked, as growth in one often drives demand for the other. As office leasing activity increases, especially in key business hubs, the demand for hotel accommodation also rises due to the influx of business travelers. The absorption of office space reflects economic growth and corporate expansion, which in turn drives higher business travel, as companies require more meetings, conferences, and on-site presence. This growing demand for office space and business travel contributes significantly to the hospitality sector, especially in areas near commercial centers.

Table 7: Net office space absorption (in mn sq. ft.)

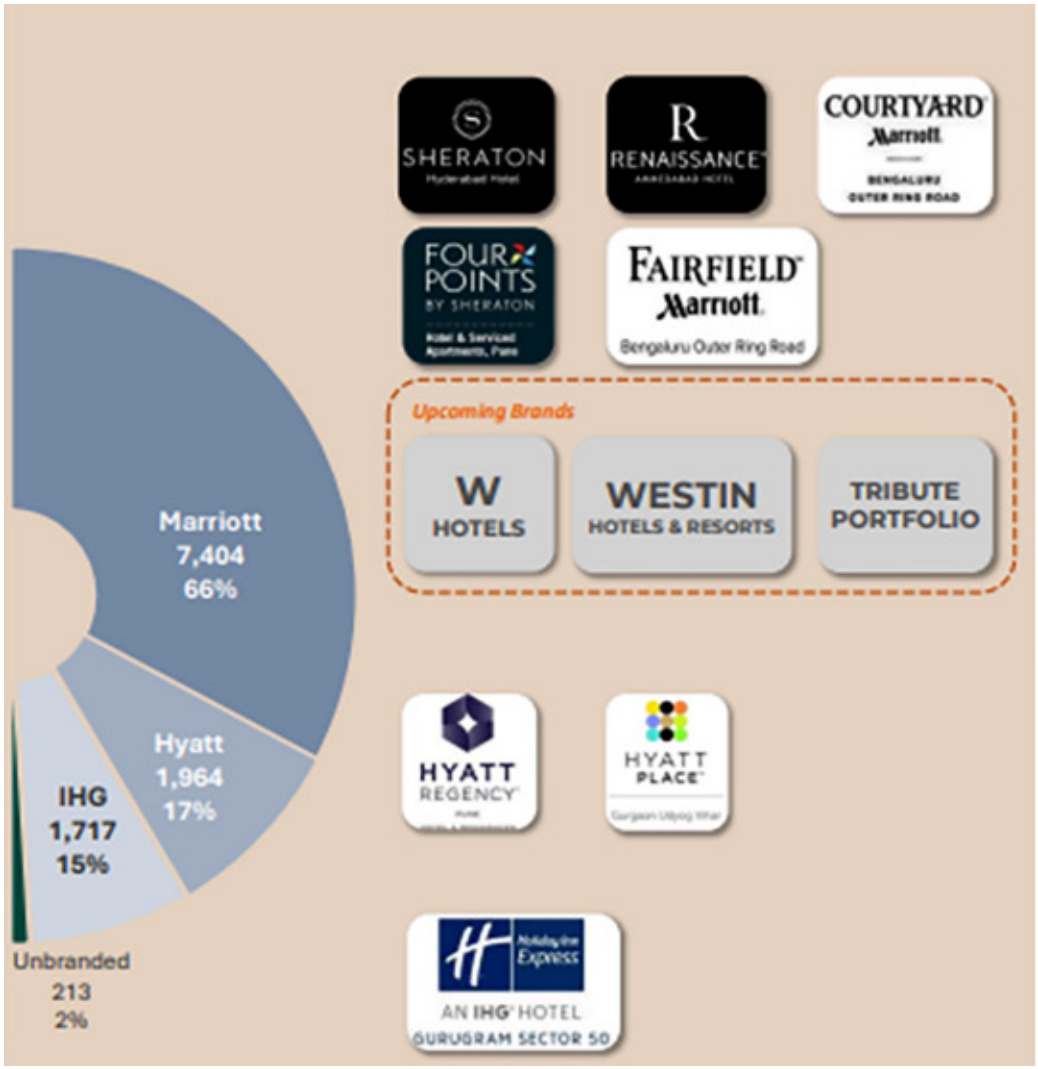
Company Background

SAMHI Hotels is a leading Indian hotel platform operating 31 hotels and 4,862 rooms across 13 major cities, managed by top international brandslike Marriott, Hyatt, and IHG under long-term agreements. These engagements benefit the company providing it access to strong operating processes, sales and distribution experience, large clientele, and loyalty programs of such hotel operators. The company has implemented an acquisition-driven strategy, supported by its history of successfully acquiring and revitalizing hotels to expand its business, making it the fastest-growing hotel ownership entity in terms of the number of keys added per calendar year. It has categorized its hotel portfolio into three distinct segments based on brand classification: Upper-Upscale and Upscale, Upper Midscale, and Midscale that operates at different price points catering to varied demand.

Exhibit 24: SAMHI's hotel portfolio



Source: Company, Antique

Asset ownership business model: The company strategized expansion of its portfolio through acquisition or leasing of existing properties to reduce the revenue conversion cycle and achieve higher revenue growth. While traditionally, hotel owning companies in India have grown predominantly through greenfield developments, SAMHI Hotels acquired a large number of hotels to rapidly scale up its operations, becoming one of the fastest growing hotel company by number of keys added per CY, compared to listed hospitality companies in India. Since its inception in 2011, SAMHI has added 450+ keys to its portfolio annually.

Strong track record of turnaround in operating performance of acquired properties: Historically, the company's acquisitions have delivered accretive returns on additional capital expenditure. This success has largely been driven by a substantial rise in average room rates following renovations and rebranding, resulting in significant growth in hotel revenue and profitability.

Presence in high-density business locations: SAMHI's Hotels are situated across 13 major cities in India, which are key urban consumption hubs, representing 70% of air passenger traffic and 90% of office space. The company has carefully selected its target cities based on strategic factors such as proximity to airports and the growth of premium office space, ensuring long-term, sustainable expansion. The hotels are strategically placed in high-density micro-markets, which are typically challenging to enter due to complex land acquisition processes, lengthy development timelines, and fragmented ownership structures. Additionally, these hotels are well connected to key transport networks and are situated near important social and residential infrastructure.

Leverage the power of globally recognized brands: Post the acquisition of an underperforming property, the company invests in renovation and upgrading the property. Subsequently, it is handed over to globally recognized hospitality brands such as Marriott, Hyatt, and IHG for operations under a long-term management agreement. The relationship with these leading hospitality brands along with premium locations and high quality of hotel properties enables it to attract a large customer base, including corporate accounts, deliver enhanced customer experience, encourage repeat business, and drive customer loyalty and thus helps Samhi generate stable revenues and a steady margin profile.

Diversified across cities, price points, and hotel operators: Samhi has diversified its hotels across cities, price points, and hotel operators, which helps mitigate the impact of market fluctuations in any of its key markets. Its multi-brand, multi-segment business model allows it to capitalize on anticipated growth across various hotel segments. The wide distribution across geographies, segments, and hotel operators diversifies its revenue streams and reduces the risks tied to reliance on any single city, segment, or operator. It has categorized the hotel portfolio into three distinct segments based on brand classification: Upper-Upscale and Upscale, Upper Midscale, and Midscale that operates at different price points catering to varied demand.

Data analytics-based approach: The company uses a data analytics-driven approach to assess acquisition opportunities, with decisions primarily based on factors such as the potential to create assets at a discount to replacement cost, anticipated hotel profitability, alignment with its existing portfolio, and the long-term outlook of the market. The company has created two proprietary systems—SAMHIIntel and SAMConnect, to leverage real-time data to improve performance, identify growth opportunities, mitigate risks, and ensure its hotels operate at optimal efficiency.

This report has been prepared by Antique Stock Broking Limited (hereinafter referred to as ASBL) to provide information about the company(ies) and/sector(s), if any, covered in the report and may be distributed by it and/or its affiliated company(ies).

ASBL is a Stock Broker having SEBI Registration No. INZ000001131 and Depository Participant having SEBI Registration No. IN-DP-721-2022(CDSL) registered with and regulated by Securities & Exchange Board of India. SEBI Registration Number: INH000001089 as per SEBI (Research Analysts) Regulations, 2014. CIN: U67120MH1994PLC079444.

ASBL and its affiliates are a full-service, integrated investment banking, investment management, brokerage and financing group.

This report is for personal information of the selected recipient/s and does not construe to be any investment, legal or taxation advice to you. This research report does not constitute an offer, invitation or inducement to invest in securities or other investments and ASBL is not soliciting any action based upon it. This report is not for public distribution and has been furnished to you solely for your general information and should not be reproduced or redistributed to any other person in any form. This report does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Before acting on any advice or recommendation in this material, investors should consider whether it is suitable for their particular circumstances and, if necessary, seek professional advice. The price and value of the investments referred to in this material and the income from them may go down as well as up, and investors may realize losses on any investments. Past performance is not a guide for future performance, future returns are not guaranteed and a loss of original capital may occur.

We and our affiliates have investment banking and other business relationships with a some companies covered by our Research Department. Our research professionals may provide input into our investment banking and other business selection processes. Investors should assume that ASBL and/or its affiliates are seeking or will seek investment banking or other business from the company or companies that are the subject of this material and that the research professionals who were involved in preparing this material may educate investors on investments in such business. The research professionals responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting information. Our research professionals are paid on the profitability of ASBL which may include earnings from investment banking and other business.

ASBL generally prohibits its analysts, persons reporting to analysts, and members of their households from maintaining a financial interest in the securities or derivatives of any companies that the analysts cover. Additionally, ASBL generally prohibits its analysts and persons reporting to analysts from serving as an officer, director, or advisory board member of any companies that the analysts cover. Our salespeople, traders, and other professionals or affiliates may provide oral or written market commentary or trading strategies to our clients that reflect opinions that are contrary to the opinions expressed herein, and our proprietary trading and investing businesses may make investment decisions that are inconsistent with the recommendations expressed herein. In reviewing these materials, you should be aware that any or all of the foregoing among other things, may give rise to real or potential conflicts of interest. ASBL and its affiliated company(ies), their directors and employees and their relatives may; (a) from time to time, have a long or short position in, act as principal in, and buy or sell the securities or derivatives thereof of companies mentioned herein. (b) be engaged in any other transaction involving such securities and earn brokerage or other compensation or act as a market maker in the financial instruments of the company(ies) discussed herein or act as an advisor or lender/borrower to such company(ies) or may have any other potential conflict of interests with respect to any recommendation and other related information and opinions.; however the same shall have no bearing whatsoever on the specific recommendations made by the analyst(s), as the recommendations made by the analyst(s) are completely independent of the views of the affiliates of ASBL even though there might exist an inherent conflict of interest in some of the stocks mentioned in the research report.

Reports based on technical and derivative analysis center on studying charts company's price movement, outstanding positions and trading volume, as opposed to focusing on a company's fundamentals and, as such, may not match with a report on a company's fundamental analysis. In addition ASBL has different business segments / Divisions with independent research separated by Chinese walls catering to different set of customers having various objectives, risk profiles, investment horizon, etc, and therefore may at times have different contrary views on stocks sectors and markets.

Unauthorized disclosure, use, dissemination or copying (either whole or partial) of this information, is prohibited. The person accessing this information specifically agrees to exempt ASBL or any of its affiliates or employees from, any and all responsibility/liability arising from such misuse and agrees not to hold ASBL or any of its affiliates or employees responsible for any such misuse and further agrees to hold ASBL or any of its affiliates or employees free and harmless from all losses, costs, damages, expenses that may be suffered by the person accessing this information due to any errors and delays. The information contained herein is based on publicly available data or other sources believed to be reliable. Any statements contained in this report attributed to a third party represent ASBL's interpretation of the data, information and/ or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. This Report is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. While we would endeavor to update the information herein on reasonable basis, ASBL and/or its affiliates are under no obligation to update the information. Also there may be regulatory, compliance, or other reasons that may prevent ASBL and/or its affiliates from doing so. ASBL or any of its affiliates or employees shall not be in any way responsible and liable for any loss or damage that may arise to any person from any inadvertent error in the information contained in this report. ASBL or any of its affiliates or employees do not provide, at any time, any express or implied warranty of any kind, regarding any matter pertaining to this report, including without limitation the implied warranties of merchantability, fitness for a particular purpose, and non-infringement. The recipients of this report should rely on their own investigations.

This report is intended for distribution to institutional investors. Recipients who are not institutional investors should seek advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents.

ASBL and it's associates may have managed or co-managed public offering of securities, may have received compensation for investment banking or merchant banking or brokerage services, may have received any compensation for products or services other than investment banking or merchant banking or brokerage services from the subject company in the past 12 months.

ASBL and it's associates have not received any compensation or other benefits from the subject company or third party in connection with the research report.

Subject Company may have been a client of ASBL or its associates during twelve months preceding the date of distribution of the research report.

ASBL and/or its affiliates and/or employees and /or relatives may have interests/positions, financial or otherwise of over 1 % at the end of the month immediately preceding the date of publication of the research in the securities mentioned in this report. To enhance transparency, ASBL has incorporated a Disclosure of Interest Statement in this document. This should, however, not be treated as endorsement of the views expressed in the report.

There are no material disciplinary action that been taken by any regulatory authority impacting equity research analysis activities.
