JJM 2.0 — Building resilient systems: The next chapter of water security

• *Introduction* • *JJM 1.0 and 2.0 overview* • *Beneficiary Companies*

Summary

- The Jal Jeevan Mission (JJM), a central government initiative to provide Functional Household Tap Connections (FHTCs) to every rural household in India under the 'Har Ghar Jal' banner, was launched in August 2019 under the Ministry of Jal Shakti. The program has since evolved with two distinct phases: JJM 1.0 (2019–2024 with Rs3.6 lakh crores outlay extended up to 2025) and JJM 2.0 (approved on March 10, 2026 with an outlay of Rs8.69 lakh crores and extended up to December 2028) - each with markedly different strategic priorities and budgetary scales.
- JJM was born out of stark reality, till 2019 i.e before JJM only 17% household had tap water connection and now it stands at 82% and with the extended allocation it enters the mission to cover last mile of unconnected rural household with ~3.5 crore households remaining concentrated in Bihar, UP, Rajasthan, and tribal geographies.
- JJM 2.0 enhanced outlay with objective of providing safe drinking water to drought prone areas with continued monitoring to prevent contamination. JJM 2.0 will also focus on data accuracy to avoid audit and procedural delays happened in 1.0 which made central government freeze the payments.
- This will positively impact the companies to get new orders and get the payment for old contracts which was frozen due to by the central government.
- JJM 1.0 rewarded pipe manufacturers and EPC players. JJM 2.0 represents a second-order opportunity for the water sector favoring pumps manufacturer, valves and flow regulators, water treatment, EPC infrastructure developers and pipe manufacturers. Company wise we believe the beneficiaries would be Shakti Pumps, Oswal pumps, Jash Engineering, VA Tech Wabag, Ion Exchange India, SPML Infra, Astral, Supreme Industries and many more.

The outlay under JJM from 2019.

Outlay	Rs Cr.
19-20A	10,030
20-21A	11,000
21-22A	63,126
22-23A	54,700
23-24A	70,000
24-25A	22,612
25-26 RE	17,000
26-27BE	67,670

JJM 1.0 vs JJM 2.0 outlay

Component	JJM 1.0 (Rs Cr)	JJM 2.0 (Rs Cr)
Central Share	2,08,000	3,59,000
Total outlay	3,60,000	8,69,000

JJM 1.0 vs JJM 2.0 beneficiaries

Category	JJM 1.0 Benefit	JJM 2.0 Benefit
Pump & Flow Control	Medium	High
Valve & Flow Regulation	Low	Medium
Water Treatment	Medium	High
EPC Infrastructure	High	Medium
Pipe Manufacturers	High	Low

01. JJM 2.0: 2026-2028 deep dive

- The Union Cabinet, chaired by Prime Minister Shree Narendra Modi, approved JJM 2.0 on March 10, 2026. The total program outlay has been massively enhanced to Rs8.69 lakh crore, with central assistance jumping from Rs2.08 lakh crore (JJM 1.0) to Rs3.59 lakh crore and an additional central contribution of Rs1.51 lakh crore.
- The FY26 annual central allocation was initially budgeted at Rs67,000 crore, later revised down to Rs17,000 crore due to audit and procedural delays. It has now been restored to ~Rs67,670 crore following the Cabinet's approval to extend the scheme.
- Tap water coverage now stands at 81.6% (i.e. 15.8 crore households connected), with ~3.5 crore households remaining concentrated in Bihar, UP, Rajasthan and tribal geographies.
- JJM is moving from infrastructure creation (laying pipes) to service delivery (ensuring water flows 24/7).
- The Govt is addressing execution challenges basically as it is not enough to just install a tap; the focus is now on water quality, electricity for pumps and long-term maintenance. This shift follows reports of irregularities in some states, leading to stricter digital monitoring and a Viksit Bharat utility-based approach

02. JJM 1.0 origins: 2019–2025 review

Launched on August 15, 2019, by the Prime Minister, JJM set out to provide safe and adequate drinking water through individual household tap connections to all 19.36 crore rural households by 2024. At launch, only 3.23 crore households (16.8%) had tap water connections.

Key objectives of JJM 1.0

- Provide functional FHTCs to every rural household — target of 19 crore connections
- Prioritise coverage in quality-affected areas (fluoride & arsenic contamination), drought-prone, desert and JE-AES affected regions
- Ensure functional tap water in schools, Anganwadi centres, Gram Panchayat buildings, health and wellness centres.
- Monitor functionality of tap connections and maintain service levels
- Promote community ownership through voluntary contributions in cash, kind or labour (Shramdaan)
- Integrate with Swachh Bharat Mission, MGNREGS and other convergent schemes

JJM 1.0 achievements

JJM 1.0 was transformative by any metric. Starting from a low base of 17% coverage in 2019, the program rapidly scaled up:

- 12.56 crore additional rural households provided with tap water connections
- 15.80 crore households (81.61%) now have tap water — up from 3.23 crore (17%) at launch
- 11 States/UTs achieved 100% 'Har Ghar Jal' status: Goa, Telangana, Gujarat, Haryana, Punjab, Himachal Pradesh, Mizoram, Arunachal Pradesh, Puducherry, A&N Islands and DNH & DD.
- 191 districts, 1,923 blocks and over 2 lakh+ villages declared 'Har Ghar Jal'

03. March 2026 cabinet decision — What has changed?

On March 10, 2026, the Union Cabinet approved the restructuring and extension of JJM as **'Jal Jeevan Mission 2.0'**. The decision marks a qualitative shift from connection-centric to service-centric delivery.

Key changes at a glance

Parameter	JJM 1.0 (2019–2025)	JJM 2.0 (2026–2028)
Launch Date	August 15, 2019	March 10, 2026
Deadline	Originally 2024, extended to 2025	December 2028
Total Outlay	Rs3.60 lakh crore (central: Rs 2.08 lakh crore)	Rs8.69 lakh crore (central: Rs3.59 lakh crore)
FY25-26 Budget	Rs70,163 crore (BE 2024-25)	Rs67,000 crore
Core Focus	Infrastructure creation & pipe laying	Service delivery, digital governance & sustainability

Source: company, Ashika Institutional Research

What's new in JJM 2.0?

- Cover the remaining 3.56 crore rural households without tap connections — achieving 100% coverage across all 19.36 crore rural households by December 2028
- Shift from infrastructure-centric to citizen-centric, utility-based service delivery — reliable 24×7 piped water supply
- Launch 'Sujalam Bharat', a national digital framework that assigns each village a unique Sujal Gaon/Service Area ID, digitally mapping the complete water supply chain from source to tap
- Introduce 'Jal Arpan' — formal handover and certification mechanism requiring Gram Panchayats to confirm adequate O&M systems before declaring 'Har Ghar Jal' status
- Promote 'Jal Utsav' — an annual community-led maintenance and review event
- Sign separate MoUs with all states and UTs to enforce adherence to timelines and sustainability norms
- Align with Viksit Bharat@2047 vision for long-term water security and quality
- Strengthening governance mechanisms, water quality monitoring and source sustainability

Revised financial outlay

Component	JJM 1.0 (Rs Cr)	JJM 2.0 (Rs Cr)	Change
Central share	2,08,000	3,59,000	+72%
Total outlay	3,60,000	8,69,000	+141%

Source: company, Ashika Institutional Research

> *The 141% increase in total outlay signals that JJM 2.0 is not an extension — it is a new, more ambitious program built on the infrastructure of the first phase.*

04. Companies that benefited from JJM 1.0 & stock price reaction

The Rs3.6 lakh crore spend of JJM 1.0 created a massive demand wave across the water infrastructure value chain. Below is an analysis of key beneficiary companies from JJM 1.0 and how their stocks reacted to JJM-related announcements.

Company	Sector	JJM 1.0 Benefit & Stock Reaction
SPML Infra	Water EPC	Major EPC contractor executing multiple rural drinking water and pipeline projects under JJM across states like Rajasthan and UP; strong JJM order inflows drove revenue growth and the stock rallied **~1114% during the JJM rollout period 2021–2025.**
Kalpataru Projects International	Infrastructure EPC	Secured significant water supply and pipeline EPC projects under rural water infrastructure programs aligned with JJM; water segment expansion supported stock re-rating with the share price rising **~191% during the JJM implementation phase**.
KEC International	Infrastructure EPC	Built a sizable water EPC order book through government rural water supply schemes, including JJM projects; improved infrastructure visibility contributed to stock appreciation of **~100% during 2021–2025.**
NCC Limited	Infrastructure EPC	Executed multiple water supply and irrigation EPC projects under state government rural drinking water schemes linked to JJM; water infrastructure growth supported a **~180% stock rise during the mission rollout period.**
Welspun Corp	Steel Pipes	Supplied large-diameter steel pipes used in water transmission pipelines for national water infrastructure programs, including JJM; strong pipe demand supported a **~480% stock surge during 2021–2025**.
Jindal SAW	Ductile Iron Pipes	One of the key suppliers of ductile iron pipes used in rural drinking water pipeline networks under JJM projects; demand from water infrastructure drove **~540% stock growth during 2021–2025.**
Ion Exchange (India)	Water Treatment	Benefited from municipal water treatment and supply infrastructure projects associated with government drinking water schemes, including JJM; strong water infrastructure cycle supported a **~360% stock rally during the JJM period.**
Jash Engineering	Water Control Equipment	Supplies gates, valves and screening systems used in water treatment plants and pipeline networks; increased government spending on water infrastructure benefitted from improved industry demand saw **~910% stock increase during 2021–2025.**
Va Tech Wabag	Water Treatment	Develops and operates municipal and industrial water and wastewater treatment plants, including desalination and recycling systems; increased government spending on water infrastructure and rising demand for wastewater recycling solutions supported industry growth, with the **stock rising ~575% during 2021–2025**.

05. Companies positioned to benefit from JJM 2.0

JJM 2.0 represents a Rs8.69 lakh crore program with a fundamentally different character from JJM 1.0. The shift from infrastructure creation to service delivery, digital monitoring and sustainability opens new beneficiary categories while maintaining demand for traditional players.

CATEGORY 1 — Pump & Flow Control Companies | Benefit Rating: ★★★★★ HIGH

Why pumps matter under JJM 2.0

JJM 2.0 shifts the focus from pipe laying to ensuring that water reliably reaches the designated households. This demands continuous pumping infrastructure at every stage of the distribution chain.

Why water needs pumping	Impact on demand	Type of demand
Water must be lifted from reservoirs to overhead storage tanks at village level	Higher orders for centrifugal pumps and submersible pumps	New capex for 3.56 cr remaining HH connections
Pressure must be maintained across large rural distribution networks (often spanning 10–50 km)	Replacement demand for maintenance and efficiency upgrades	Recurring O&M capex — multi-year demand
Systems need 24x7 continuous pumping and automated monitoring under Sujalam Bharat	Long-term O&M contracts — utility model creates annuity-type revenue streams	O&M contracts (annuity revenue)

Source: company, Ashika Institutional Research

Company	Pump type	JJM 2.0 positioning
Shakti Pumps	Solar submersible pumps	Solar pumps for rural water systems align with both JJM 2.0 and PM-KUSUM 2.0. Surged +7.8% on March 11, 2026.
Kirloskar Brothers	Centrifugal, submersible	Legacy pump manufacturer; strong track record in government water supply schemes. Rural infrastructure pump specialist. +1.2% on March 11.
Oswal Pumps	Solar submersible pumps	Solar pumps for rural water systems align with both JJM 2.0 and PM-KUSUM 2.0. Surged +7.8% on March 11, 2026

Source: company, Ashika Institutional Research

CATEGORY 2 — Water Treatment Companies | Benefit Rating: ★★★★ HIGH (More Recurring Demand)

JJM 2.0's focus on water quality and service reliability, not just connection count makes treatment plants and quality monitoring essential.

What JJM 2.0 demands	Type of infrastructure	Revenue model	vs JJM 1.0
More water treatment plants in quality-affected areas	Surface water treatment plants (SWTPs), desalination units	New capex contracts	Significantly higher priority than JJM 1.0
Filtration systems for contaminated groundwater regions	Reverse osmosis plants, filtration units	Equipment supply + commissioning	New demand category
Automation and real-time monitoring (Sujalam Bharat)	SCADA, IoT sensors, telemetry systems	Recurring monitoring contracts	Entirely new under JJM 2.0
O&M contracts for existing and new treatment plants	Long-term operation & maintenance	Annuity / Recurring revenue	Strong structural upgrade vs JJM 1.0

Source: company, Ashika Institutional Research

Company	Specialization	JJM 2.0 positioning
VA Tech Wabag	Water & wastewater treatment (global)	Global leader with proven municipal water treatment capability. JJM 2.0 quality focus may make Wabag a beneficiary. Price increased 4.5% on March 11, 2026.
Ion Exchange (India)	Purification, RO, desalination	Water purification technology for quality-affected regions Price increased 6.9% on March 11, 2026.

Source: company, Ashika Institutional Research

CATEGORY 3 — Valve & Flow Regulation Companies | Benefit Rating: ★★★ Medium (Structural Tailwind)

Water flow control requires precision pressure regulation and leak control throughout the distribution chain. This depends on valves, gates and flow control systems, a high-margin niche segment. As JJM 2.0 targets service reliability, valve quality becomes critical.

Products in demand	Where they are used	Why high margins
Sluice gates, butterfly valves, control valves, penstocks	Water treatment plants, overhead reservoirs, distribution pipelines	Specialised engineering products — not commodity. High switching costs once installed.
Pressure reducing valves (PRVs), flow meters, air release valves	Branch lines and last-mile household connections in rural networks	O&M model creates recurring replacement and calibration demand

Source: company, Ashika Institutional Research

Company	Product focus	JJM 2.0 positioning
Jash Engineering	Sluice gates, butterfly valves, penstocks, screens	Though indirect beneficiary in JJM 1.0 should benefit more in JJM 2.0. Price surged 4.2% on march 11,2026

Source: company, Ashika Institutional Research

CATEGORY 4 — EPC Infrastructure Companies | Benefit Rating: ★★ MODERATE (Lower than JJM 1.0)

Construction companies were the biggest beneficiaries of JJM 1.0 because massive pipeline networks were built from scratch. Under JJM 2.0, the core infrastructure is already in place across many states; benefit exists but growth slows compared to Phase 1. Key additional tailwind: release of pending JJM 1.0 dues will ease payment cycles for affected EPC contractors.

JJM 2.0 opportunity	Constraints vs JJM 1.0	Additional tailwind
New projects in states still at low coverage (Bihar, MP, Rajasthan)	Core pipeline networks already built in 11 states with 100% coverage	Release of frozen JJM 1.0 dues eases working capital stress
O&M infrastructure upgrades and treatment plant construction	Reduced greenfield pipeline work reduces large-EPC ticket sizes	New MoU mechanism with states should improve payment timelines

Source: company, Ashika Institutional Research

Company	EPC segment	JJM 2.0 positioning
NCC Limited	Diversified infrastructure EPC	Incremental beneficiary for water infrastructure project execution in lagging states. Price increased +2.8% on March 11, 2026
KEC International	Water utility networks, power + infra	Existing Rs 1,400 cr JJM order book; Rs 800 cr outstanding. Strong pipeline for JJM 2.0 water utility network projects. Price increased +1.6% on March 11, 2026
Larsen & Toubro	Large-scale water infra EPC	L&T's Water & Effluent Treatment division is among the largest EPC players in Indian water infrastructure. Well-positioned for large state-level JJM 2.0 contracts.

Source: company, Ashika Institutional Research

CATEGORY 5 — Pipe Manufacturers | Benefit Rating: ★★ Moderate (Incremental vs Phase 1)

In JJM 1.0, pipes were the single biggest beneficiary category — millions of kilometres of pipelines were required from scratch. In JJM 2.0, the core pipeline backbone is largely in place. Some additional demand exists for last-mile distribution to the remaining 3.56 crore households and replacement of ageing pipes, but the scale is significantly lower.

Source of demand (JJM 2.0)	vs JJM 1.0	Pipe type needed
Last-mile connections for 3.56 crore remaining households	Significantly lower — bulk of backbone already laid	uPVC, HDPE distribution pipes (smaller diameter)
Replacement of ageing or damaged JJM 1.0 infrastructure	New demand category not present in Phase 1	Same pipe grades as original installation
New treatment plant and water storage infrastructure	Smaller volume, higher value DI and steel pipes	Ductile iron (DI), steel pipes for treatment plants

Source: company, Ashika Institutional Research

Company	Pipe type	JJM 2.0 positioning
Astral Limited	CPVC, uPVC, HDPE	O&M phase creates pipe replacement and upgrade demand. Price increased +5.2% on March 11, 2026
Supreme Industries	PVC, CPVC, structured winding	Last-mile distribution pipe demand from 3.56 cr remaining HH connections. Price increased +2.6% on March 11, 2026
Welspun Corp	Ductile iron Pipe	Demand for water treatment plants. Price increased +2.6% on March 11, 2026
Prince Pipes & Fittings	CPVC, uPVC, HDPE	Strong rural channel. benefit from JJM 2.0 last-mile demand in FY27-28. Price increased +5.4% on March 11, 2026.

Source: company, Ashika Institutional Research

Key summary

Category	JJM 1.0 Benefit	JJM 2.0 Benefit	Key reason for change
Pump & Flow Control	Medium	High	Service delivery focus demands 24x7 pumping; O&M model creates recurring revenue
Valve & Flow Regulation	Low	Medium	Reliability and leak prevention becomes critical; structural tailwind in high-margin niche
Water Treatment	Medium	High	Quality focus is core to JJM 2.0; more plants, monitoring and O&M contracts
EPC Infrastructure	High	Medium	Core pipelines already built in many states; growth slows vs Phase 1; payment cycle normalisation is key catalyst
Pipe Manufacturers	High	Low	Backbone laid; only last-mile and replacement demand. Significantly lower volume vs JJM 1.0
