Sales Patch

Of Indingo, Making my trips, Hoteling in India, and more… - Arun Kapoor

What a mess this Indingo fiasco… sorry, **Indigo**.. but Indingo sounds better. Let's stick with it.

-Firsthand experience – really $#^&^%@%#. Indingo tried their best to ding my folks' 40th anniversary celebrations at Goa.. but we maneuvered (pun intended).

-Had to fly back a red-eye on Spicejet (no less!). Folks are **currently (as I write this!)** doing a **7 hour layover** at Jaipur – on a rescheduled Indingo connection flight – enroute back to Dehradun today (vs a **3 hour layover** at Delhi planned earlier)!

-Why are my folks taking Indingo still? Hint – it is an eight letter word, that is also a famous board game. No prizes for guessing though.
Monopoly. Ok fine, near monopoly.

Speaking of monopoly, the acronym **HHI** has successfully joined India's lexicon in the last few days. I think the last acronym that managed to do this was WFH. Ok, maybe I am exaggerating a bit. But the point holds.

-Frankly, I could never get around the full form – Herfindahl-Hirschman Index. Tough pronunciation. The Index's calculation is rather straightforward though – just sum up the market shares of all competitors. Closer to 100 squared, the sector is closer to monopoly.

-Anyway, Indian aviation sector HHI is nearly (if not more than) 5000, thanks to >65% market share of Indingo. The sector is a monopolized one..

.. and now even the common people know this is due to high HHI! For example, Indian Express article, Business Standard article.

What does all this mean? **Bottomline** – this Indingo mess is now a political issue.

-The first concrete slap has come in form of DGCA reducing Indingo's routes by 10%, and reallocation to other airlines. See this Routes cut by 10%. More slaps will follow.

-There is a lot of debate around Indingo too. Is it too big to fail? There is apathy too – will Indingo get away with it?

-Whichever way it goes, what I can assure you is that the company will be under constant scrutiny hereon. Its growth is gone.

*-P.S. I have covered / owned both the spaces in my previous fund in past – albeit in **GEMs / China & LatAm (owned Ctrip, Huazhu, Despegar – covered a much larger bulk)**.*
*-P.P.S. I own **AirBNB** in personal capacity even today.*
-P.P.P.S. I have never owned an airline stock – in fund, or personally.

-Fair to say that I have both lost money and made money in these 2 spaces. Over the last 7 years of looking at global travel though, I do feel that I have some understanding of the sectors.

How do I value?

Simplistically, I find that a valuation multiple accounting for sector growth over market averages, combined with EPS / operating profit, is a good enough way to value **broad-based dominant travel plays** such as both Makemytrip and Indian Hotels.

-P.S. Of course, definitely do sanity checks vs peers & history, and do add nuances like a premium for Indian Hotels given its relatively more consistent ROCE delivery, at mid-high teens in the last 3 years.

-P.P.S. In OTAs, **hotel inventory command (and assortment)** brings better margins. As that **mix of "owned" inventory goes up, so does the operating margin**. **Operating leverage** for the overall OTA, however, from other adjacencies **is very hard to get, scale, and sustain**. I wouldn't build it in my model, and instead focus on the basic revenue streams and the mix going forward.

Now, India's Travel & Tourism is set to grow early-mid teens over the next few years (ample sources – just search!). Nominal GDP on the other hand is seeing a high single digit growth.

-Thought this way, I am ok to assign a 1.5-2.0x multiplier on market multiples (~20x P/E) for broad-based leadership / dominant travel plays. I am ok to give top-end of this range to Indian Hotels given ROCE consistency, and lower-end to Makemytrip.

-Indian Hotels can do low-mid teens growth, while Makemytrip can continue to sustain high-teens to 20% growth.

-Given this setup, for FY28 #s the former can do ~₹28bn PAT (at ~21% Net Margin), while latter can deliver ~$290mn PAT (at ~17% Net Margin).

-Meaning.. ~9% upside for Indian Hotels, and ~27% upside for Makemytrip – on these back of the envelope estimates.

So.. If I were long Indingo, even now, I will sell it, and with the proceeds..

.. I would buy Makemytrip here. I will also buy Indian Hotels here, despite low upside on my dumdum estimates.

I would build up both these positions.

Sales Trading Patch

Nifty dropped 50bps this week while the Midcaps and Smallcaps fell 1.2% and 2.1% respectively.

The week begun with an aggressively sell off in mid and smallcaps which triggered a further dip due to margin calls getting triggered. The reason for the sell-off was attributed to money being raised for blocks and ipos, stop losses getting triggered, year-end pruning of positions and SEBI's new MTF rules.

+ higher margin norms started biting from Nov-Dec.

SWIGGY launched a $1.1bn QIP mid week.
MEESHO IPO listed mid-week. Issue price 111. CMP 162

US-India Trade Talks:
-US negotiators stated that the US has received its "best ever" offer from India, signalling progress despite challenges. They acknowledged India's strong resistance to importing American agricultural products due to concerns about protecting small farmers.

-India-US trade talks remain in focus after President Trump's call with PM Modi. Negotiators are working toward resolving differences on a trade agreement.

INR makes new life low. RBI balancing intervention without draining liquidity.

*** National Pension Scheme (NPS) Guidelines:**
India's pension regulator has broadened investment norms, allowing deeper participation in equities (NIFTY 250 / BSE 250) and alternative assets.
- This could boost structural flows into the broader markets over time especially with many names trading below or near their yearly lows.

India Equity Derivatives Pre-Open | All About It
- Pre-open price discovery session is extended to Equity Derivatives segment starting today
- It will function exactly like the cash segment
- It will be offered in current month contracts in stock as well as index futures (next month contracts during last 5 days of expiry)
- Both Limit and market order are allowed
- How does it help?
- Since more participants will participate & volumes will be relatively higher, price discovery will be much more accurate

Best Charts of X – Marc Saliba

The SOX is leading the S&P500 again as the AI bulls have taken back control.

INFOSYS: AI Lab Visit and Management Meeting

We met with Infosys' (INFY) Chief Delivery Officer (CDO), Mr Satish H.C., and Chief Technology Officer (CTO), Mr Rafee Tarafdar, and visited INFY's AI lab at its headquarters in Bangalore along with a campus tour.

- They have seen higher adoption of AI in 2025 over 2023/24, but ROIs are still evolving. They are also seeing significant adoption of AI in services delivery, with no major challenges in scaling it up, leading to step changes in revenue per employee (RPE).
- They see both revenue deflation from AI as well as multiple growth avenues - launching AI agents, SLMs/MLMs and scaling up FDEs.
- INFY believes an SI must become an orchestrator of all the technology platforms out there.
- It also expects every enterprise in the next 2-5 years will require multiple small language models (SLMs) and micro language models (MLMs), where the SI's role to create and integrate them with LLMs would be paramount.

COFORGE: Disrupt to Outperform

During Coforge's analyst meeting it stressed multiple whitespaces (geographies, industry verticals and tech partners) to maintain industry leading growth with a >14% EBIT margin, >70% FCF/PAT and a continued focus on strategic M&A.

- Coforge highlighted the ANZ market and ServiceNow (where they already have a presence) as key areas ahead.
- Within the US it wants to increase exposure to the western region where they currently work with just 16 F1,000 clients, out of 216 headquartered in the region.
- West US currently contributes only 14% of Coforge US revenues while 70% comes from east and south. New industry verticals it is targeting include retail/CPG, healthcare, life sciences, manufacturing and UK public markets.

Figure 1

Highlights of the Coforge Quasar AI platform

Source: CLSA, Coforge

Figure 3

GenAI commentary

Company	1QFY26	2QFY26
Coforge	1 – Seeing AI budgets to be expanding at double digit rates, with AI driving innovation and competitive advantage. 2 – Delivered over 35% improvement in operational efficiency using Gen AI in the insurance vertical 3 – In the BFSI verticals, core modernisation is gaining momentum and helping banks to move from AI experimentation towards enterprise scale adoption.	1 - There is clear non-linearity between revenue and headcount growth. Revenue per employee for tech services is nudging towards US$70,000/employee, which is due to the use of AI-led platforms. 2 - Moving enterprises from AI pilots to full scale AI implementation 3 - Deep industry knowledge with great technical knowhow will lead Coforge to implement AI solutions.

Source: CLSA, Companies

DIXON: Concerns Overdone

Dixon's stock has corrected 17% over the past month, mainly on concerns regarding potential cuts to its FY27 EPS.

- Firstly, it is still awaiting Press Note 3 (PN3) approval for its Vivo JV, which is expected to contribute 20mn units to smartphone volumes out of 58 / 64mn (CLe) in FY27/28CL.
- Given that it is a 51 / 49 JV, assuming a small proportion of this volumes materialise in FY28, we anticipate 13%/7% EPS impact in FY27/28.
- Secondly, Dixon is yet to secure approvals for establishing components facilities under the ECMS scheme.
- A third concern is low visibility on medium term growth prospects, post saturation of the smart phone market share.
- Our scenario analysis indicates that if Dixon loses 20 / 14mn volumes in FY27/28, PAT impact could be 13% / 7% (given 51% stake in the JV). On these numbers, the stock is trading at 44X Sept-27 EPS, which we think more than factors in the concerns.

Figure 1

Dixon – scenario analysis

Base case - Rs mn	FY27	FY28	Rs mn	FY27	FY28

Important disclosures

Recommendation history of Dixon Technologies India Ltd DIXON IN

NHPC: Once in 25-year event

We remain confident NHPC is set to start commissioning of its SL HEP in Dec 2025, following our visit. NHPC started reservoir filling on 10 Oct. Start of turbine no.2 last week sets the zero date for all eight turbines to be commissioned by Sep 2026 vs Jun 2026 earlier, driving our 5.9% EPS cut in FY27.

- SL HEP, marred by geo-political surprises, took NHPC 25-years to build versus the seven years planned.
- The start of the SL HEP should add 13% capacity but boost regulated equity 26% in FY27.
- We forecast REE (ex-minority) growth of 19% over FY25-30CL against 2% growth over the past five years.
- Apart from hydropower being the lowest GHG emission power and savior of India's grid during non-solar peak demand hours (read Water battery), NHPC's release of E flow protects life under water.

HONASA: Acquisition of Reginald Men

Honasa announced today its acquisition of a 95% stake in BTM Ventures Private Limited, the parent entity of Reginald Men, via a secondary purchase on a no-cash no-debt basis. The acquisition was completed at an enterprise value of Rs1.95bn, or 10.9x and 2.6x implied trailing 12-month EV/Ebitda and EV/revenue multiples.

- Reginald Men offers curated premium men's personal care products with sunscreen its core offering. Its Helios Moisturizing Sunscreen is the no.1 most searched sunscreen for men on Google in India.
- Founded in august 2022 and with over 80% of its sales coming from south India, Reginald Men has quickly gained traction with TTM turnover (ending Oct 2025) of Rs740m versus Rs201.5m in FY25.
- Longer term, Honasa believes the brand can scale to over Rs.5bn in revenue via category, channel and geographical expansion.

India Telecoms: Booming 5G subscribers

Reliance Jio and Bharti Airtel 5G services ramp-up have enabled duo add combined 401m 5G mobile subscribers and 3ppt revenue market share to 81% since launch. India 5G mobile penetration is already 42% of mobile data subscribers even as Bharti and RJio 5G tariff are at ~17% premium to 4G rates.

- Reliance Jio (RJio) with 5G SA (standalone) and Bharti Airtel (Bharti) with 5G NSA (nonstandalone/being upgraded to 5G SA in phases) networks continue to ramp-up 5G mobile subscribers after pan India 5G services roll-out since Dec23 and Mar-24.
- RJio's 5G subscribers have reached 234m which is 46% of own 506m total subscribers. Bharti 5G subs are at 58% of own 289m data subs and 46% of own 364m mobile subs.
- While India data subs at 951m have grown by 85m since duo did pan India 5G rollouts and with India's 1170m mobile subs (1094m active) sector data penetration is at 81%.
- Following RJio and Bharti's 5G subs amass to 401m Vodafone Idea (VIdea) has only in 2QFY26 expanded 5G services rollout across 17 circles where it has 5G spectrum.

India Economics: FY27 sales/PAT growth expected to pick up

Based on results of 3,200 listed companies, our analysis reveals that:

1) sales growth remained muted in 1HFY26, though slower growth in expenses pushed operating profits higher.
2) PAT of listed companies stayed high in 1HFY26
3) interest coverage ratio was at its peak for the third straight quarter in 2QFY26
4) large companies retained market share gains in 1HFY26, and small companies turned profitable for the first time in 14 years
5) with higher WPI-inflation expected in FY27CL, sales, and thus, PAT growth, should pick up next year.

Figure 1

Sales and expenses growth remain muted in 1HFY26

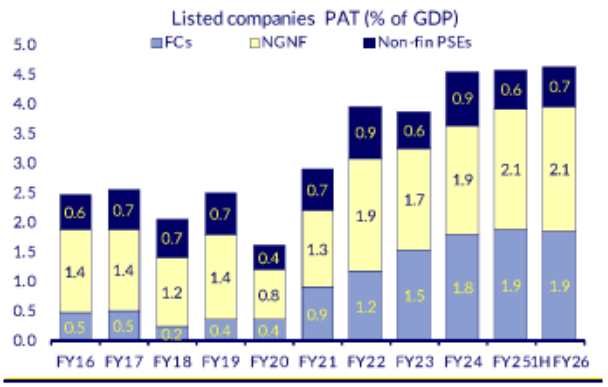
Figure 6

...and remains broad-based in 1HFY26



Source: RBI, Capitaline, CSO, CLSA. Note: For a common sample of 3,200 listed companies, including financial (455), and non-financial PSEs (67)

India Capex Tracker: Corporate capex weakened further in 1HFY26

India's total nominal investments grew 7.7% YoY in 1HFY26 vs 8.8% GDP growth, and thus, investment-to-GDP ratio dipped further in 1HFY26, though it remains higher than pre-pandemic level.

- If India's economy has to grow faster on a sustainable basis, corporate capex holds the key. Our in-house estimates suggest that the wait gets longer.
- Govt capex grew strongly by 20.2% YoY in 1HFY26, led by the centre (up 28.5%), with 10.2% growth in household investments and only 3% YoY growth in corporate capex.
- The share of the corporate sector is down to 43.7% of total investments in 1HFY26 vs. >50% in the pre-pandemic period.

Figure 1

India's investment rate stable at 33.6% of GDP in 1HFY26...

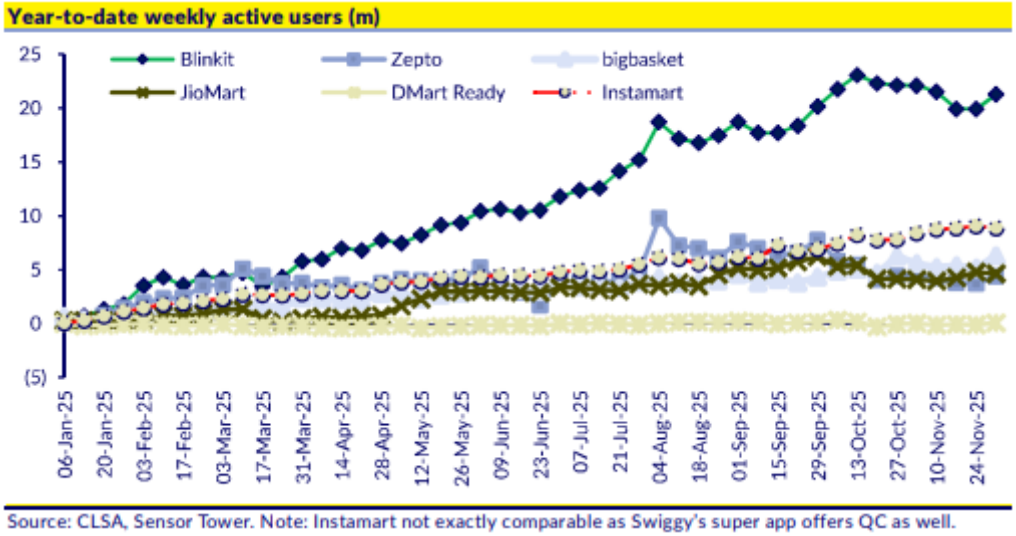
India Consumer: Large and Efficient

For the week ending 1 December (numbers restated), within quick commerce (QC), Blinkit saw the highest week on week (WoW) WAU increase of 1.4m, slightly short of all other major players combined (+1.6m).

- Zepto saw a 0.7m increase, while Swiggy Instamart saw a decline of 0.2m WAU WoW.
- We also analyse the latest weekly users to all-time download ratio. Blinkit's WAU to download ratio stands at 24% versus Zepto/Instamart at 22%/17%
- Lastly, daily active user (DAU) data shows further recovery as Blinkit's DAUs are up 8% for 4-7 December versus the preceding three days.
- Within food delivery, Zomato was flattish while Swiggy saw a 0.7m decline WoW. Nykaa's WAU declined 3.6m WoW as the Pink Friday sale ended.
- Within ecommerce, Flipkart had a strong week while others were stable.



Source: CLSA, Sensor Tower. Note: Instamart not exactly comparable as Swiggy's super app offers QC as well.

Figure 1

This document is for general information of the intended recipient and may contain information which is confidential, privileged or subject to copyright. This document is not a solicitation or any offer to buy or sell. This document was written by a sales/trading persons(s) and not an analyst. It does not constitute research, nor should it be interpreted as such, and is not intended to provide any tax, finance, investment, legal or any other type of professional advice or recommendation. The views contained in this document are the sales/trading person's personal views which may or may not differ from the official views and interest of CLSA group of companies ("CLSA"). Such personal views may differ from the opinions expressed by other divisions of CLSA including our investment research department. The views expressed and the information, including but not limited to, analysis, tables, summary, performance, patterns and observations expressed in the report are general information based on information that was collected using one or more of the following: consensus data, independent information source and information provided by CLSA. Although care was taken as to the veracity of such information CLSA and its staff does not guarantee and make no representation or warranty as to its accuracy, completeness or correctness. CLSA and its staff does not undertake any obligation to update the material in this document. You should make your own independent evaluation of the relevance and adequacy of the information contained in this document and make such other investigations as you deem necessary, including obtaining independent financial, investment, legal, and/or tax advice. This document does not provide all detail or significant information. Any opinions or estimates herein reflect the judgment of CLSA at the date of this communication and are subject to change at any time without notice. This document is subject to and incorporates the terms and conditions of use set out on the www.clsa.com/disclaimer.html, and neither the report nor any portion hereof may be reprinted, sold, resold, copied, reproduced, distributed, redistributed, published, republished, displayed, posted or transmitted in any form or media or by any means without the written consent of CLSA. CLSA has produced this document for private circulation to professional, institutional and/or wholesale clients only. The information, opinions and estimates herein are not directed at, or intended for distribution to or use by, any person or entity in any jurisdiction where doing so would be contrary to law or regulation or which would subject CLSA to any additional registration or licensing requirement within such jurisdiction. CLSA does not accept any responsibility and cannot be held liable for any person's use of or reliance on the information and opinions contained herein. To the extent permitted by applicable securities laws and regulations, CLSA accepts no liability whatsoever for any direct or consequential loss arising from the use of this document or its contents. If you receive this document and are not the intended recipient, please contact the sender or postmaster@clsa.com immediately.

China Hong Kong: This document is distributed by CLSA Limited. This document is distributed in Hong Kong only to professional investors (as defined in the Securities and Futures Ordinance (Chapter 571 of the Laws of Hong Kong) and any rules promulgated thereunder) and may not be distributed to retail investors. Recipients should contact CLSA Limited, Tel: +852 2600 8888 in respect of any matters arising from, or in connection with, the analysis or report.

Australia: CLSA Australia Pty Ltd ("CAPL") (ABN 53 139 992 331/AFS License No: 350159) is regulated by the Australian Securities and Investments Commission ("ASIC") and is a Market Participant of ASX Limited and Cboe Australia Pty Ltd.. This material is issued and distributed by CAPL in Australia to "wholesale clients" only. This material does not take into account the specific investment objectives, financial situation or particular needs of the recipient. The recipient of this material must not distribute it to any third party without the prior written consent of CAPL. For the purposes of this paragraph the term "wholesale client" has the meaning given in section 761G of the Corporations Act 2001.

United States of America: This document is intended to be distributed into the United States of America by CLSA solely to persons who qualify as "Major U.S. Institutional Investors" as defined in Rule 15a-6 under the Securities and Exchange Act of 1934, as amended, and who deal with CLSA Americas, LLC. However, the delivery of this document to any person in the United States shall not be deemed a recommendation to effect any transactions in the securities discussed herein or an endorsement of any opinion expressed herein. Any recipient of this document in the United States wishing to effect a transaction in any security mentioned herein should do so by contacting CLSA Americas, LLC (a broker-dealer registered with the Securities and Exchange Commission) and an affiliate of CLSA. The distribution of this material in other jurisdictions may be restricted by law and persons into whose possession this material comes should inform themselves about and observe any such restrictions.

CLSA Americas, LLC acts as a Rule 15a-6 broker pursuant to Rule 15a-6 under the U.S. Securities Exchange Act of 1934 to each of the non-U.S. broker-dealer affiliate Groups, CITIC Securities and CLSA.

Each of these Groups produces its own research, desk reports or commentary (collectively, "Securities Analysis"). Each non-U.S. broker-dealer has separate distribution lists for the transmission of its Securities Analysis, although some recipients may be on the distribution lists of both broker-dealers. Information, opinions and estimates contained in the Securities Analysis reflect the judgment of the respective analyst(s), whether of CITIC Securities or of CLSA, who produced the Securities Analysis at the date of its original publication and are subject to changes without notification. The opinions in the Securities Analysis also may be different from or contrary to the opinions presented by other business departments, units or affiliates of CITIC Securities and CLSA even on the same specific security. As CLSA and CITIC Securities produce Securities Analyses independently of each other, they may have adopted different assumptions, standards, and analytical methods in the preparation of their respective Securities Analyses, and may have different opinions, ratings or recommendations with respect to any security. CLSA Americas, LLC has no obligation to bring to the attention of any recipient of the Securities Analysis any other Securities Analyses, or differences between other Securities Analyses and the concerned Securities Analysis.

Canada: This document has been produced in its entirety by CITIC Securities. The delivery of this document to any person in Canada shall not be deemed a recommendation to effect any transactions in the securities discussed herein or an endorsement of any opinion contained herein.

India: CLSA India Private Limited, incorporated in November 1994 provides equity brokerage services (SEBI Registration No: INZ000001735), research services (SEBI Registration No: INH000001113) and merchant banking services (SEBI Registration No.INM000010619) to global institutional investors, pension funds and corporates. CLSA and its associates may have debt holdings in the subject company. Further, CLSA and its associates, in the past 12 months, may have received compensation for non-investment banking services and/or non-securities related services from the subject company. For further details of "associates" of CLSA India please contact Compliance-India@clsa.com. Registration granted by SEBI and certification from NISM in no way guarantee performance of CLSA India Private Limited or provide any assurance of returns to investors.
