CONCLUSION

Conflict is Unpredictable. Diversification is Not.

12 conflicts. 25 years. The same pattern has prevailed every time.

Markets fell. Fear peaked. And then quietly, things have recovered.

Sensex has never delivered a negative three-year return across any conflict in this study. Gold showed up when it mattered. Bonds held their ground. A blended portfolio did absorb every shock. And the rupee depreciated - steadily, as it has through every cycle, conflict or otherwise.

The investor who stayed the course invariably won. Every single time.

THANK YOU
