## Breaking barriers to scale – Initiate with LONG

| CMP | Target Price |
|---|---|
| Rs 715 | Rs 886 Dec 2026 |
| Rating | Upside |
| LONG | 24% (↑) |

- SENORES, a research-driven US-focused generic company, has grown 11x over the last two years, backed by the acquisition of Havix (US-focused biz), Ratnatris (EM biz) and the launch of 22 ANDAs.
- Its US manufacturing base qualifies its products for government contracts – typically spanning up to five years with fixed pricing. Driven by strong growth in govt biz along with 5-6 ANDAs filings, continued ANDA acquisitions, and a clear focus on complex generics, its regulated biz is well placed to sustain a multi-year growth momentum.
- With over 30+ US ANDA launches (inc. acquired ANDAs) slated over the next 18 months and a fast-expanding footprint in EMs with an increasing share of own products, we expect a 35%/43% revenue/EBITDA CAGR over FY25-FY28E.
- A strong 43% EBITDA CAGR along with a 770bps ROCE expansion over FY25-FY28E at current valuation of 25x/22x P/E on FY27E/28E seem reasonable. We initiate coverage with a **LONG** and a Dec'26 TP of Rs 886 set at 27x P/E.

**Niche filings to drive the next phase of US growth:** SENORES' US business at US$ 28.5mn (+60% YoY) in FY25, is driven by a mix of CDMO/CMO contracts and its own products commercialised through marketing partners. The company targets 5-6 ANDA filings annually, with a growing emphasis on complex generics (CGT) and suitability petition products. While early filings/launches focus on volume expansion, the evolving pipeline is increasingly value-accretive, reflecting SENORES' transition towards differentiated, higher-margin opportunities.

**Acquiring ANDAs to fast-track scale and tender eligibility:** SENORES' ANDA acquisition strategy aligns well with its business model, leveraging its US manufacturing base to bid for long-tenure government contracts. These contracts – spanning five years or more – offer both volume scale and pricing stability versus the competitive retail business. The company has already acquired over 20 ANDAs, which are expected to be commercialised in the next 6-12 months, providing a meaningful step-up in its US revenue base.

**Expanding EM footprint with a wider product base:** SENORES entered EMs with the acquisition of Ratnatris in 2023 and has since widened its reach, accelerating filings across key markets to strengthen penetration. Focus remains on building its own product portfolio (over P2P), which will drive both revenue growth and margin improvement. SENORES has already filed 719 dossiers (awaiting approval), laying a strong foundation for scaling up across multiple EMs.

**Initiating with LONG:** SENORES' sharp focus on niche filings and government-linked business offers both scale and sustainability. Its low current base, combined with a strong pipeline of 30+ ANDAs, positions it well to deliver a 35% revenue CAGR over FY25-FY28E. Robust topline growth is set to generate operating leverage, driving 400 bps of margin expansion and lifting ROCE to 14%. Initiate coverage with a LONG rating and a Dec'26 TP of Rs 886.

# Investment Thesis

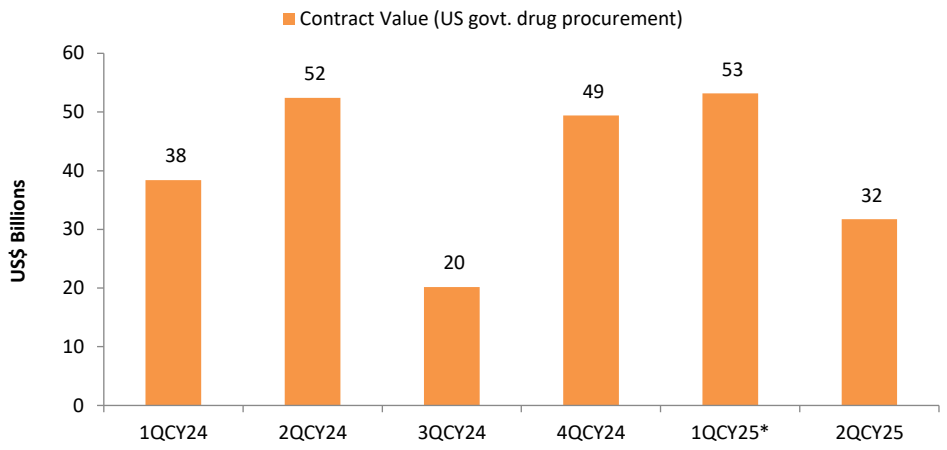
SENORES' ability to identify niche ANDA opportunities and scale them through marketing partnerships has been a key differentiator, giving it an edge over peers. With 30+ ANDA launches lined up in the US over the next 18-24 months and a widening presence in emerging markets (EMs), growth momentum is set to accelerate through FY25-FY28E.

## Strong pipeline to scale through Government contracts

*US growth driven by CDMO/CMO contracts and pipeline strength*

SENORES' US business, at US$ 28.5mn (+60% YoY) in FY25, has been driven by a mix of CDMO/CMO contracts and its own product launches through marketing partners. Its US facility footprint also makes both the company and its CDMO/CMO clients eligible for government tenders, typically awarded for five years with stable pricing, providing long-term revenue visibility.

**Exhibit 7: Sizeable government biz with limited competition; offers room for scaling up revenues**



*Source: SAM, Equirus Securities *(Excluding a one-time large order worth US$ 762bn to AmerisourceBergen Drug Corp)*

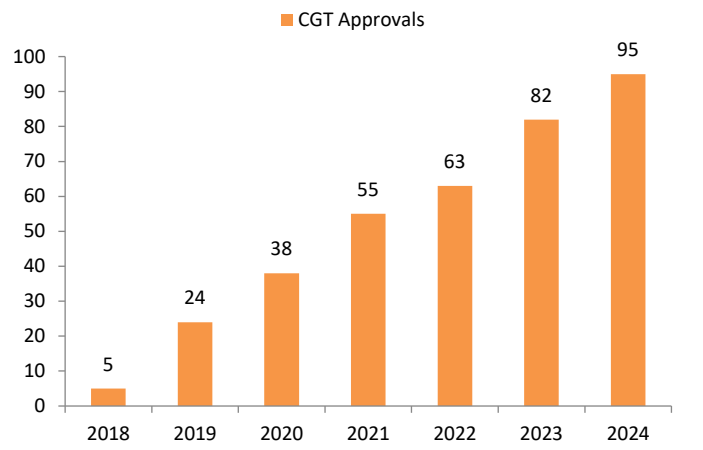
*Small US base, big pipeline: 30 ANDA launches in next 12-18 months*

SENORES acquired Havix in May'23 to foray into manufacturing for the US biz and it complements its in-house R&D team that has been building its US pipeline since 2020. The company currently has 4 ANDAs awaiting approval and 57 ANDAs under development. Senores has further strengthened its pipeline through the acquisition of more than 20 ANDAs (14 from Dr. Reddy's, 7 from others). It plans to launch 30 ANDAs over the next 12-18 months, several of which will be eligible for bidding in the upcoming US government tenders.

On its relatively small US base of US$ 28mn, each new ANDA launch will materially add to revenues. Looking ahead, SENORES aims to file 5-6 ANDAs annually, with a growing emphasis on complex generics (CGT) and suitability petitions. While the initial filings are geared towards driving volumes, the later pipeline is increasingly value-oriented, reflecting the differentiated nature of CGT and suitability-based opportunities.

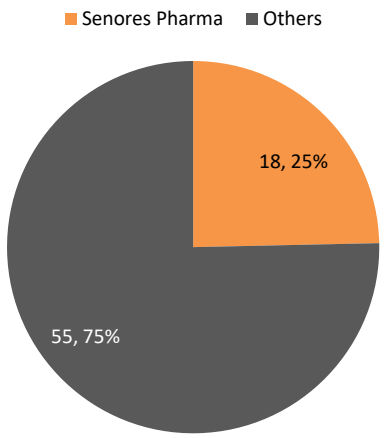
all@equirus.com - 18/12/2025 01:44:56 PM

Exhibit 8: CGT approvals on the rise – creating a larger playfield



*Source: USFDA, Equirus*

Exhibit 9: One in four suitability petitions in 2025 attributed to Senores



*Source: USFDA, Equirus*

## Partnership model unlocking complex generics

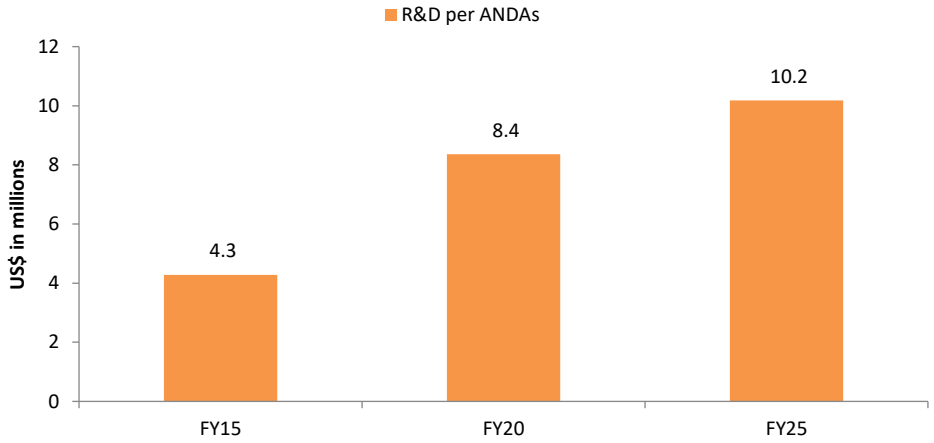
*Big pharma increasingly in-licensing plain vanilla generics*

Large generic companies such as Sun Pharma, Dr. Reddy's, Lupin and Alkem have been pivoting towards complex generics amid rising competition in the plain-vanilla segments. While their R&D focus is increasingly on high-value products (Exhibit-10), they still need to launch smaller products to offset the base business pricing pressure and cover operating costs.

To address this, many large players are turning to in-licensing agreements with smaller companies – a trend that has gained traction in recent years. This provides an attractive opportunity for emerging players, and we believe it will support SENORES' growth in the near to mid-term, until it achieves a critical scale of US$ 120mn-150mn in the US market.

We believe this trend will help Senores find suitable marketing partners for its ANDAs and will lead to healthy in-licensing income and profit-sharing in the ensuing years.

Exhibit 10: R&D spend per ANDA inching up; Focus on complex products



*Source: Company Data, Equirus*

## Generics CDMO/CMO – A niche growth platform

### Outsourcing tailwinds in government tenders

*BAA mandates US manufacturing, but high costs create CDMO/CMO opportunity for smaller companies with US-based plants*

Generic companies in the US have largely sustained margins by leveraging their low-cost Indian manufacturing bases. Only a few maintain plants in the US; however, due to limited scale and weak capacity utilisation, many of these facilities have been shut down. Conversations with industry players indicate that manufacturing costs in the US are 55-60% higher than in India. While serving the US market from India has been effective, companies miss out on government contracts that require local manufacturing under the Buy American Act (BAA). To address this, many firms prefer to partner with CDMO/CMO players in the US, enabling flexible cost structures and ensuring eligibility for tenders.

### SENORES well-placed to capture demand

With a strong US manufacturing presence, SENORES has emerged as a preferred CDMO/CMO partner. It has already signed 80 CMO products, of which 27 products are already in the market and the remainder will be commercialised over the next 18-24 months. Alongside its own product launches, these contracts are set to sharply improve plant utilisation. To meet the growing demand, the company has been actively expanding capacity. Importantly, high utilisation levels allow SENORES to generate healthy margins, whereas individual companies operating limited-scale US facilities often struggle even to break even.

*Source: Company Data, Equirus*

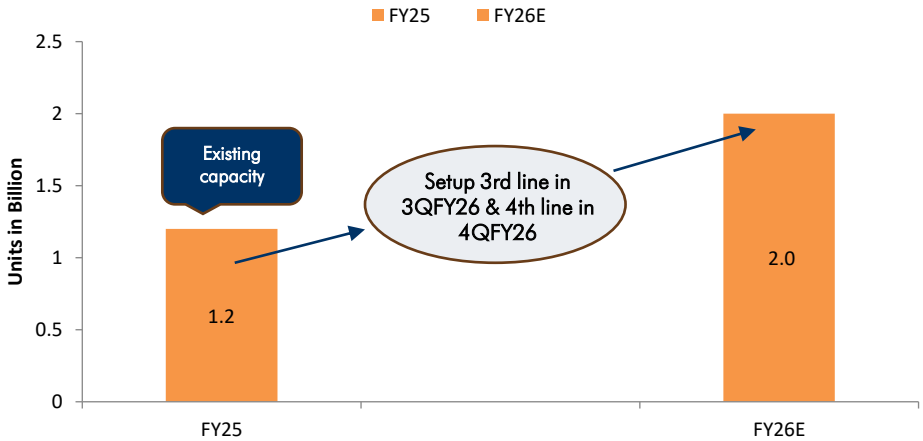
Exhibit 17: US capacities are planned to increase by 67% by FY26E end



*Source: Company Data, Equirus*

## Emerging markets expansion leveraging portfolio breadth

*Massive pipeline + lower entry barriers + own product focus = revenue & margin upside in Ems*

SENORES entered EMs in Dec'23 through an acquisition, and has since rapidly scaled up, with 308 product registrations and a pipeline of 719 launches lined up by Jun'25. Revenues from this segment are projected to grow at a 22% CAGR over FY25–FY28, supported by structural drivers such as expansion into high-growth geographies, broader market access, and a well-stocked pipeline with timely rollouts.

Gross margin accretion is expected to be structurally higher, aided by a gradual portfolio mix shift towards a larger share of own-product/distributor model versus P2P/CDMO, which offers higher value with operating leverage benefits. EMs also have lower entry barriers compared to regulated markets, enabling faster monetisation of the pipeline and reducing over-reliance on the US generics market – thereby providing greater earnings resilience.

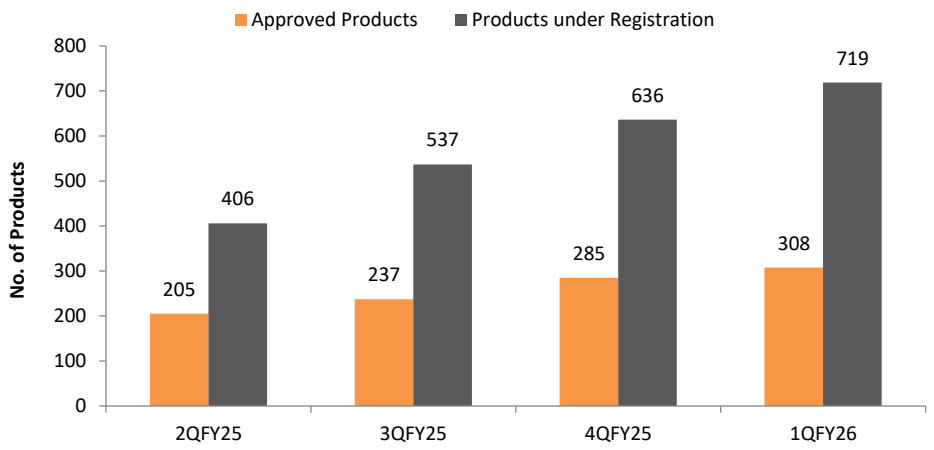
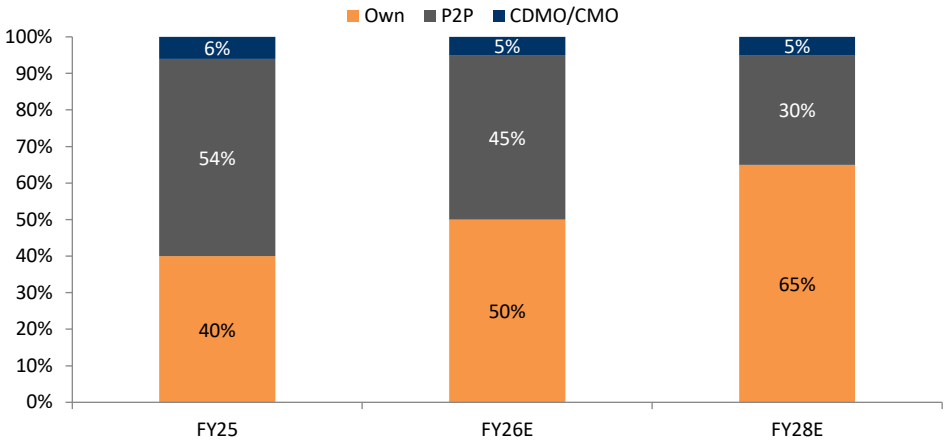
Exhibit 18: Emerging Market Expansion Backed by Rising Approvals and Strong Pipeline



*Source: Company Data, Equirus*

Exhibit 19: Rising Share of Own Products to Drive Gross Margin Expansion



*Source: Company Data, Equirus*

## New API facility to aid backward integration, high-value market entry

*New API facility drives capacity for captive requirements and external sales*

SENORES' API business was set up to strengthen backward integration, improve cost efficiency, and ensure supply security for its formulations. The new greenfield API plant at Chhatral, commissioned in Feb'25 with a capex of Rs 650mn-700mn, significantly enhances capacity to meet both captive needs and external sales.

With its new facility commercialisation, its capacity will increase to 150MT from 25MT. The API segment is projected to deliver a 37% revenue CAGR over FY25-FY28, reaching Rs 800mn, with the new facility contributing Rs 550mn. Over the medium to long term, SENORES plans to leverage this capacity to expand into regulated and semi-regulated markets, moving beyond domestic and SAARC sales. This transition should aid margin expansion and support business diversification.

all@equirus.com - 18/12/2025 01:44:56 PM

# Financial Analysis

## Revenue to grow at 35% CAGR over FY25-FY28E

*Multi-engine growth: US scale-up, EM expansion, API ramp-up to drive 35% CAGR*

SENORES' revenues are projected to grow at a 35% CAGR during FY25-FY28E, supported by three key drivers:

1. **Regulated markets:** We expect 35% revenue CAGR in the regulated biz on the back of a) 50+ CDMO/CMO product introduction, b) commercialisation of 5-6 own ANDAs filed using its in-house R&D team and c) commercialisation of acquired ANDAs (20+) over the next 12-18 months.
2. **Emerging markets are expected to growth at 22% CAGR** backed by product approvals across geographies. Senores has 719 product registrations awaiting approval which are expected to be commercialised over the next 24 months.
3. **Others:** Ramp-up in the API segment following commissioning of the new greenfield plant at Chhatral, which is expected to increase its capacity by 6x. Additionally, its critical care business is seeing sharp growth and expected to grow at 90% CAGR over the next three years.

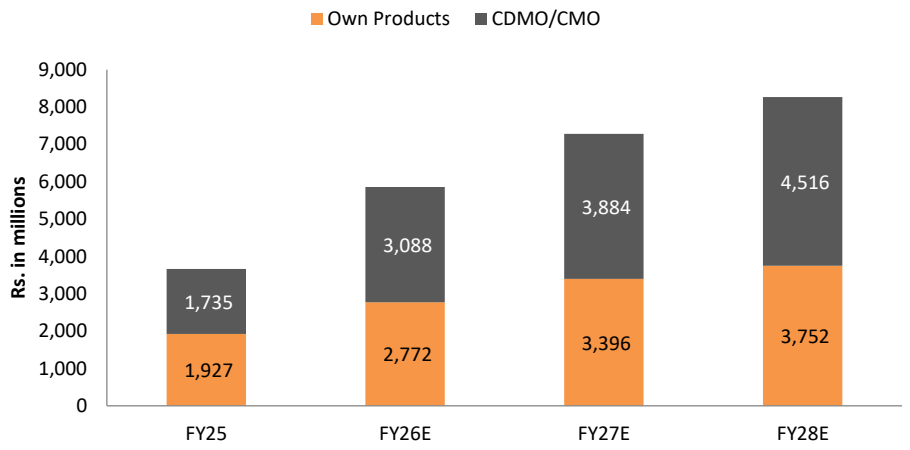
Exhibit 22: Revenue Growth in Both Own Products and CDMO/CMO Segments Across Regulated and Emerging Markets



*Source: Company Data, Equirus*

## Margins on an upward trajectory

### Mix-led improvement in gross margins

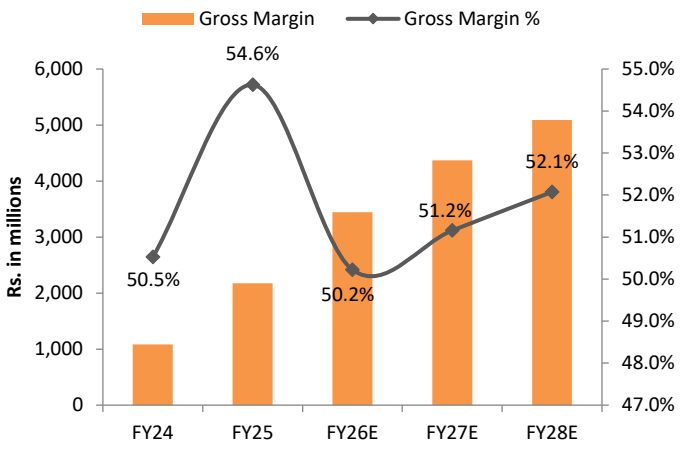
*Gross margins to rise from 50% in FY24 to 52% by FY28E; EBITDA margins to expand from 19% to 27%*

SENORES' gross margin is expected to improve from 50% in FY24 to 52% by FY28E, supported by a strategic shift towards a higher share of own product in regulated and EMs. This structural change in product mix will be a key driver of margin expansion over the medium term.

### Operating leverage to drive EBITDA margin gains

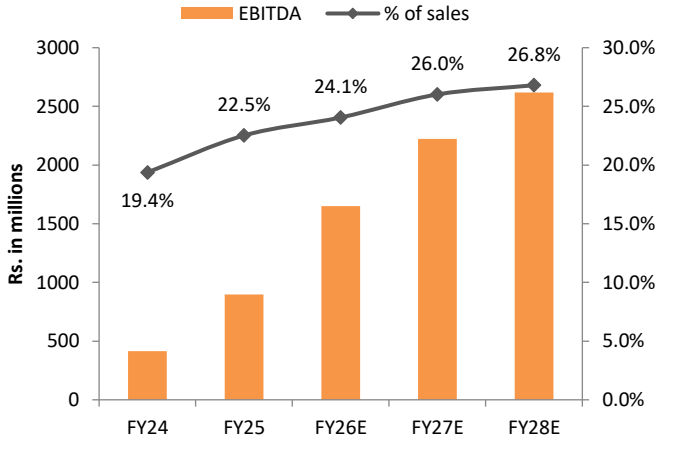
SENORES' EBITDA margins rose sharply from 19% in FY24 to 23% in FY25, reflecting the benefits of operating leverage with more products commercialising across the geographies. We expect margins to further strengthen to 27% by FY28E supported by positive operating leverage and increasing share of high value own products vis-à-vis CMO biz.

Exhibit 23: Gross Margin to Improve from 47% to 52% by FY28E



*Source: Company Data, Equirus*

Exhibit 24: EBITDA Margin Expands from 19% to 27% by FY28E



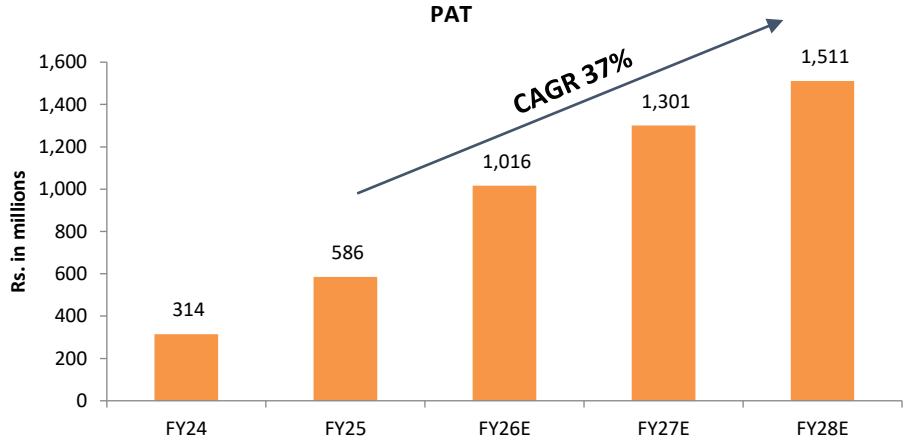
*Source: Company Data, Equirus*

all@equirus.com - 18/12/2025 01:44:56 PM

## Strong Earnings Momentum with 37% PAT CAGR over FY25–FY28E

Senores' PAT is projected to rise from Rs 586 mn in FY25A to Rs 1,511 mn in FY28E, implying a robust 37% CAGR over the period, driven by strong growth across regulated and emerging markets. Strong revenue growth along with an improved sales mix and positive operating leverage is expected to aid margins and should reflect in earnings growth as well. PAT growth is relatively lower than EBITDA growth on account of higher effective tax rate.

**Exhibit 25: PAT to more than double from FY25 to FY28E**



*Source: Company Data, Equirus*

## Return ratios poised for steady improvement

SENORES' return ratios are expected to strengthen meaningfully, with ROCE projected to expand by 770 bps to 14.2% and ROE rising to 12.9% by FY28E. The improvement will be underpinned by strong revenue growth, a structural mix shift towards higher-margin own product/distributor-led model (over P2P/CDMO), and operating leverage benefits – together creating favourable tailwinds for return metrics.

**Exhibit 26: ROCE to Double – 770 bps Expansion…**

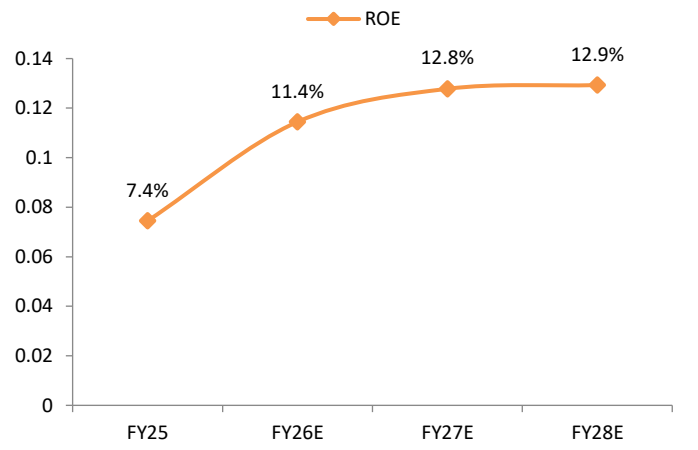
**Exhibit 27: …and ROE Expansion of 550 bps over FY28E**



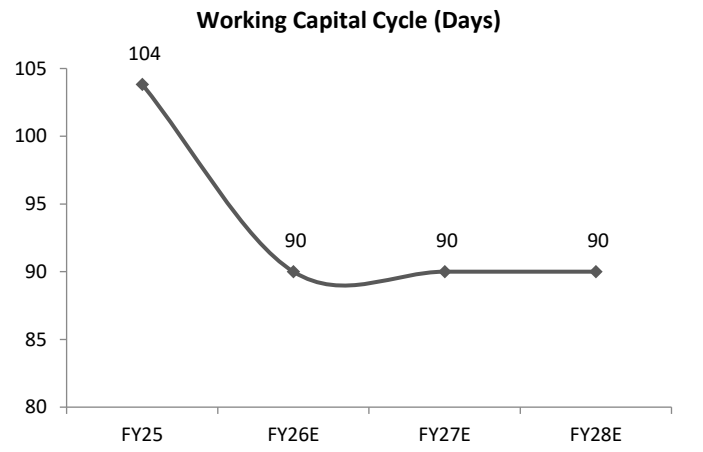
*Source: Company Data, Equirus*

all@equirus.com - 18/12/2025 01:44:56 PM

## Operating cash flows to turn positive by FY26

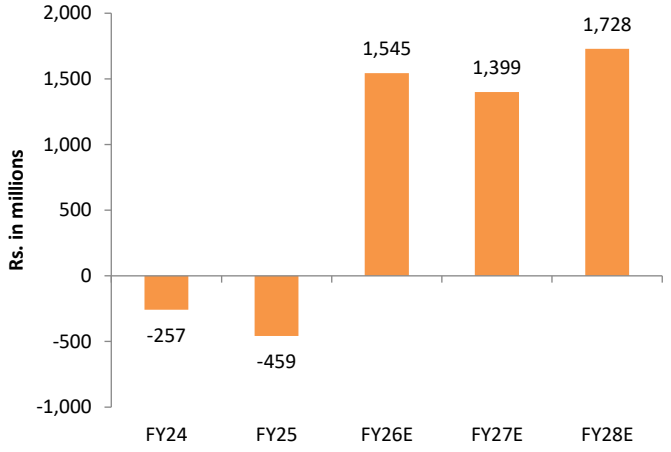
SENORES' operating cash flow is expected to turn positive from FY26, reaching Rs 1.7bn by FY28, supported by steady improvements in working capital efficiency. The key driver is the company's strategic shift towards the own product/distributor-led model, which should meaningfully reduce receivables and improve cash conversion compared with the P2P/CDMO model.

Exhibit 28: Working capital cycle improving as focus on own product…



Source: Company Data, Equirus

Exhibit 29: …making operating cash flow positive from FY26

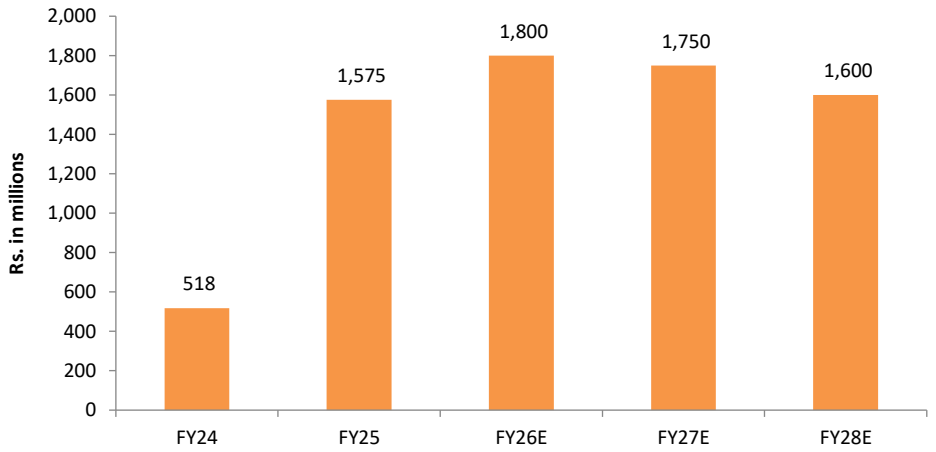


Source: Company Data, Equirus

## Capex targeted towards capacity augmentation and pipeline build-up

Senores is stepping up its growth engine with an expected capex plan of Rs. 5.1 billion over FY26E–FY28E, aimed at scaling capacities, investing in the injectable unit and increasing R&D spending. The major outlay is earmarked towards capacity augmentation and injectable plant, while R&D spend is expected to range between Rs. 250-300mn per annum. Senores plans to meet most of its capex requirements through internal accruals.

Exhibit 30: Senores' Investment Surge over FY24-FY28E



Source: Company Data, Equirus

all@equirus.com - 18/12/2025 01:44:56 PM

# Valuation & View

## Initiating with Long

Senores has been solidifying its strong business fundamentals with acquisition of a) Havix-manufacturing capability for US biz, b) Ratnatris to support manufacturing for the EM and c) ANDAs (acquired 20+) from its peers, which shall add constructively adding to its return metrics in the ensuing years.

We believe Senores is set to grow at 35% CAGR over the next three years with its margins expected to strengthen by 400bps over the same period with increasing share of own products and positive operating leverage.

Senores will be generating operating cashflow of Rs. 1.5bn annually with its ROE/ROCE expected to strengthen by 550 bps/770 bps over FY25-28E. At CMP, Senores is trading at reasonable valuation of 25x/22x P/E on FY27E/28E.

We believe with strong growth visibility over the next three years with strong cashflow generation, Senores will re-rate. We are initiating with Long with a Dec'26 TP of Rs. 886 set at 27x P/E.

## Key Risks

- Delay in approval for the key products.
- Any adverse regulatory action at its Key plant at Atlanta.
- Partnership cessation for the key products.
- Rupee appreciation against USD.

all@equirus.com - 18/12/2025 01:44:56 PM

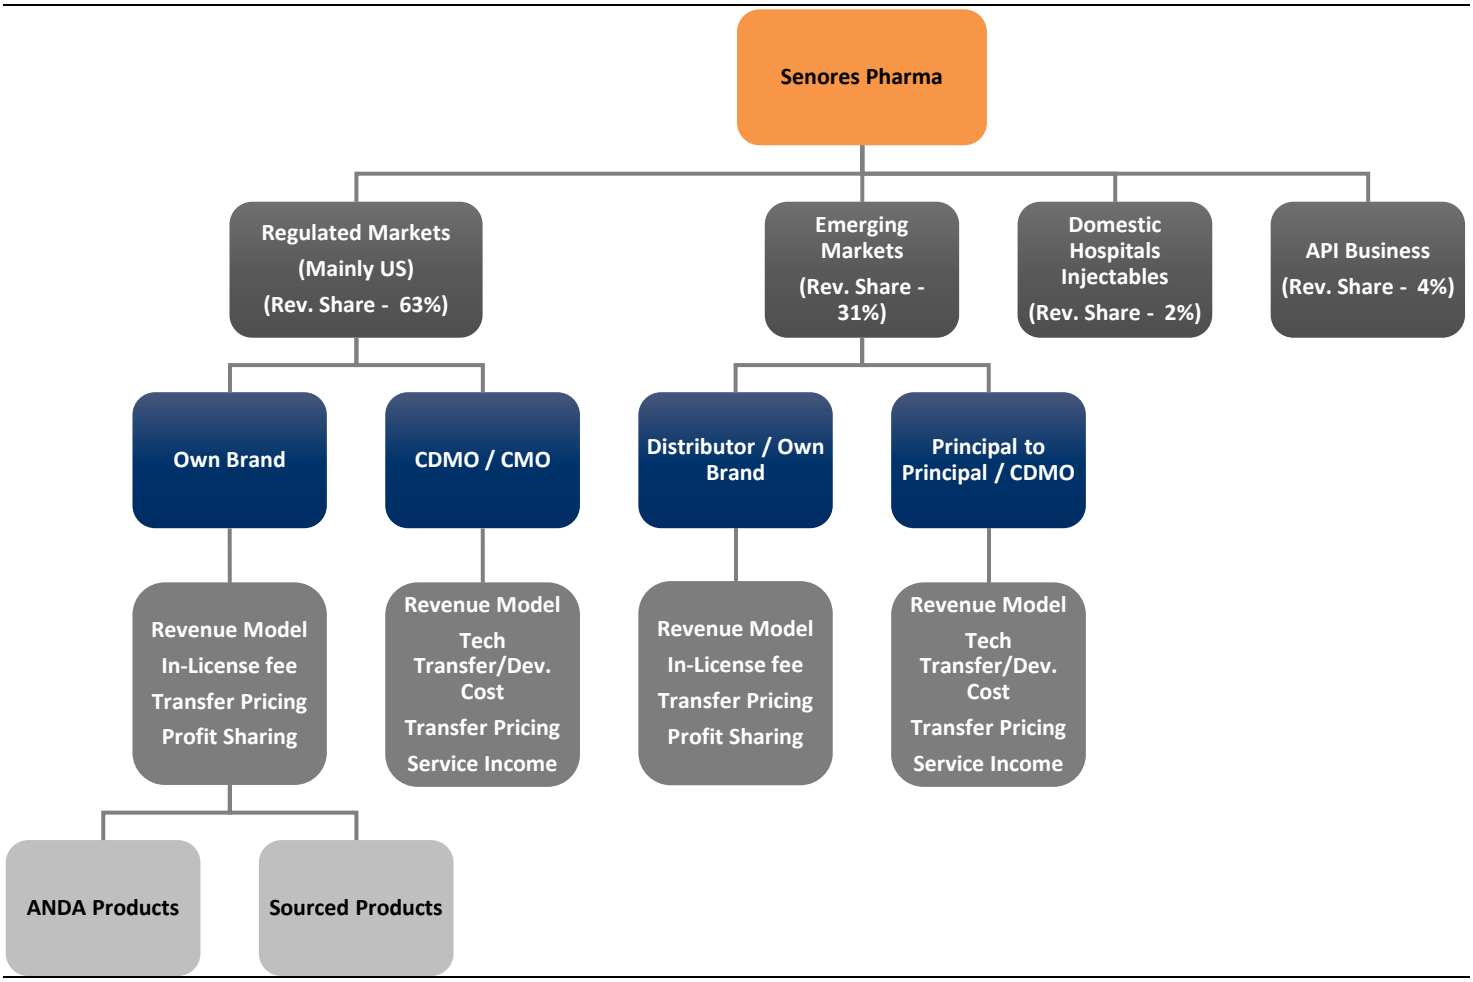
## Business operations

SENORES' business spans four segments – regulated markets, emerging markets, domestic hospital injectables and APIs. In regulated markets (primarily the US), revenue comes from two streams – own-brand sales and CDMO/CMO. In EMs, sales are distributor-led, with a presence under own brands, alongside principal-to-principal and CDMO partnerships.



*Source: Company Data, Equirus*

### Regulated markets business

SENORES derives the bulk of its revenue from regulated markets, contributing 63% (Rs 2.45bn) in FY25. The business is managed through two subsidiaries – Havix Inc., which operates the US FDA-approved oral solid dosage (OSD) facility in Atlanta, and SENORES Pharma Inc., a US-based entity that holds the company's ANDA portfolio and enters into agreements with marketing partners.

**Exhibit 36: Details regarding regulated markets and semi-regulated markets (as of 30 Jun'25)**

*Source: Company Data, Equirus*

all@equirus.com - 18/12/2025 01:44:56 PM

SENORES' regulated market business model operates through two segments – own brand and CDMO/CMO. In the own-brand segment, the company handles product development, regulatory approvals and manufacturing, while marketing partners manage sales and distribution. Revenue is generated through in-licensing fees, transfer pricing and profit-sharing. Under CDMO/CMO, SENORES either contracts third parties for product development, facilities or production, or provides such services by leveraging its own manufacturing capacity, technical expertise and market access – earning revenues from technology transfer, transfer pricing and service income.

*Two-pronged US model – own brand + CDMO/CMO*

## A. Own Brand

### I. ANDA Products

*40% of ANDA approvals with CGT designation vs industry's 29%; 75% with exclusivity*

SENORES has strategically focused its ANDA portfolio on low-competition markets. Between Jan 2018 and May 2024, 40% of its approvals received a Competitive Generic Therapy (CGT) designation, well above the industry average of 29.2%. Notably, 75% of these approvals secured CGT exclusivity. A CGT designation allows six months of marketing exclusivity (if launched within 75 days of approval), during which no other generic can enter the US market.

SENORES has long-term marketing agreements of 5-7 years with leading generic and marketing companies in regulated markets, providing revenue visibility and stable market access.

### II. Sourced Products

SENORES also supplies sourced products to meet specific requirements of its marketing partners. These products are procured from other manufacturers or distributors and supplied on a case-to-case, tailor-made basis.

all@equirus.com - 18/12/2025 01:44:56 PM

## B. CDMO/CMO

SENORES leverages its Atlanta facility to conduct CDMO/CMO operations in the US, Canada and UK. Customers rely on its customised formulation, development and manufacturing capabilities to address rising drug complexity, cost pressures and regulatory requirements. The company partners with many customers early in the drug development cycle, expanding relationships as molecules progress from clinical trials into commercial production.

Additionally, the Atlanta facility enables SENORES to service US government contracts undertaken by its customers, including the manufacture of controlled substances. In addition, it acts as a pure contract manufacturer for companies such as Alkem Laboratories and Jubilant Cadista, providing manufacturing services for products already developed by them. SENORES has signed CDMO/CMO contracts for more than 40 products with customers across the US, Canada, UK, South Africa, UAE, Israel, Denmark, Saudi Arabia and Vietnam.

*40+ CDMO/CMO contracts and tie-ups with Alkem, Dr. Reddy's, Sun Pharma, Jubilant, and global players across US, Canada, UK and EMs*

Exhibit 38: Strong partnership for own ANDAs and CDMO/CMO products

| Marketing partners for ANDAs | CDMO/CMO Partners |
|---|---|
| Alkem Laboratories Limited | Mint Pharmaceuticals Inc. (Canada) |
| Lannett Company Inc. | Solco Healthcare US LLC (US) |
| Prasco LLC | Ambicare Pharmaceuticals Inc. (Canada) |
| Jubilant Cadista Pharmaceuticals Inc. | Amici Pharmaceuticals Inc. (US) |
| Sun Pharmaceuticals Industries Limited | Waymade PLC (UK) |
| Cintex Services LLC | |
| Dr. Reddy's Laboratories Inc. | |

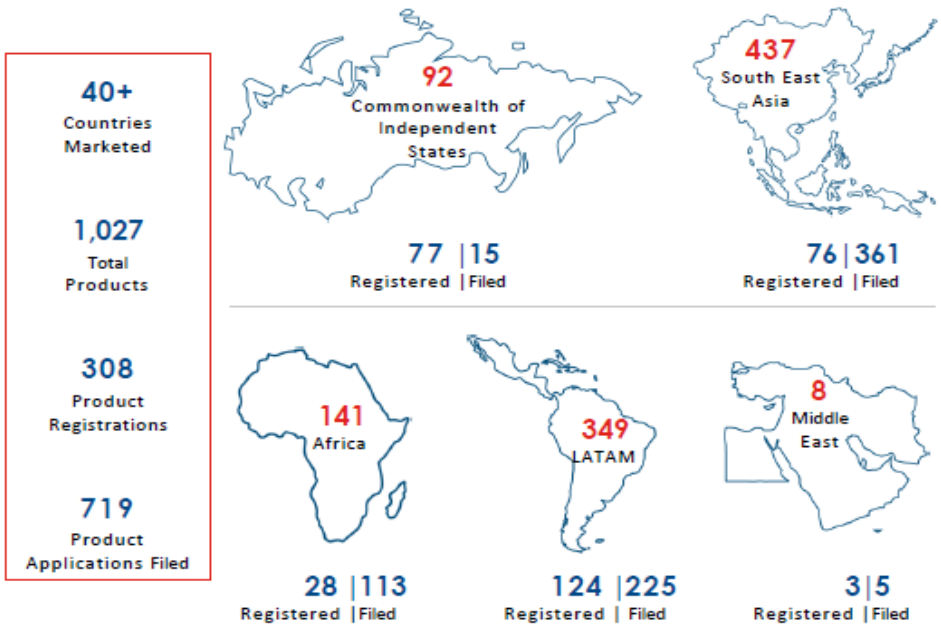
### Emerging markets business

SENORES entered the emerging markets segment through an acquisition in Dec'23, with the full impact visible in FY25 – contributing 31% of revenue (Rs 1.21bn). The company develops and manufactures pharmaceutical products across multiple therapeutic areas at its WHO-GMP-approved facility in Chhatral (Ahmedabad), Gujarat. This facility caters to several EMs, including the Philippines, Uzbekistan, Tanzania and Peru.

Exhibit 39: Improving product breadth and geographic reach in the EM



*Source: Company Data*

all@equirus.com - 18/12/2025 01:44:56 PM

SENORES has launched several molecules in emerging markets by leveraging its US portfolio. All these products are under patent protection in the US markets and are therefore not available in some EM countries. The company has filed for approvals for molecules such as apixaban, tofacitinib, sacubitril + valsartan, sugammadex, ferric carboxymaltose and eltrombopag olamine, and has already received approvals to market them in emerging markets.

SENORES operates through two formats in EMs – (1) own-brand and distributor, and (2) principal-to-principal (P2P) and CDMO. Under the own-brand and distributor model, the company manufactures formulations and markets them directly or through distributors under its own label, generating revenues from in-licensing fees, transfer pricing and profit-sharing. Under the P2P and CDMO model, SENORES manufactures formulations for pharmaceutical companies or CDMOs to be marketed under their brands, earning revenues from technology transfer, transfer pricing and service income.

## Domestic hospitals injectables

SENORES entered the domestic hospitals injectables segment in Aug'22, supplying injectables across India through a distributor-led model. This business contributed 2% of FY25 revenue (Rs 80mn). Critical care injectables are partly manufactured at the Chhatral facility and partly sourced from other Indian players. As of 30 Jun'25, SENORES had launched 60 products across major therapeutic segments, including antibiotics, anti-bacterials, anti-fungals and blood-line therapies. The company is present in several hospitals across India, operating through state-level distributors and direct tie-ups with hospitals.

## API business

SENORES commenced API manufacturing in FY23 as a backward-integration initiative, contributing 4% of FY25 revenue (Rs 140mn). While the business currently caters to the domestic market and SAARC countries, the medium-term strategy is to expand into regulated and semi-regulated markets through direct product sales. APIs are manufactured at the Naroda facility, with a new greenfield unit commissioned at Chhatral, in FY25, at a capex of Rs 650mn-700mn. As of 30 Jun'25, the company had commercialised 16 APIs, including oncology products.

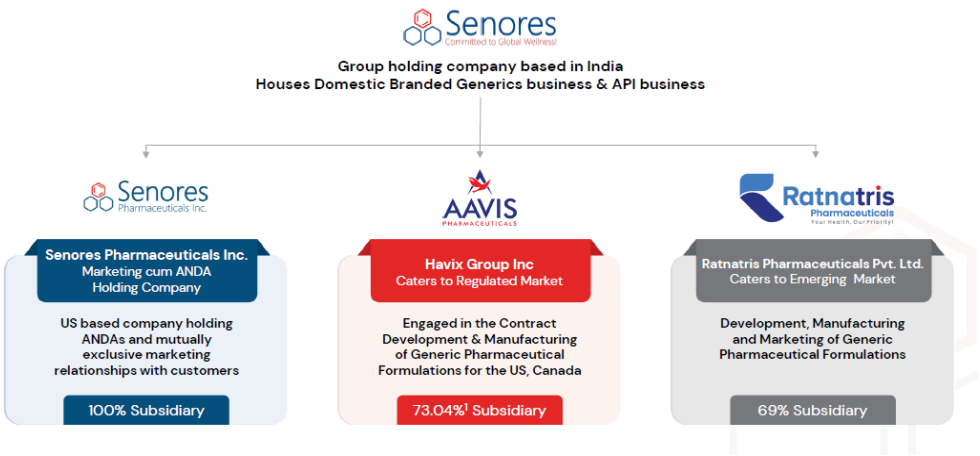
## Company and Subsidiary Operations

**Senores Pharmaceuticals** is a group holding company based in India, operating across regulated markets, emerging markets, domestic hospital injectables and APIs. Its US-based wholly owned subsidiary, **Senores Pharmaceuticals Inc.**, holds the company's ANDA portfolio and manages exclusive marketing arrangements with customers. **Havix Group Inc.** (73.04% owned) focuses on regulated markets, primarily the US, through contract development and manufacturing of generics. **Ratnatris Pharmaceuticals** (69% owned) drives growth in emerging markets through development, manufacturing and marketing of generics.

**Exhibit 41:**



*Source: Company Data*

** API business was housed under its wholly owned subsidiary RLPL until RLPL merged with Senores Pharmaceuticals Limited, with the appointed date being January 1, 2024.*

### Manufacturing Facilities

| Facility | Location | Description | Key Approvals |
|---|---|---|---|
| Atlanta Facility (Havix) | Atlanta, US | Facility for manufacturing oral solid dosages | US FDA<br>DEA<br>BAA |
| Chhatral Facility (RPPL) | Chhatral, Ahmedabad, Gujarat | Facility for manufacturing oral solids, oral liquids, injectables and ORS. | WHO-GMP |
| Naroda Facility (Senores Pharmaceuticals Limited) | Naroda, Gujarat | Facility for manufacturing APIs | Indian GMP Guidelines |

### Atlanta Facility (Havix)

The Atlanta facility, operated by Havix Group Inc., is SENORES' key manufacturing hub for regulated markets. The company has progressively increased its stake in Havix, underscoring its strategic importance in strengthening its regulated market presence. The facility received US FDA approval in Feb 2019 and has since cleared four FDA audits, including a surprise inspection in Apr'24 with no Form 483 observations – highlighting its strong compliance and quality standards. It is also DEA-approved for manufacturing controlled substances, supports SENORES' CDMO operations and houses two advanced manufacturing lines. Capacity expansion is underway, with annual capacity set to rise from 1.2bn to 2bn units. A third OSD line is scheduled for commissioning in 3QFY26, followed by a fourth in 4QFY26.

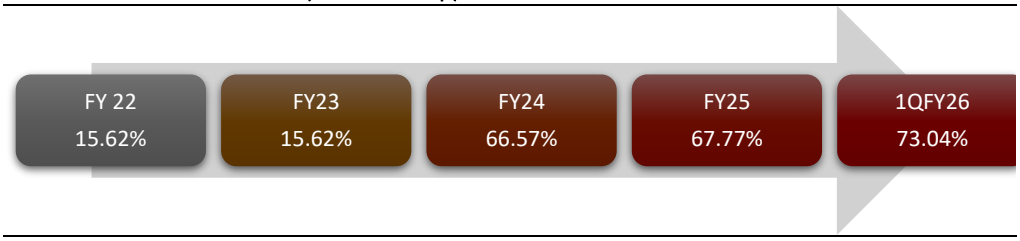
Stake rise in Aavis Pharma (Havix Group)



*Source: Company Data*

## IPO funds deployment: Half utilized, half reserved

SENORES has utilised about 50% of the Rs 5bn IPO proceeds, largely towards debt repayment and working capital requirements. The balance is earmarked for a capex of Rs 1.1bn at the Havix facility in Atlanta (sterile injectables) and Rs 1.0bn for potential inorganic acquisitions, which remain to be deployed.

Exhibit 42: Fund utilization from IPO

| Sr. No | Object as per Offer Document | Amount as proposed in the Offer Document (Rs. Millions) | Amount utilized as on June 30, 2025 (Rs. Millions) | Amount Unutilized as on June 30, 2025 (Rs. Millions) | Remarks |

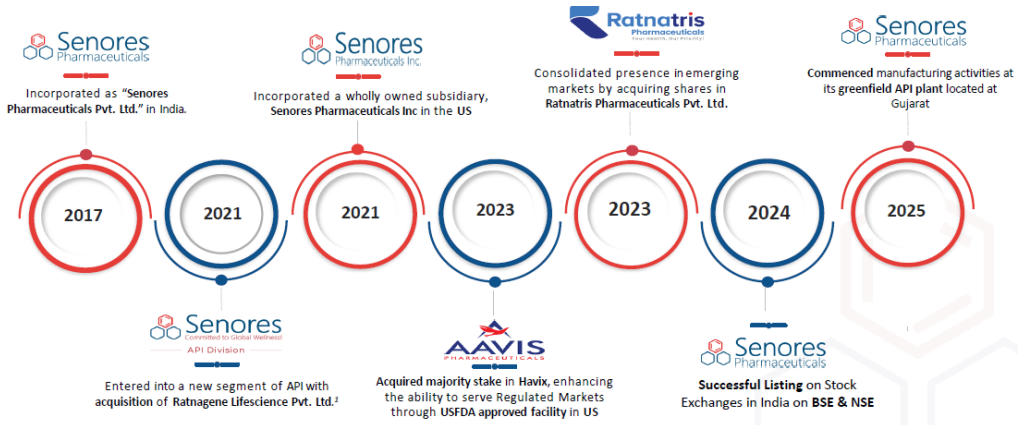
# Key Events, Corporate Governance, Risks, Management Profile

## Key Events



Note: 1: Now merged with Senores Pharmaceuticals Limited with the appointed date being January 1, 2024

## Corporate Governance

Senores demonstrate a robust, compliant, and evolving governance framework for a newly listed issuer: a well-structured board with clear separation of roles, active committees with transparent disclosures, and foundational policies aligned to SEBI (LODR).

Based on Senores' FY25 Annual Report, following are the key highlights of our preliminary assessment of the level of corporate governance in the company:

**Board of Directors:** The Board comprises 12 directors as of March 31, 2025, with an optimal mix of executive (3), non-executive (9) {including independent directors (4)}. The Chairman is a Non-Executive, Non-Independent Director, thereby ensuring a separation of ownership and management. None of the directors hold board or committee positions in excess of statutory limits, and all independent directors have confirmed compliance with independence criteria.

**Key committees:**

In line with the provisions of the Companies Act, 2013 and SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, Senores Pharmaceuticals has constituted the following committees of the Board to ensure effective governance and oversight:

1. **Audit Committee:** 4 Directors, of which 3 are Independent Directors. The Committee met **10 times** during FY25.
2. **Nomination & Remuneration Committee:** 3 Directors, of which 2 are Independent Directors. The Committee met **2 times** during FY25.
3. **Stakeholders' Relationship Committee:** 4 Directors, of which 2 are Independent Directors.
4. **Corporate Social Responsibility Committee:** 3 Directors, of which 1 is an Independent Director.
5. **Risk Management Committee:** 4 Directors, of which 2 are Independent Directors.

All the above Committees are chaired by Independent Directors, thereby ensuring objectivity and independent oversight in key governance areas.

**Other Highlights:**

- **Statutory Auditor:** Pankaj R. Shah & Associates; audit report carried no adverse remarks.
- **Secretarial Audit:** Mukesh H. Shah & Co.; report confirmed compliance with Companies Act and SEBI (LODR).
- **Internal Audit:** Sharp & Tannan Associates appointed w.e.f. June 2025.
- **Corporate Governance:** Certificate (Jul-25) stated "generally complied" with SEBI (LODR) since listing.
- **Compliance:** No penalties or adverse regulatory actions in FY25.
