Raymond Limited

Waiting for take-off

- **The New Raymond**

  Raymond Limited has undergone one of the most well-executed corporate transformations in recent Indian industrial history. The transformation was triggered by an acquisition of a 59.25% stake in MPPL (Maini Precision Products Limited) for INR 682cr. The NCLT-approved restructuring, effective Aug'25, shaped Raymond's entire engineering portfolio into two distinct entities. JKMGAL (JK Maini Global Aerospace Limited) houses the high-growth aerospace and defence business. JKMPTL (JK Maini Precision Technology Limited) consolidates precision auto components, tools, and industrial engineering. Legacy entities MPPL and RPAL (Ring Plus Aqua Limited) were dissolved entirely thereby eliminating structural complexity.

- **The Aerospace Opportunity**

  Every Airbus A320neo and Boeing 737 MAX that rolls off the assembly line flies on a CFM LEAP engine. Raymond's aerospace subsidiary, JKMGAL, supplies critical precision components into all three LEAP variants and does so at a quality level of just 6 PPM (parts per million) rejection rate against an industry standard of 200 PPM. That's not a supplier relationship; that's a near-irreplaceable position in a program with 12,400+ aircraft yet to be delivered. The revenue from this backlog stretches well into the 2030s, and new part numbers are being added every single day.

- **Tailwinds in Precision Parts Manufacturing**

  While aerospace captures the imagination, the precision auto and tools businesses are quietly compounding in the background. The automotive segment grew 12% to INR 1,225cr in 9MFY26, with margins expanding from 10% to 12%. JK Files & Engineering with 25–30% of global steel files capacity generates steady cash that funds R&D.

- **Capex to Drive the Next Leg of Growth**

  Management has committed INR 930cr in fresh capital expenditure across 77 acres in Andhra Pradesh. The government has approved a 57% co-funding up to INR 537cr in subsidies already. New aerospace and auto production lines are expected to come online in H2FY27F.

- **Plant Visit Observations**

  The aerospace unit operates 180+ specialized machines across 10,500 sq.m. JKMGAL operates at 6 PPM rejection rate against an industry standard of 200 PPM, placing it among the best globally. The facility appeared capacity constrained while management is adding CNC machines and has plans to produce 300–350 new products annually.

Valuation and Outlook

- We expect Revenue/EBITDA/PAT to grow at 14%/28%/54% over FY26-28F. The numbers look extraordinary because of demerger/consolidation impact on FY26E consolidated financials.
- We await Q4FY26E disclosures to assess balance sheet of the subsidiaries and one-offs to settle in Raymond's financials.

Peer Comparison

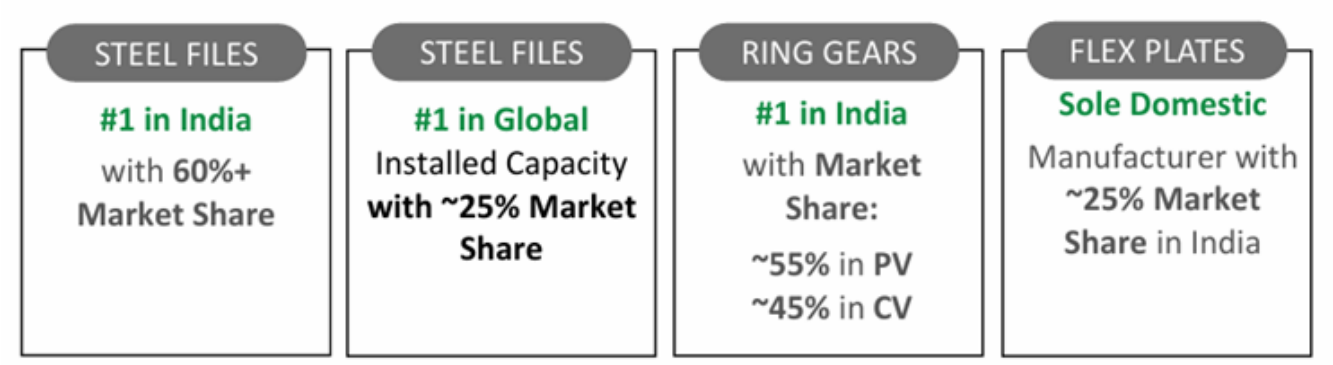
The Legacy of Raymond Engineering

- Raymond's engineering journey began with its subsidiary JK Files & Engineering Limited (JKFEL), incorporated in 1949, which became India's largest steel files manufacturer and built a global leadership position with approximately 25% of worldwide installed capacity. In 2005, Raymond acquired Ring Plus Aqua Limited (RPAL), a leading manufacturer of ring gears and flex plates for the automotive sector, through JKFEL. These legacy engineering assets formed the foundation of Raymond's B2B industrial portfolio.
- The transformative deal came in Mar'24, when RPAL (acting as a step-down subsidiary of Raymond Limited) acquired a 59.25% majority stake in Maini Precision Products Limited (MPPL) for INR 682cr. MPPL, founded in 1973 by the late Dr. S.K. Maini, is one of India's premier manufacturers of high-precision machined components for the automotive and aerospace industries. With 11 manufacturing plants in Bengaluru and decades-long relationships with global OEMs like Bosch, Safran, Eaton, Volvo, and Marshall Aerospace, MPPL brought deep domain expertise and a strong export franchise (65–70% of revenues from exports) to the Raymond Group. The remaining 40.75% stake continued to be held by the original Maini family promoters, while the deal facilitated a complete exit for MPPL's private equity investors.



Raymond's market leadership in niche products

The New Raymond

- Following the acquisition, Raymond initiated comprehensive restructuring to consolidate all its engineering assets under a cleaner corporate structure. The National Company Law Tribunal (NCLT) approved the scheme of arrangement, with the order filed with the Registrar of Companies on July 31, 2025. Under this scheme:
    - The auto components, tools & hardware, and industrial engineering businesses of JKFEL, RPAL, and MPPL were consolidated into a newly formed entity: JK Maini Precision Technology Limited (JKMPTL).
    - The defense and aerospace businesses of MPPL were carved out and transferred to: JK Maini Global Aerospace Limited (JKMGAL).
    - Both MPPL and RPAL ceased to exist as standalone entities post the completion of this scheme.
    - The shareholding in the new entities is held by Raymond Limited and its promoters (~66%), MPPL's original promoters (~28.5%), and other minority shareholders holding the balance.
- Post-restructuring, Raymond Limited's engineering operations are organized into two distinct subsidiaries:
    - JK Maini Precision Technology Limited (JKMPTL) which houses the combined auto components, tools & hardware, and industrial engineering businesses. The company manufactures 2,000+ auto components and 4,000+ SKUs annually, serving clients across automotive, EV/hybrid, hydraulics, agriculture, locomotive, marine,

power tools, and industrial segments.

- JK Maini Global Aerospace Limited (JKMGAL) which is India's leading exporter of highly critical aero engine components, with two decades of established relationships with the top 3 global aircraft engine manufacturers (which collectively hold ~88% market share). The business has developed ~1,200 precision aero engine parts, including ~350 parts for the latest LEAP engine variants. It serves 25+ global aerospace and defense clients, with 90% of aerospace revenue coming from exports. The revenue split is approximately 60% Europe, 21% US, and 17% domestic.

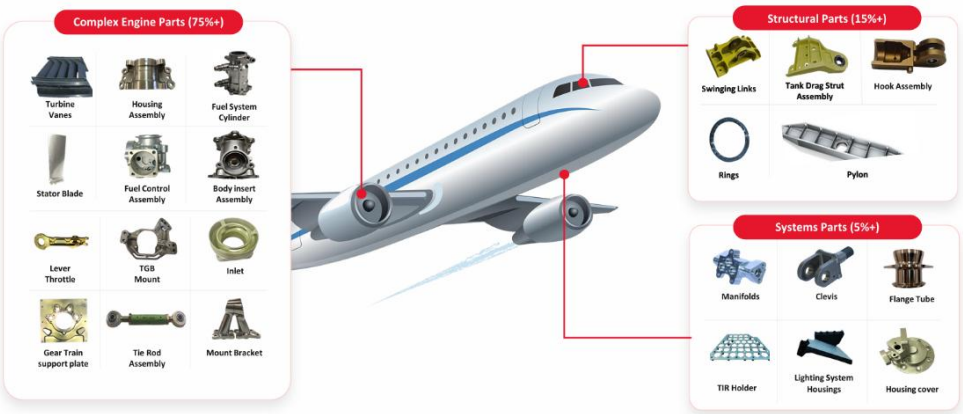
- The engineering vertical is operationally led by Gautam Maini, MD – Engineering Business, who is the founder of Maini Precision Products Limited (MPPL). Mr. Maini brings over two decades of deep domain expertise in aerospace and precision auto components manufacturing. He has built MPPL into one of India's foremost aerospace component exporters with clients including the top 3 global aero engine OEMs.
- Supporting the leadership structure are Navin Sharma (CFO – Engineering Business), K.A. Narayan (President – HR, ex-Wockhardt), and S.L. Pokharna (President – Corporate Commercial), collectively bringing functional depth across finance, human capital, and commercial operations.

The Aerospace Opportunity

- JKMGAL supplies ~350 distinct part numbers across the LEAP engine family, covering LEAP 1A (Airbus A320neo), LEAP 1B (Boeing 737 MAX), and LEAP 1C (COMAC C919, now being introduced). Many parts are common across 1A and 1B variants, while some are variant-specific. The company adds more than one new part per day to its portfolio, which means the 300–350 figure is continuously growing. Each new part added represents an incremental revenue stream that compounds over the life of the program (typically 5–10 year).
- They engineer over 1,200+ SKUs across complex engine, structural, and system components, out of a 10,500 sq. m. aerospace facility in Bengaluru. Their capabilities include 5-axis machining, aluminium and titanium machining, sheet metal fabrication, assemblies, and CMM inspection.
- In 9MFY26, the segment clocked INR 273cr in revenue, up 34% YoY. EBITDA grew in lockstep at 34% to INR 57cr, maintaining a stable EBITDA margin of 20.9%.
- As a component manufacturer for the CFM International LEAP engine family (LEAP 1A, 1B, and 1C), sits at the intersection of the two largest commercial aircraft production programs in history and an emerging Chinese narrowbody program.
- A LEAP engine has a list price of ~$15–20 million. At 0.1–0.3% content, JKMGAL's

revenue per engine is roughly $15,000–$45,000. With ~1,721 LEAP engines delivered in CY25 (our cross-industry estimate), and JKMGAL likely serving a subset of these, the current penetration represents a fraction of the total opportunity.

- While LEAP is the primary program, JKMGAL is present on at least 15 different engine programs spanning large and small engines. This includes the GTF program (Pratt & Whitney), creating natural diversification
- The demand picture is supported by record backlogs at both Airbus (8,665 aircraft) and Boeing (6,100+ aircraft), aggressive production ramp targets, and a LEAP market share advantage over its only competitor (Pratt & Whitney GTF) that may widen further due to ongoing GTF reliability issues.
- The total LEAP engine pipeline exceeds 24,800 engines across the three variants, with annual OE engine demand projected to grow from ~1,700 in 2025 to ~2,500+ by 2027—a 47% increase—before factoring in the rapidly building aftermarket opportunity from ~13,500 LEAP engines already in the field.



Delivery Scenario	A320 Rate	737 Rate	LEAP 1A/yr	LEAP 1B/yr	Total LEAP
Current (2025)	~52/month	42/month	~804	1,008	~1,842
2026 Estimate	~60/month	47/month	~928	1,128	~2,116
2027 Target	75/month	52/month	~1,161	1,248	~2,509
Growth vs 2025			+44%	+24%	**+36%**

Source: Industry, InCred Research

Program	Aircraft Backlog	LEAP Engines	Visibility
A320neo (LEAP 1A @ 64.5%*)	~5,096	~10,192	Into 2030s
737 MAX (LEAP 1B @ 100%*)	~6,100	~12,200	Into 2030s
COMAC C919 (LEAP 1C @ 100%*)	~1,200+	~2,400+	Into 2030s
TOTAL PIPELINE	**~12,400+**	**~24,800+**	

Source: Industry, InCred Research **engine market share*

- These projections exclude LEAP 1C demand from the COMAC C919, which adds another 60–100 engines annually by CY29 as COMAC targets 150–200 aircraft per year. They also exclude spare engine demand and scrap/fallout replacements, which Park Aerospace's management noted are not factored into their own conservative models.
- We expect this segment to grow at ~25% for the next 3 years while EBITDA margins can fluctuate due to new product additions. The management highlighted that operational efficiencies with the help of Raymond's existing business can play out in the next 12-18 months. This can lead to a sustained operating margin expansion to 22-24%.

Tailwinds in Precision Parts Manufacturing

- The automotive parts segment posted revenue of ₹1,225cr in 9MFY26, growing 12% YoY, with EBITDA margins expanding to 12% versus 10% in FY25 (full-year revenue: INR 1,527cr). JK Files & Engineering anchors the cash-generation profile, manufacturing steel files, drills, and power tools where the industry is growing at a modest 3-4% CAGR. The business benefits from deep backward integration, a decades-long distribution network, and commanding global capacity of ~30%.
- MPPL and RPAL constitute the precision engineering core, focused on gearbox, drivetrain, and high-pressure fuel system components. The revenue split leans heavily toward commercial vehicles (CV). This CV concentration is a deliberate strategic advantage: heavy-duty vehicles face a materially slower EV transition timeline relative to passenger cars, with EU regulations mandating only a 45% CO_2 reduction by 2030. Ring Plus Aqua generated INR 395cr revenue in FY25 across ring gears, water pump bearings, and flex plates. It directly benefits from this extended ICE runway. Critically, the company is the sole domestic flex plate manufacturer, with a ~25% market share, limiting near-term competitive displacement.
- MPPL's demerger and integration into JKMPTL in CY24 materially expands the group's EV-era addressable opportunity. MPPL manufactures ~2,000 distinct components and supplies to 65 countries, with established relationships with tier-1 intermediaries including Eaton, Cummins, and BorgWarner, and direct OEM exposure to Volvo Group, UD Trucks, and Eicher Motors. Gearbox and drivetrain components retain meaningful relevance in BEV architectures, representing 3-5% of vehicle cost for large CVs — a moderate compression from the ICE equivalent of 5-10%. Volvo is targeting 90-100% electrified global sales by CY30 and Isuzu-UD investing ¥40bn in a common HD platform launching in CY28.
- The precision auto parts business is likely to grow at ~12%, supported by new product launches in Hybrid and EV segments. We have built a stable EBITDA margin of ~13% for the next 2 years.

Capex to drive the next leg of growth

- Management disclosed a comprehensive INR 930cr capital expenditure roadmap for their AP (Andhra Pradesh) facility over the next 5 years, strategically split between segments:
    - Aerospace Division (JKMGAL): INR 500cr
    - Precision Technology & Auto Components (JKMPTL): INR 430cr
- The company evaluates capacity requirements "on a monthly basis" based on the velocity of new product development (FAI pipeline) and contract wins, allowing agile capital deployment.
- The capex-to-sales ratio appears elevated in the near term (INR 930cr over 5 years against FY26E revenue of ~INR 2,300cr, implying ~8% annual capex intensity), but management's emphasis on "frugal engineering" and phased deployment suggests disciplined capital allocation.
- The management stated that the capex will largely get funded by internal accruals. We, on other hand expect borrowings to go up due to inadequate cash flows from the business. The current consolidated debt stands at ~INR 1,100cr.
- The new production lines in AP are expected to commence in H2FY27F, which will drive topline growth in the next 2-3 years.

Parameter	Aerospace Division (JKMGAL)	Precision Auto (JKMPTL)	Total/Combined
Capital Expenditure (5-Year)	INR 500cr	INR 430cr	INR 930cr
Land Allocation	32 acres @ INR 46L/acre + 15 acres @ INR 38L/acre	30 acres @ INR 46L/acre	77 acres
Land Cost	INR 14.7cr + INR 5.7cr	INR 13.8cr	INR 34cr
Capital Subsidy	57% of FCI Capped at INR 292cr	57% of FCI Capped at INR 245cr	INR 537cr
Employment Subsidy	9% of FCI Capped at INR 46cr	10% of FCI Capped at INR 43cr	INR 89cr
Total Government Support	INR 338cr	INR 288cr	INR 626cr

Plant Visit & Management Meeting Takeaways

- We visited 2 units of JKMGAL and JKMPTL each in Bangalore, Karnataka. Both plants are in Bommasandra Industrial Area which is 60kms from the airport.
- The aerospace unit is spread over 10,500 sqm with 180+ specialized machines, 200+ skilled workers working 3 shifts/day. At this unit, company manufactures 800+ complex parts of aero engines, structure and internal systems.
- The rejection acceptability rate in the aerospace industry is 200 PPM (parts per million). JKMGAL stands at 6 PPM which is one of the best amongst its peers. While the average wastage ratio across aero parts stands at 80%.
- The area seemed underutilized, the management is working on an efficiency plan to add more CNC machines. The company plans to add 300-350 new products annually.
- The customer retention rate is almost 99%, the company's ~35-40% aero revenue is derived from Safran (6 different entities).
- JKMGAL has order book visibility for the next 5 years spread across 15+ engine programs. On the other hand, JKMPTL has visibility for 4-5 years without considering renewals.
- The management highlighted a major supply chain issue in Europe which is helping the aero business to gain market share as China+1 story is playing out for Indian manufacturers.
- The company has over 18 precision part manufacturing units spread across the country. At the Bommasandra plant, the company manufactures auto parts for Volvo, UD and BorgWarner etc.
- Hybrid segment seems to be the key revenue driver. The management believes that outsourcing is going to increase in European region, which will drive demand for multiple precision products in the coming quarters.
- The overall WC days would hover around 60-65 days for both businesses. With new products coming online, the management expects improved cash flows and asset turn.
- Organic growth can be upwards of 20-25% while the company is actively looking for inorganic opportunities. The scale will be achieved by horizontal expansion in both aero and auto businesses.

Valuations

Particulars (in cr)	FY25	FY26E	FY27E	FY28E
JKMPTL Revenue	1,513	1,697	1,893	2,131
JKMPTL EBITDA	166	204	237	266
JKMGAL Revenue	311	407	504	623
JKMGAL EBITDA	70	91	109	141

Particulars (in cr)	Based on FY28E
JKMPTL	2,663 (10x EBITDA)
JKMGAL	2,822 (20x EBITDA)
Total EV of subsidiaries	5,446
Consolidated Net Debt	31
Total Equity	5,415
Equity owned by Raymond	3,574 (66%)
Per Share Value	537
Upside	34%

- Our valuation is based on SOTP method. We assign 10x EV/EBITDA FY28E to JKMPTL and 20x EV/EBITDA FY28E to JKMGAL. These multiples are based on peers and business growth. We have implied 100% discount on the equity value which Raymond Limited holds in Raymond Lifestyle and Realty.
- This method translates to a target of INR 537 which implies an upside of 34%.

The research analysts, strategists or economists principally responsible for the preparation of this research report are segregated from the other activities of IRSPL. Information barriers and other arrangements have been established, as required, to prevent any conflicts of interests.

IRSPL may have issued other reports (based on technical analysis, event specific, short-term views, etc.) that are inconsistent with and reach a different conclusion from the information presented in this report.

Holding of Analysts/Relatives of Analysts, IRSPL and Associates of IRSPL in the covered securities, as on the date of publishing of this report

Research Analyst or his/her relative(s) or InCred Research Services Private Limited or our associate may have any financial interest in the subject company.

Research Analyst or his/her relatives or InCred Research Services Limited or our associates may have actual or beneficial ownership of 1% or more securities of the subject company(ies) at the end of the month immediately preceding the date of publication of the Research Report.

Research Analyst or his/her relative or InCred Research Services Private Limited or our associate entities may have any other material conflict of interest at the time of publication of the Research Report.

In the past 12 months, IRSPL or any of its associates may have:

a) Received any compensation/other benefits from the subject company,
b) Managed or co-managed public offering of securities for the subject company,
c) Received compensation for investment banking or merchant banking or brokerage services from the subject company,
d) Received compensation for products or services other than investment banking or merchant banking or brokerage services from the subject company

We or our associates may have received compensation or other benefits from the subject company(ies) or third party in connection with the research report.

Research Analyst may have served as director, officer, or employee in the subject company.

We or our research analyst may engage in market-making activity of the subject company.

Analyst declaration

- The analyst responsible for the production of this report hereby certifies that the views expressed herein accurately and exclusively reflect his or her personal views and opinions about any and all of the issuers or securities analysed in this report and were prepared independently and autonomously in an unbiased manner.
- No part of the compensation of the analyst(s) was, is, or will be directly or indirectly related to the inclusion of specific recommendations(s) or view(s) in this report or based on any specific investment banking transaction.
- The analyst(s) has(have) not had any serious disciplinary action taken against him/her(them).
- The analyst, strategist, or economist does not have any material conflict of interest at the time of publication of this report.
- The analyst(s) has(have) received compensation based upon various factors, including quality, accuracy and value of research, overall firm performance, client feedback and competitive factors.

IRSPL and/or its affiliates and/or its Directors/employees may own or have positions in securities of the company(ies) covered in this report or any securities related thereto and may from time to time add to or dispose of, or may be materially interested in, any such securities.

IRSPL and/or its affiliates and/or its Directors/employees may do and seek to do business with the company(ies) covered in this research report and may from time to time (a) buy/sell the securities covered in this report, from time to time and/or (b) act as market maker or have assumed an underwriting commitment in securities of such company(ies), and/or (c) may sell them to or buy them from customers on a principal basis and/or (d) may also perform or seek to perform significant investment banking, advisory, underwriting or placement services for or relating to such company(ies) and/or (e) solicit such investment, advisory or other services from any entity mentioned in this report and/or (f) act as a lender/borrower to such company and may earn brokerage or other compensation. However, Analysts are forbidden to acquire, on their own account or hold securities (physical or uncertificated, including derivatives) of companies in respect of which they are compiling and producing financial recommendations or in the result of which they play a key part.
Registration granted by SEBI, membership of a SEBI recognized supervisory body (if any) and certification from NISM in no way guarantee performance of the intermediary or provide any assurance of returns to investors.

Recommendation Framework

Stock Ratings	Definition:
Buy	The stock's total return is expected to exceed 20% over the next 12 months.
Hold	The stock's total return is expected to be between 0% and positive 10% over the next 12 months.
Sell	The stock's total return is expected to fall below 0% or more over the next 12 months.

The total expected return of a stock is defined as the sum of the: (i) percentage difference between the target price and the current price and (ii) the forward net dividend yields of the stock. Stock price targets have an investment horizon of 12 months.

Sector Ratings	Definition:
Overweight	An Overweight rating means stocks in the sector have, on a market cap-weighted basis, a positive absolute recommendation.
Neutral	A Neutral rating means stocks in the sector have, on a market cap-weighted basis, a neutral absolute recommendation.
Underweight	An Underweight rating means stocks in the sector have, on a market cap-weighted basis, a negative absolute recommendation.

Country Ratings	Definition:
Overweight	An Overweight rating means investors should be positioned with an above-market weight in this country relative to benchmark.
Neutral	A Neutral rating means investors should be positioned with a neutral weight in this country relative to benchmark.
Underweight	An Underweight rating means investors should be positioned with a below-market weight in this country relative to benchmark.
