Q3FY26 REVIEW

SECTOR UPDATE

nuvama institutional equities

HV T&D super-cycle gathers steam

HV T&D players maintained their dream run with OI/execution up 33%/39% and OPMs at 20.3% (+540bp), riding RE-led transmission ordering. In contrast, *Non-Power Industrials remained subdued* with soft execution (~9% YoY) and margins contracting to 11.7%. However, OIs improved +26% YoY on a low base supported by metals, O&G and new-age segments (data centres, EVs, electronics and semicon).

We remain optimistic on Thermal BTG + T&D capex while broad-based private capex remains patchy (focused around new age). We remain watchful on: i) recent traction in steel, O&G; and ii) percolation of budgeted infra capex of INR12.2tn (exhibit 1) *results in wide recovery in private capex.* Top picks: BHEL, Hitachi Energy, GVT&D, CG Power.

HV transmission leads with ordering set to accelerate ahead

India's capex cycle stays increasingly anchored to public spending with the FY27 Budget sustaining the infrastructure thrust through INR12.2tn capex (+ 12% YoY RE) while trade deals with the US and EU add an incremental export tailwind. The Power T&D cycle offers strong multi-year visibility supported by the planned INR9.15tn outlay over 2022–32, including 8–10 HVDC corridors (equipment awards completed for three). Export intensity also remains supportive with MNCs typically running at 25–30% of order book for exports markets. Beyond power, incremental ordering is increasingly from data centres, EV/battery, semiconductors and electronics while traditional factory capex stays muted. The RBI's CUF at 77.7% (> 75% for 10–12 consecutive quarters) marks a decadal-high and may signal a turning point for private capex. We stay watchful on whether recent traction in steel and O&G ordering coupled with GoI's measures (tax cuts, GST reforms, PLIs, rate cuts, liquidity support) can trigger a broader sustained private-investment cycle beyond the current pockets (H1FY26 BSE500 capex still at only 4% YoY).

HV dream run: HV T&D players continue to run all-time-high order book with book to bill rate at 3.5x FY25 sales, inflows +33.4%, sales +39.1% YoY and OPMs of 20.3% (+540bp YoY), backed by better pricing and operating leverage. On China-led import risk, industry sources expect: i) impact to be limited to products where India has acute shortage or already imported; and ii) Chinese players may need to set up manufacturing footprint within India – which may take two–three years. We remain bullish on HV T&D where ordering is set to accelerate in FY27 (low FY26 base) and demand-supply dynamics stay favourable till FY30 (despite capacity additions).

Non-Power Industrials muted; private capex green shoots await traction: Non-power Industrials reported tepid execution (+8.6% YoY) and muted OPMs at 11.7% (-140bp). Ordering was the only bright spot as it rose 26.3% YoY backed by metals, O&G and new-age segments with players guiding for strong inquiry pipelines ahead. In Q3FY26, we upgraded Thermax to 'BUY' aided by improving profitability and attractive valuation. We stay watchful on improving inquiry-to-order conversion and a pickup in execution across industry as the broader private capex cycle takes shape.

Sectors building out path ahead

India's manufacturing sector contributes to 17% of GDP (vis-a-vis *services at 55%*) making the country the sixth largest manufacturing economy in the world though contributing only 3.1% to the world GDP—*leaving substantial headroom for growth*. RBI's capacity utilisation rate at 77.7% (*versus peak at 80%-plus during 2003–09*) has reached pre-covid levels, but still has some way to go to reach previous cycle's peak.

We believe the major reforms of the past decade, "*Make in India", Unified Payments Interface (UPI)', Real Estate Regulatory Authority (RERA), Insolvency and Bankruptcy Code (IBC), Goods & Services Tax (GST), Production Linked Incentives (PLI) scheme and China + 1*—have collectively laid the groundwork for improved credit lending by strengthening corporate balance sheets, enhancing capital availability and reducing receivable cycles.

Investment opportunities span well-defined themes—Power (generation, RE, T&D), Defence, Electronics Manufacturing, the EV ecosystem, Energy Transition, Data Centres—each reinforcing India's manufacturing momentum. We remain watchful on whether GoI's measures (tax cuts, GST reforms, PLIs, rate cuts and liquidity support) can trigger a broader sustained private-investment cycle beyond the current pockets *(H1FY26 BSE500 capex still at only 4% YoY).*

Power Generation (Thermal/RE)

Peak deficit here/Base deficit not far away

- India is already facing peak deficit in peak summers and evenings (when solar goes off grid).
- In order to meet 6% power demand growth—supply growth from RE has to be 40-50GW yearly and Thermal at 10–15GW yearly.
- If demand growth is slower at 5–6%, the problem is delayed to FY30–32, but not eliminated. Hence, the urgency to add both RE and thermal.

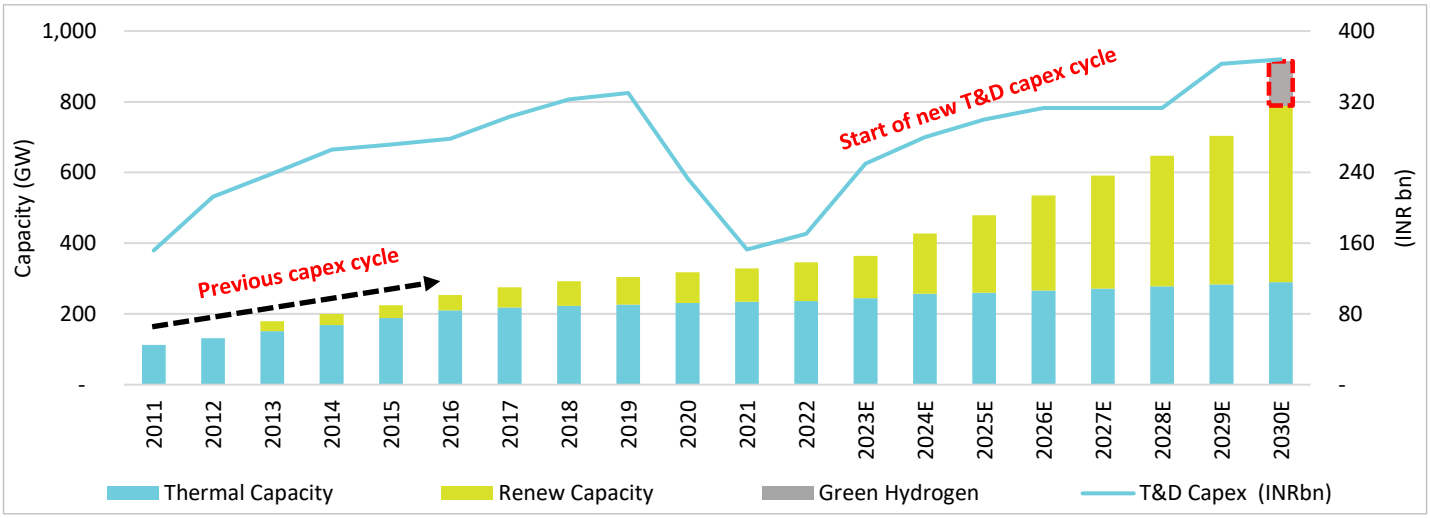
Power Transmission & Distribution

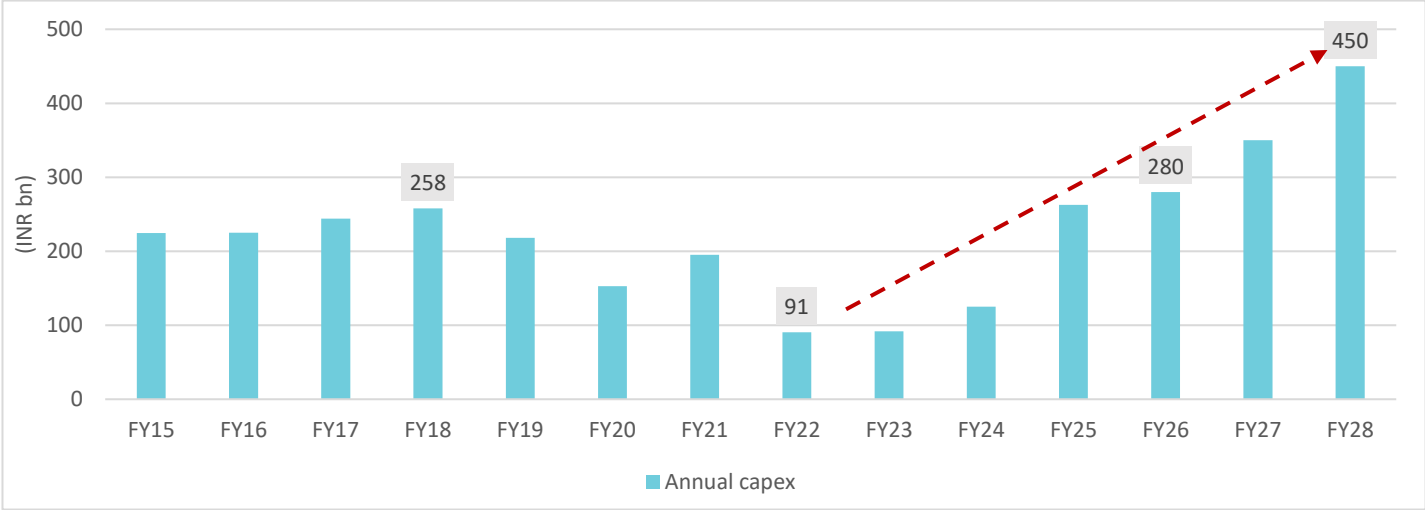
India's capex cycle is underpinned by the planned INR9.15tn Power T&D outlay over 2022–32—including another six–eight HVDC corridors—and strong exports (25–30% OB for most players).

Exhibit 21: Renewables capex to spur next cycle of T&D capex (interstate)



Source: Nuvama Research

Exhibit 22: PGCIL's capex to grow 2–3x, assuming 40–50% share of INR9.15tn capex



Source: PGCIL, Nuvama Research

HVDC mega opportunity

India plans to add *eight to ten large HVDC projects (equipment awards completed for three)*, each worth ~INR150–200bn, of which the product supply is likely to be around 40–50%. With only three players who can deliver HVDC technology (**Siemens Energy, Hitachi Energy and GE Vernova T&D**) and a large pipeline of projects up for grabs (exhibit 19, 20, 21), we find all three names benefitting from this opportunity.

Exhibit 23: Barmer HVDC—Ordering likely in FY27E

HVDC Projects	Technology	Size (MW)	Cost (INR bn)	Likely award	Comments
±800 kV Bhadla-III - Fatehpur HVDC line	LCC	6,000	200-250	FY24-25E	6,000MW, + 800 kV HVDC system between Bhadla-III and Fatehpur **Adani Group** won the project Equipment order placed to **Hitachi Energy**
±350kV Pang - Kaithal HVDC line (Leh Ladakh)	VSC	5,000	320	FY26-27E	+ 350kV, 5,000MW VSC-based HVDC link from Pang to Kaithal Allocated to PGCIL in Jan'22 through RTM route **Converted to HVAC**
±800kV Barmer-II - Jabalpur HVDC line	LCC	6,000	150-200	FY27E	±800kV HVDC line between Barmer-II (HVDC) -Jabalpur PS(~1,100km) **Expected to see ordering in FY27E**
±800kV Khavda - Aurangabad HVDC line	LCC	8,000	200-250	FY24-25E	Khavda – Aurangabad 8,000MW, ±800kV HVDC line **PGCIL** won the project Equipment order placed to **Hitachi Energy**

Exhibit 33: Q3FY26 results at a glance

Company	Particulars	Q3FY26	Q3FY25	Q2FY26	Growth (YoY)	Growth (QoQ)	Results at a glance
BHEL	Revenues	84,731	72,771	75,118	16.4%	12.8%	BHEL missed our Q3FY26 PAT estimate by 17% despite 16.4% YoY revenue growth as GM fell to 30.8% (-620bp YoY) on accelerated execution of low-margin legacy projects, in our view. Order inflows surged 53% YoY to INR105bn lifting backlog to ~INR2.2tn however non-thermal OI missed estimates and remained soft.
	EBITDA	5,453	3,042	5,809	79.2%	-6.1%	
	PAT	3,825	1,248	3,677	206.6%	4.0%	
	Order inflows	1,05,250	68,600	2,19,300	53.4%	-52.0%	Post 'kitchen sinking' in FY26, we expect FY27 to be a 'turnaround year', free of legacy drag and start of operating leverage benefits while annual thermal OI continues at 7GW+ (with TAM of 12 14GW p.a.).
	Order book	22,28,000	16,01,580	21,96,000	39.1%	1.5%	
	EBITDA Margin (%)	6.4	4.2	7.7			
L&T (consol)	Revenues	7,14,497	6,46,678	6,79,835	10.5%	5.1%	L&T posted 11% YoY core revenue growth (3% below Street) with core OPM at 8.1% (+50bp YoY), OI +18% YoY. Management expects a sharp uptick in Q4 P&M execution (implied +20% YoY) to meet FY26 revenue growth guidance of 15% (9MFY26 at 12%). Kuwait L1 order may be cancelled and re-tendered while closures of legacy hydrocarbon project to aid a gradual margin recovery.
	EBITDA	74,168	62,549	68,064	18.6%	9.0%	
	PAT	45,589	33,588	39,261	35.7%	16.1%	
	Order inflows	13,55,810	11,60,360	11,57,840	16.8%	17.1%	Retain 'BUY', backed by INR7.3tn backlog (3.9x FY25 core sales) and a robust pipeline (INR5.92tn) with core OPMs at ~8.3% over FY26E/27E. We are revising consolidated FY26E/27E/28E EPS by -12%/+2%/-4.3% (core EPS unchanged) and raising TP to INR4,850 (from INR4,680)—on higher subsidiary CMP) while valuing core P&M at 25x FY28E EPS.
	Order book	73,31,610	56,42,230	66,70,470	29.9%	9.9%	
	EBITDA Margin (%)	10.4	9.7	10.0			
Siemens	Revenues	38,307	33,601	49,004	14.0%	-21.8%	SIEM posted 5.5% YoY decline in PAT (at INR3.4bn) for Dec-25 quarter (adjusted for one-off labour code impact). Revenue grew ~14% YoY to INR38.3bn (ex-LV) led by MO (+28.1% YoY) and DI (+14.2% YoY), offset by muted OPM of 11% (-50bp YoY). OI grew 19% YoY to INR48.3bn, lifting OB to INR175bn (mere 1x FY25 sales, ex- INR255bn loco order).
	EBITDA	4,219	3,866	6,094	9.1%	-30.8%	
	PAT	3,431	3,632	4,810	-5.5%	-28.7%	
	Order inflows	48,290	42,580	48,000	13.4%	0.6%	However, at ~42x Mar-28E EPS, valuations seem stretched, especially with private capex revival still gradual. We are cutting OPM estimates to 11–11.5% resulting in EPS cut of 8–9% for FY26–28E and roll forward to 45x Sep-28E EPS, revising TP to INR3,070 (from INR3,170); retain 'HOLD'. Key triggers include sustained Smart Infra momentum, acceleration in railway orders and revival in Digital OPMs.
	Order book	4,30,040	4,04,408	4,22,530	6.3%	1.8%	
	EBITDA Margin (%)	11.0	11.5	12.4			
ABB	Revenues	35,570	33,649	33,107	5.7%	7.4%	ABB missed Street's Q4CY25 PAT estimate by ~3% on slower execution (+6% YoY) and 410bp YoY OPM contraction—led by labour code impact, higher QCO-related imported material costs and copper/forex volatility. CY25 OB grew only 2.8% YoY (ex-Robotics, which is held for sale) though traction has improved in large orders from railways, steel chemical and O&G. QCO-related margin pressure shall persist till H1CY26, post-which 12–15% PAT margins are sustainable.
	EBITDA	5,463	6,573	5,004	-16.9%	9.2%	
	PAT	4,343	5,319	4,089	-18.3%	6.2%	
	Order inflows	40,960	26,950	32,330	52.0%	26.7%	Retain 'HOLD', given limited upside despite assuming sustained quarterly OI (INR38–40bn) and OPM revival. We are raising CY26/27E EPS by 2%/12% factoring ~12% revenue CAGR, 16–17% OPM in CY2527E, valuing at 55x Dec-27E EPS with a TP of INR5,860 (from INR5,230).
	Order book	1,04,710	93,800	98,950	11.6%	5.8%	
	EBITDA Margin (%)	15.4	19.5	15.1			
Cummins India	Revenues	30,549	30,860	31,703	-1.0%	-3.6%	KKC's Q3FY26 adjusted PAT at INR5.8bn grew 12.8% YoY (in line with Street estimate) despite flattish revenue (-1% YoY) as OPMs expanded 140bp YoY to 20.8% driven by superior GM. Management continues to target double-digit domestic revenue growth in FY27 supported by higher government infra spending (+9% YoY FY27 budget) and broad based demand across key sectors. KKC continues to remain cautious on exports (down 14% QoQ) and is optimistic on the India growth story.
	EBITDA	6,345	6,000	6,948	5.7%	-8.7%	
	PAT	5,796	5,140	6,377	12.8%	-9.1%	With a stellar stock rally, we find limited scope to raise valuation. Downgrade to 'HOLD' at an unchanged TP of INR4,940 (45x FY28E PE) despite baking in all-time high OPMs (21–21.5%) and robust execution growth (15–16%), implying EPS CAGR of 17% (FY25–28) with 25% RoE.
	EBITDA Margin (%)	20.8	19.4	21.9			
Thermax	Revenues	26,347	25,287	24,739	4.2%	6.5%	TMX missed Street's revenue estimate by 4% as execution growth remained subdued (+4% YoY), but beat EBITDA by 4% on healthy 21% operating margins, driven by a margin recovery in Industrial Infra and Green Solutions. OIs surged 35% YoY to INR31bn. Management guided for a strong finish in Q4FY26 with robust execution and OPM.
	EBITDA	2,548	1,890	1,720	34.8%	48.1%	
	PAT	1,463	1,137	1,194	28.6%	22.5%	
	Order inflows	30,800	22,960	35,510	34.1%	-13.3%	Upgrade to 'BUY' on improving profitability, robust OB and attractive valuations following stock correction. We are factoring in conservative PBT margin of ~10% by FY28E (in line with management guidance) and trimming FY26E/27E/28E EPS by 9%/6%/8%. We roll forward valuation to FY28E and value the company at 36x FY28E EPS to arrive at a TP of INR3,370 (earlier INR3,250); our bull-case TP stands at INR3,740.
	Order book	1,26,410	1,13,830	1,23,000	11.1%	2.8%	
	EBITDA Margin (%)	9.7	7.5	7.0			

Q3FY26 results at a glance (Contd.)

Company	Particulars	Q3FY26	Q3FY25	Q2FY26	Growth (YoY)	Growth (QoQ)	Results at a glance
KEC International	Revenues	60,014	53,494	60,916	12.2%	-1.5%	KEC posted Q3FY26 revenue of INR60bn (+12.2% YoY). OPM disappointed at 7.2% (versus 7.8% estimate/8.5% FY26 guidance) while raw material (+22% YoY) and one-time costs (INR588mn - new labour code) led to a ~36% PAT miss. The Q3FY26 order intake was weak at ~INR32.6bn (9M OI: INR193bn versus INR300bn FY26 target), taking the OB to ~INR367bn (1.7x FY25 sales) plus L1 in ~INR45bn bids. Although long-term T&D-led growth stays intact (58% of OB), margin recovery remains elusive for last two years. We are trimming FY26/27E estimates and rollover valuation to FY28E. Retain 'HOLD' with a lower TP of INR690 (from INR800) at a reduced multiple of 15x FY28E EPS (from 18x on FY27E) given persistent cuts to margin guidance.
	EBITDA	4,321	3,745	4,304	15.4%	0.4%	
	PAT	1,275	1,296	1,608	-1.6%	-20.7%	
	EBITDA Margin (%)	7.2	7.0	7.1			
Kalpataru Power Transmission	Revenues	66,654	57,325	65,286	16.3%	2.1%	KPIL posted Q3FY26 adjusted consolidate PAT of INR1.78bn (-19% versus estimate, +28% YoY) despite in-line execution of INR66.7bn (+16% YoY). Miss was due to lower OPM at 7.7% (8.8% estimate), hurt by Fasttel (Brazil) legacy project losses (margin ~8.6% ex-this), weak water revenue and lower road income post-asset sales. Standalone PAT rose 34% YoY to INR2.1bn, driven by improved working capital and lower interest costs. While Q3 OI fell 79% YoY, YTD OI of ~INR195bn + INR70bn L1 keeps KPIL on track for its FY26 INR250bn-plus OI target. We are tweaking FY26E/27E PAT by 3%/-2%. Retain 'BUY' on KPIL with a revised TP of INR1,428 (earlier INR1,443) at 16x FY28E EPS (from 20x FY27E) led by T&D capex super-cycle in India and the Middle East.
	EBITDA	5,132	4,792	5,613	7.1%	-8.6%	
	PAT	1,785	1,396	2,372	27.9%	-24.7%	
	EBITDA Margin (%)	7.7	8.4	8.6			
Hitachi Energy	Revenues	20,822	16,203	18,326	28.5%	13.6%	Hitachi Energy (HEIL) posted a PAT surge of ~2x YoY (29% beat), led by execution (+28.5% YoY) and 16.6% OPM, marking a second consecutive quarter of mid-teen margins. OI rose 73.7% YoY (ex Khavda HVDC), taking OB to INR299bn (4.7x FY25 sales). Management indicated that no penalties are envisaged for the Maharashtra HVDC project under execution, aiding margin sustainability. Retain 'BUY' as we are factoring in robust execution (+40% CAGR over FY25–27E) given all-time high OB coupled with OPM improving to ~15.6% by FY28E.
	EBITDA	3,453	1,669	2,990	106.9%	15.5%	
	PAT	3,157	1,374	2,644	129.8%	19.4%	
	Order inflows	24,776	1,15,943	22,171	-78.6%	11.7%	
	Order book	2,98,722	1,89,944	2,94,126	57.3%	1.6%	
	EBITDA Margin (%)	16.6	10.3	16.3			
CG Power	Revenues	31,754	25,157	29,228	26.2%	8.6%	CGPIL posted strong execution (+26% YoY), but missed EBITDA estimate by 5% as industrial margins softened on commodity pressures, weaker realisations and adverse railways mix. Power revenue stood out (+44% YoY) with 21.4% OPMs (+380bp YoY). Accelerated transformer capex and rising exports underpin its growth story while OSAT/Axiro provide post-FY29 optionality. Retain 'BUY' from a long-term lens, anchoring on high-growth T&D and potential industrial recovery (private capex revival, Kavach inflows and price hikes). We are cutting FY27E/28E EPS by 6%/8% factoring in ~14% OPM, still implying a ~28% EPS CAGR, yielding base TP of INR733 (55x FY28E PE) and bull-case TP of INR800 (adding OSAT optionality).
	EBITDA	3,973	3,310	3,767	20.0%	5.5%	
	PAT	3,195	2,379	2,844	34.3%	12.3%	
	Order inflows	43,720	36,360	47,720	20.2%	-8.4%	
	Order book	1,57,530	97,241	1,49,530	62.0%	5.4%	
	EBITDA Margin (%)	12.5	13.2	12.9			
GE T&D	Revenues	17,006	10,737	15,385	58.4%	10.5%	GVTD delivered a strong Q3FY26 print with PAT beating consensus expectations by ~40%, supported by stellar execution (+58% YoY) and solid margins (OPM: 26.7%) aided by a higher share of high-margin export contracts, operating leverage and cost efficiencies. Order inflows were equally robust at INR29bn (+41% YoY). Management reiterated that domestic and international pipelines remain strong and maintain OPM in mid-twenties for the foreseeable future. Maintain 'BUY' on the back of strong revenue visibility, revival of tendering anticipated in FY27 and the landmark VSC HVDC win by GVTD. We are raising FY26E/27E/28E EPS by 17%/1%/10%, and value the company at 55x PE to arrive at a TP of INR3,710 (earlier INR3,680).
	EBITDA	4,546	1,797	3,965	153.0%	14.7%	
	PAT	3,601	1,427	2,995	152.4%	20.2%	
	Order inflows	29,361	20,800	16,061	41.2%	82.8%	
	Order book	1,43,800	1,07,800	1,31,056	33.4%	9.7%	
	EBITDA Margin (%)	26.7	16.7	25.8			
Voltamp	Revenues	6,303	4,835	4,826	30.4%	30.6%	Voltamp Transformers (VAMP) beat Q3FY26 consensus estimate by a mile with execution surging 30.4% YoY while OPMs remained slightly underwhelming at 17.1% (versus Street at 17.8%) led by heightened competition in > 220kV segment coupled with higher staff cost (+56% YoY) in our view. 9MFY26 OI expanded 20% YoY taking the backlog to INR15.7bn (0.8x FY25 sales). Retain 'BUY' with stronger growth and OI visibility from Q4FY26E, as expanded capacity should drive order inflows. We reckon OI/revenue CAGR of 16%/14% over FY25–28E with OPM normalising to ~16.5% amid rising competition. We are raising FY26/27E EPS by 9%/7% and value the company at 25x PE, yielding an unchanged TP of INR10,200.
	EBITDA	1,077	990	936	8.8%	15.2%	
	PAT	991	734	789	35.0%	25.7%	
	Order inflows	6,040	6,483	6,294	-6.8%	-4.0%	
	Order book	15,735	11,140	15,999	41.3%	-1.6%	
	EBITDA Margin (%)	17.1	20.5	19.4			
Skipper	Revenues	13,706	11,352	12,618	20.7%	8.6%	Skipper reported PAT growth of 46% YoY in Q3FY26 led by revenue of INR13.7bn (+20.7% YoY, 3% below estimate), aided by a pickup in infra segment (+32% YoY) and continued strong growth (+20% YoY) in engineering products segment (~80% of sales). Engineering OPM at 11.6% lifted overall OPM to 10.3% (+50bp YoY). Management has guided for 20% revenue growth in FY26 implying an ask-rate of ~29% for Q4FY26, which is likely achievable in a seasonally strong quarter. We are cutting FY26E/27E EPS by 2.2%/2% and rollover to FY28E with an OPM of 10.4% by FY28E. Retain 'BUY' with a revised TP of INR540 at 18x FY28E EPS of INR30 (multiple slashed from 25x earlier in line with larger peers such as KEC and KPIL).
	EBITDA	1,412	1,109	1,307	27.3%	8.0%	
	PAT	528	361	450	46.2%	17.3%	
	EBITDA Margin (%)	10.3	9.8	10.4

In the United Kingdom, this research report is being distributed only to and is directed only at (a) persons who have professional experience in matters relating to investments falling within Article 19(5) of the FSMA (Financial Promotion) Order 2005 (the "Order"); (b) persons falling within Article 49(2)(a) to (d) of the Order (including high net worth companies and unincorporated associations); and (c) any other persons to whom it may otherwise lawfully be communicated (all such persons together being referred to as "relevant persons").

This research report must not be acted on or relied on by persons who are not relevant persons. Any investment or investment activity to which this research report relates is available only to relevant persons and will be engaged in only with relevant persons. Any person who is not a relevant person should not act or rely on this research report or any of its contents. This research report must not be distributed, published, reproduced or disclosed (in whole or in part) by recipients to any other person.

Disclaimer for Canadian Persons
This research report is a product of NWML, which is the employer of the research analysts who have prepared the research report. The research analysts preparing the research report are resident outside the Canada and are not associated persons of any Canadian registered adviser and/or dealer and, therefore, the analysts are not subject to supervision by a Canadian registered adviser and/or dealer, and are not required to satisfy the regulatory licensing requirements of the Ontario Securities Commission, other Canadian provincial securities regulators, the Investment Industry Regulatory Organization of Canada and are not required to otherwise comply with Canadian rules or regulations regarding, among other things, the research analysts' business or relationship with a subject company or trading of securities by a research analyst.

This report is intended for distribution by NWML only to "Permitted Clients" (as defined in National Instrument 31-103 ("NI 31-103")) who are resident in the Province of Ontario, Canada (an "Ontario Permitted Client"). If the recipient of this report is not an Ontario Permitted Client, as specified above, then the recipient should not act upon this report and should return the report to the sender. Further, this report may not be copied, duplicated and/or transmitted onward to any Canadian person.

NWML is relying on an exemption from the adviser and/or dealer registration requirements under NI 31-103 available to certain international advisers and/or dealers. Please be advised that (i) NWML is not registered in the Province of Ontario to trade in securities nor is it registered in the Province of Ontario to provide advice with respect to securities; (ii) NWML's head office or principal place of business is located in India; (iii) all or substantially all of NWML's assets may be situated outside of Canada; (iv) there may be difficulty enforcing legal rights against NWML because of the above; and (v) the name and address of the NWML's agent for service of process in the Province of Ontario is: Bamac Services Inc., 181 Bay Street, Suite 2100, Toronto, Ontario M5J 2T3 Canada.

Disclaimer for Singapore Persons
In Singapore, this report is being distributed by Nuvama Investment Advisors Private Limited (NIAPL) (Previously Edelweiss Investment Advisors Private Limited ("EIAPL")) (Co. Reg. No. 201016306H) which is a holder of a capital markets services license and an exempt financial adviser in Singapore and (ii) solely to persons who qualify as "institutional investors" or "accredited investors" as defined in section 4A(1) of the Securities and Futures Act, Chapter 289 of Singapore ("the SFA"). Pursuant to regulations 33, 34, 35 and 36 of the Financial Advisers Regulations ("FAR"), sections 25, 27 and 36 of the Financial Advisers Act, Chapter 110 of Singapore shall not apply to NIAPL when providing any financial advisory services to an accredited investor (as defined in regulation 36 of the FAR. Persons in Singapore should contact NIAPL in respect of any matter arising from, or in connection with this publication/communication. This report is not suitable for private investors.

Disclaimer for Hong Kong persons
This report is distributed in Hong Kong by Nuvama Investment Advisors (Hong Kong) Private Limited (NIAHK) (Previously Edelweiss Securities (Hong Kong) Private Limited (ESHK)), a licensed corporation (BOM -874) licensed and regulated by the Hong Kong Securities and Futures Commission (SFC) pursuant to Section 116(1) of the Securities and Futures Ordinance "SFO".
