Maintain strong performance, consolidation on cards

Strong results with 31% YoY sales growth and 45% YoY PAT growth. Domestic remained strong with 35% YoY growth, while exports (up 16% YoY) has been slightly impacted because of US tariffs as company is currently bearing half of the 25% tariffs. Export sales has improved QoQ, which shows the resilience in the supply chain. Company continues to diversify its business operations with non-Automotive sales growing by 2.4x, resulting into segment mix of Automotive/Defense/Arine of 82%/6%/6.5% respectively, which it expects to increase to 65%/20%/15% by FY28. The segment mix is key part of equity story as it will lead to ~8-10% product mix growth over next three years. Company is also setting up forging line which will start production in Q4FY26, which will drive higher EBITDA margin. Company maintains strong momentum in the orderbook with total orders now standing at more than INR1,200cr vs 720cr at time of FY25 results. We retain 'BUY' and increase our TP of INR430, implying a 30% upside from its CMP.

CMP: INR330
Rating: BUY
Target price: INR430
Upside: 30%
Date: November 14, 2025

Bloomberg:	OBSCP:IN
52-week range (INR):	355 / 122
M-cap (INR cr):	829
Promoter holding (%)	73.5

Strong numbers with sales and PAT growth of >30%, but debt levels have increased

Revenues: Revenue from operations increased 31% YoY to INR89cr in 1HFY26. Domestic sales increased 35% YoY to INR70cr, while export sales increased 16% to INR17cr. **Segments:** Company continues to diversify its business operations. Non-Automotive sales contribution to group sales increased to 17.6% in 1H from <9% as of FY25. Sales contribution from Defence/Marine increased to 6.2% / 6.5% in 1H as compared to 3.9% / 4.2% in FY25. In terms of growth rate, automotive sales increased 16% YoY, while Defense sales have more than tripled and Marine recorded 60% YoY growth. **EBITDA** increased 32% YoY to INR16cr. EBITDA margin came at 18.0% in line with last year. **Reported PAT** increased 45% YoY to INR11cr. There was higher depreciation expense, which was offset by higher other income (from FX effect). EPS increased 6% YoY to INR4.30. Lower EPS growth is because of dilution as company raised funds (via IPO) in Oct 2024. Company net debts have increased to INR33cr in 1HFY26, from INR10cr in FY25. The increase in debt is driven by i) higher short-term debt (INR21cr) for working capital, ii) lower cash balance as company used its IPO proceeds.

Order book expansion continues, to add a forging line

Company orderbook now stands at more than INR1,200cr as compared to INR720cr orderbook as of FY25. Automotive business orderbook stands at INR986cr, Defense at INR133cr and Marine at INR60cr. The incremental orders (vs FY25) has primarily come from Automotive business. All these orders (except defence) are expected to be executed over the next five years while defence orders are for period of over eight-to-nine years, which implies incremental annual sales of more than INR50cr over coming period. The company is adding a new forging line whose commercial production will start from Q4FY26. We highlight that company will use forging both for captive and external revenue generation, but we consider any external revenues from Forging business as we don't have much clarity on revenue segregation between captive and external usage.

Fund raise to consolidate the business under one roof

Company is planning to raise funds for which it has called a board meeting on 17-Nov. We believe that this fund raise will be used to setup a new giga factory as company plans to bring the production under one roof. We highlight that currently company rents out 4 plants in Pune. Consolidating them under same roof will lead to saving of rental expenses, while also saving some logistics and overhead costs.

Valuation and View

We like the investment thesis of the company and remain positive on the stock. Company has already increased its capacity by >30% in FY25 and H1FY26 and further incremental capacity addition is on the cards. The average realization and product mix is also expected to increase, which will drive sales growth of >30% CAGR over next three years. Company has orderbook to support the above sales growth. Our forecast implies sales/EBITDA/PAT to grow by +36%/43%/39% CAGR between FY25-28e. Currently, the stock is trading at 25.6/18.0x FY27/28E P/E. We reiterate 'BUY' and increase TP to INR430 (implying 24.4x FY28E P/E), an upside of 30% from its CMP.

Revised estimates

We slightly increase our sales estimates driven by better than expect sales growth and higher utilisation of existing facilities. We expect company to maintain its EBITDA margin between 19-20% level. We slightly trim our EBITDA estimates mainly because of tariffs issue as company's Marine business is entirely US business, which attracts 25% tariffs. However, there is going to be extra benefits from i) lower rental expenses related to four factories and ii) lower logistics costs, leading to cost savings of ~100bps.

Company has taken some debt for working capital purpose leading to higher interest expense resulting into cut in our PAT estimates. There is going to be dilution from the fund raise leading to ~10% cut in EPS estimates for FY27-28E.

Valuation

We now roll forward company valuation to FY28E (vs previously average of FY27/28E) and value the company at 15.0x FY28E EV/EBITDA. Our valuation implies ~35% discount to the peers average. Based on the above methodology, we arrive at target price of INR430 for the company. Our target price implies FY27/28PE of 34.8x/24.4x. We highlight that there is going to be dilution post the fund raise, leading to higher number of shares outstanding.
