Belrise Industries Ltd (BIL) is a manufacturer of automotive components such as sheet metal and casting components, polymer components, suspension and mirror systems. Its operations are based across India with 20 manufacturing facilities across 9 States in close proximity to major automotive manufacturing clusters. Its annual production capacity stands at more than 60,000 ton per annum. BIL's key markets include India as well as Austria, Slovakia, UK, Japan and Thailand.

Investment rationale:

Leading market share in two-wheeler components: BIL is one of the top suppliers of two-wheeler (2W) metal components in the domestic market with a market share of 24%. It manufactures chassis system sub-assemblies for 2W along with shock absorbers, front fork assembly, head lamp brackets, seating cowl, exhaust system and BIW (Body In White) parts. BIL is a single source supplier across many components. Company has already achieved its targeted content per vehicle of Rs 17,300 in certain two-wheelers with incremental growth targeted from cross sell and adding more OEMs.

Long standing customer relationships with leading OEMs: BIL has long-term relationships with several client OEMs since last 10-15 years. It has primarily been a supplier of two-wheeler chassis assembly and various other sub-assemblies and has recently gained entry into the chassis systems for PV and CV as the industry looks at outsourcing. BIL also has gained business on the non-automotive particularly in the defence and solar sectors which helps the company to increase capacity utilization at its facilities.

Transition from Tier 1 to Tier 0.5 System Supplier: BIL is moving from delivering individual parts to providing complete, fully integrated subsystems which will improve the value addition and content per vehicle along with improvement in customer retention. BIL is in talks with a CV OEM for manufacturing of the chassis which is currently manufactured in-house by the OEM.

Capacity expansion to also drive growth: The six new facilities (2 at Chennai, 1 at Pune, 1 at Bhiwadi and the two acquired facilities of H-One) are set to drive future growth for BIL. The Chennai facility has ramped up production, delivering components for a premium 2W and a leading CV OEM. The Bhiwadi plant will cater to two leading passenger vehicle OEMs and two two-wheeler OEMs and is expected to start commercial operations in 3QFY26, contributing significantly to the revenue.

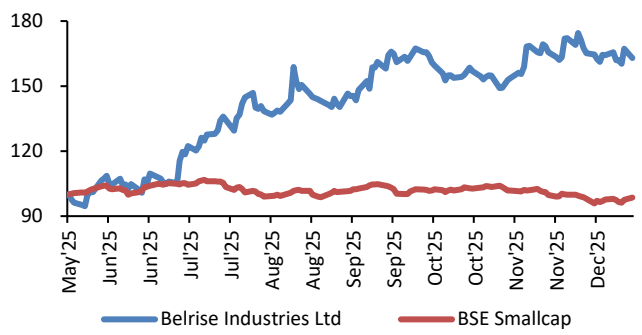
Acquisitions to expand product portfolio and drive improvement in content per vehicle: BIL has made 2 acquisitions in the recent past – H-One India and Mag Filters. These acquisitions will expand BIL's product and customer portfolio. H-One India and Mag Filters have the potential to increase BIL's content per vehicle by ~Rs 15,000/~Rs 1,000 in four-wheelers respectively. Besides, it adds 1 new Japanese 4W OEM as a customer. BIL has gained entry into the MHCV segment through

the H-One acquisition with receipt of purchase orders for chassis components from a leading CV OEM. The acquisition of H-One has boosted BIL's high tensile steel handling capabilities.

Valuation attractive: BIL has repaid debt of Rs 1,596 cr through the IPO proceeds leading to halving of long term debt. This debt reduction will lead to significant interest cost savings and improve the earnings profile of the company. At CMP of Rs 167, the stock trades at 30.5x FY26E/28.5x FY27E/21.8x FY28E consensus estimated earnings. Improving content per vehicle, foray into defence manufacturing as well as wider product and customer mix are expected to drive earnings growth.

Key Risks: Delay in ramp-up of acquired companies and new capacities; Delay in launch pipeline of OEMs

Stock Performance



Shareholding Pattern (Sep'25)
