Deep Industries (DIL) reported strong result in Q3FY26 where revenue/PAT were in line with estimates while EBITDA beats expectations. Reported revenue jumped 43% YoY (flattish QoQ) to Rs2.2bn led by higher fleet utilization and robust execution of secured long-duration contracts. EBITDA increased 50% YoY/9% QoQ to Rs 1bn with EBITDA margin expanding to 45.2%, up ~211 bps YoY and ~378 bps sequentially due to operating leverage and cost optimization. Adj. PAT came in at Rs681 mn (+56% YoY, +1% QoQ), with PAT margin improving to 30.7% as interest cost declined 34% QoQ, supporting earnings resilience and deleveraging. The company's 45%+ EBITDA margins stand out, highlighting execution strength and niche positioning, particularly in gas compression business. Key monitorable: new order wins and fleet additions, the sustainability of recent COGS optimization, and margin behavior. We remain constructive on DIL's long-term growth trajectory and we expect revenue to clock an impressive ~34% CAGR during FY25-FY28E, accompanied by an expansion in operating margins to 40–43% vs ~40% in FY25. We marginally raise our revenue/EBITDA/PAT estimates for FY26E by 3.9%/5.4%/6.1% due to marginal improvement across segments, keeping FY27E & FY28E largely unchanged. We reiterate our BUY rating on the stock with a revised TP of Rs693.

Robust order book and PEC ramp-up supports strong growth outlook

Deep Industries exited the quarter with a strong order book of Rs29.7bn (9.8% YoY), providing strong medium-term revenue visibility. Order inflows in Q3 were muted at ~Rs1.4bn, but management expects a meaningful spillover into Q4, supported by an active bidding pipeline of ~Rs8bn, where the company is L1 in couple of tenders. Bid conversion remains healthy, with >50% success rate in select verticals. The acquisition of Kandla Energy (~Rs20mn) was positioned as a strategic backward integration play; commercialization is expected in H2FY27. The company has already deployed a new rig in Dec'25 and expect one more to be deployed by Mar'26. While PEC contributed mere Rs0.2bn, it is expected to ramp upto Rs1.5bn+ in annual run rate by FY28. Management guided for >30–35% revenue growth in FY27, with a similar trajectory expected in FY28, driven by full-year contribution of newly deployed assets, ramp-up of PEC contracts, and expansion across all 4 business verticals. The PEC fire incident is expected to result only in a 2–3 month revenue deferral, with no penalties or adverse impact on ONGC contract eligibility.

Re-iterate BUY, revised TP to Rs693 (earlier Rs702)

DIL a pioneer & 'one-stop solutions provider' for post exploration services is expected to continue its growth momentum, driven by consistent operational performance and healthy asset utilization across all core service offerings. The company's performance was supported by fixed-price, long-term contracts (mostly ~3 years) and limiting exposure to crude volatility. The company anticipates strong momentum, targeting >30-35%+ YoY growth in FY27 and FY28, underpinned by a full-year benefit from PEC, new rig additions, and Dolphin Offshore's ramp-up. We forecast EBITDA/PAT CAGR of 35%/32% over FY25-FY28E. The stock is trading very cheap at 8.9x on FY27E and 7.5x on FY28E vs previous five-year average one-yr fwd PER multiple of 12x. Maintain BUY with a revised TP of Rs 693 from earlier Rs702.

Investors are advised to refer disclosures made at the end of the research report.

Q3FY26 Concall Highlights:

Robust orderbook & Revenue Visibility:

- Order book at Rs29.7bn, offering strong revenue cover over the next 2–3 years.
- Q3 order inflows relatively muted at ~Rs1.4bn, with spillover expected into Q4.
- Active bidding pipeline ~Rs8bn, excluding offshore opportunities under evaluation.
- Company currently L1 in 1–2 tenders.
- Success rates exceed 50% in certain verticals, reflecting competitive positioning.
- Offshore bidding opportunities may add upside optionality.

PEC Fire Incident – Financial & Contractual Impact

- No penalty clauses under ONGC contract; only revenue deferral of 2–3 months for one well.
- Payments made were ONGC's CSR initiative, not Deep's contractual obligation.

Kandla Energy Acquisition & Receivables

- Backward integration for drilling fluids; acquisition cost ~Rs20mn including land.
- No payment made for receivables; recovery attempts ongoing; no provisioning expected in FY26.
- Commercialization targeted in H2FY27.

Guidance & Strategic Direction

- Revenue growth guidance of >30–35% YoY for FY27, with similar growth momentum expected in FY28.
- Growth driven by full-year impact of new rigs, PEC ramp-up, and steady offshore contribution.
- Actively evaluating higher HP rigs to address strong domestic demand.
- Client concentration risk mitigated gradually with exposure to Oil India, GSPCL, Vedanta, alongside ONGC/GAIL.
- Exploring CCUS and compressed biogas as adjacency options (early-stage, no committed CapEx).

Industry & Macro Comments:

- India's oil & gas sector in a multi-year investment upcycle, with >$100 bn capex targeted by 2030.
- Natural gas demand in India projected to grow ~60% by 2030.
- Lower crude prices have minimal impact on Deep's earnings due to service-led revenue model.
- Global geopolitical shifts (e.g., Venezuela) may unlock incremental offshore opportunities.
