Titagarh Rail Systems Ltd reported a strategically divergent quarter with Passenger Rail Systems offsetting weakness in Freight. Freight revenues declined to ~Rs 6bn (vs ~Rs 8bn YoY) due to wheelset supply mismatch. Management expects internal wheel JV trials by Mar–Apr with stabilization in 1–2 quarters which should eliminate external dependency and help normalize freight production. Passenger revenues surged 4x to ~Rs 1.6bn, while EBITDA improved to ~Rs 220mn (vs Rs 50mn), reflecting operating leverage benefits. The passenger order book remains strong at ~Rs 180bn (incl. JV). Key milestones include Ahmedabad Metro series production, Vande Bharat car body completion targeted by Mar'26, and execution across Pune, Bangalore, Gujarat and Mumbai Metro. Backward integration remains core, supported by expanded ABB technology transfer and ~Rs 10bn CapEx towards aluminium coach facilities (completion by H1FY27).

Management termed FY27–FY28 as defining years, with Passenger expected to dominate the portfolio over the next 1–2 years. Freight margins are guided at 11–12.5%, supported by the 3bn ton freight target by 2030, though near-term output hinges on wheelset normalization. Passenger margins have reached 11–12% EBITDA and are targeted to scale to ~15% over the next couple of years with deeper localization and propulsion integration. Metro production is expected to approach ~20 cars/month, with FY26 output close to the 100–120 car aspiration. The ongoing ~Rs 10bn CapEx sufficiently covers the existing order book including Vande Bharat, while incremental large-ticket opportunities may require fresh investments. Structural tailwinds from metro expansion and high-speed rail corridors provide multi-year visibility.

Positioning for the next phase of growth

TRSL has also secured a wagon leasing license as a strategic extension of its product offering—primarily to enable entry into private wagon maintenance rather than to build an asset-heavy leasing business. The shipbuilding business has been demerged into a 100% subsidiary, Titagarh Naval Systems, with a potential separate listing envisaged over the long term. At the Italian subsidiary Firema, the technology transfer objective to India has been successfully achieved, although the European production strategy failed; Italian State Railways has made an acquisition offer, though there is no impact on Indian operations. Looking ahead, FY27 and FY28 are expected to be defining years driven by passenger segment ramp-up across metro, Vande Bharat, and propulsion systems, while freight demand remains structurally healthy despite near-term volatility as management sees the government's push for high-speed corridors as a significant long-term opportunity, maintaining a cautiously optimistic outlook. Key monitorable include potential recurrence of wheelset supply disruptions until internal manufacturing stabilizes, execution risks amid rapid passenger ramp-up, and timely completion of the aluminium coach facility alongside propulsion integration.

Maintain BUY with a revised TP of Rs 1,043

TRSL's current FRS order book is enough till Q2FY27 but the management is quite hopeful of a large tender by IR before that. This huge overhang is likely to get offset partially by a strong execution at PRS where the company is maintaining total 100-120cars to be manufactured in FY26 and 20cars/month in FY27. We cut our FY26/FY27E EBITDA estimates by 14% and 5.7% for FY26E and FY27E respectively on lower FRS execution owing to wheelset supply issues. We cut number of freight wagons manufacturing to 7,200 and 9,000 from earlier 8,400 and 9,600. We introduce FY28 estimates and forecast revneue/EBITDA CAGR of 26%/23% during FY25-FY28E. We rollover our TP to FY28 and revise it to Rs1,043 from earlier Rs1,023. Maintain BUY.

Investors are advised to refer disclosures made at the end of the research report.

Q3FY26 Concall Highlights:

Freight Rail Systems

- Production capacity stands at 1,000 wagons per month; wheelset availability remains the primary constraint.
- Orders are secured for production coverage through H1 FY27.
- Logistics market share target of 40% (vs ~25–26% currently) remains.

Passenger Rail Systems

- Passenger segment now ~75%+ of order book
- **Metro Cars:** 9MFY26 production stood at 39 cars; FY26 target remains 100–120 cars (likely marginally lower) with Q4 ramp-up underway, aiming for a 20 cars/month run-rate over the next few months, while the CRRC (Bangalore) backlog is expected to be closed by FY27 (with possible minor spillover into early FY28)

Project Updates

- Ahmedabad Metro – Series production commenced.
- Pune Metro (Aluminium Coaches) – Car body production expected in Q3/Q4 FY27 after aluminium line completion.
- Execution commenced for Gujarat Metro in the current quarter, while Mumbai Metro execution is scheduled to begin in Q3 FY27.
- Vande Bharat – Production underway; first rake car bodies (16 cars) expected by March 2026. First complete train targeted in Q3 FY27. Partial revenue possible in Q4 FY26.

Strategic Initiatives

- Technology and Integration: The expanded partnership with ABB enables transfer of 25 kVA TCMS and traction converter & motor manufacturing technology, giving the company complete in-house metro propulsion capability.
- Aluminium coach manufacturing facility: The new end-to-end aluminium metro coach facility, targeted for completion by Q2 FY27, will eliminate import dependence on sub-assemblies and position the company for high-speed and semi-high-speed train manufacturing.
- Propulsion: First EMU propulsion set approved by Research Designs and Standards Organisation; order book of ~Rs500 crore with revenue contribution expected from FY27 onward.
- ABB Expansion: Transfer of Technology with ABB expanded to include 25kVA TCMS (in addition to 750kVA), strengthening value chain control with in-house manufacturing of traction motors and converters.
- 1.6 km test track under development, serving as a critical enabler for high-speed train ambitions.
