Deep Industries (DIL) delivered a robust performance in Q2FY26, as revenue/EBITDA beat our estimates by 7%. DIL's revenue increased 69% YoY/11% QoQ to Rs 2.2bn (our est. Rs2.06bn) led by 1) higher rig utilisation, 2) increased revenue from gas processing & production enhancement contract (PEC), and 3) increased revenue from Dolphin offshore. Gross profit margin also expanded by 132bps QoQ to 55.7% due to higher contribution from high margin Dolphin offshore. Consequently, EBITDA stood at Rs916mn, up 59% YoY/12% QoQ as EBITDA margin rose 55bps to 41.45% during the quarter. Higher depreciation and interest expense was offset by higher other income. The company's PAT came in at Rs 674mn, registering a stellar 76% YoY and 15% QoQ rise. The company's order book remained solid at ~Rs30.5bn, growing at 16.3% YoY & ~53% CAGR since FY22, offering long-term visibility with Rs16.5bn executable over the next 2.5 years. DIL also witnessed strong standalone growth aided by the commissioning of 6 new rigs and 1 new gas processing project over the past eight months. We remain constructive on DIL's long-term growth trajectory and expect revenue to clock an impressive ~32% CAGR during FY25-FY28E, accompanied by an expansion in operating margins to 44–45% vs ~40% in FY25. We marginally tweak our revenue/EBITDA/PAT estimates for FY26E by 5.7%/4.3%/6.7%, keeping FY27E & FY28E largely unchanged. We reiterate our BUY rating on the stock with a revised TP of Rs702.

Solid Execution and Capital Strength; Expect H2FY26 to be better than H1

PEC which commenced in Apr'25 is progressing well with stable production exceeding baseline levels, expected ~Rs350mn in H2FY26, can scale upto Rs1.4bn+ in FY27, with a strong ~50% EBITDA margin. The rig segment remains buoyant, with 2 rigs being imported from China for deployment, one in Dec'25 and another in Q4FY26. DIL's bidding pipeline is over Rs7bn, while they continue to bid for new and multiple projects every month. Bidding for new and multiple projects every months. The Dolphin Offshore subsidiary is poised to close FY26 with ~Rs1bn revenue, with growth expected to accelerate beyond FY27 (targeting 40%+ YoY growth and ~80% EBITDA margin) as 2 additional assets are added to its fleet. The management reiterated confidence in sustaining growth through strategic Rs6bn capex, of which Rs1bn has already been incurred, funded partly via an approved Rs3bn+ QIP aimed at a) accelerating capacity expansion, b) asset acquisition, and c) balance sheet fortification. Despite robust cash generation and low leverage, the management informed the QIP is designed to enable proactive growth and acquisition readiness.

Re-iterate BUY, revised TP to Rs702 (earlier Rs693)

DIL kicked off H1FY26, benefiting from strong execution, efficient asset utilization, and buoyant activity in India's oil & gas ecosystem. The company's performance was supported by fixed-price, long-term contracts (mostly ~3 years), limiting exposure to crude volatility. ONGC's exposure to total revenue has reduced to ~60% from earlier 75-80% levels, with new private client additions and overseas exposure. The company anticipates strong momentum, targeting 35%+ YoY growth in FY26 and atleast similar growth in FY27, underpinned by a full-year benefit from PEC, new rig additions, and Dolphin Offshore's ramp-up. We expect EBITDA/PAT CAGR of 37%/33% over FY25-FY28E. Maintain BUY with TP of Rs 702.

Investors are advised to refer disclosures made at the end of the research report.

Q2FY26 Concall Highlights:

Robust orderbook & Revenue Visibility:

Dolphin Offshore:

- The subsidiary is expected to close FY26 with a top line of around Rs1bn. The company anticipates significant growth in Dolphin Offshore from FY27 onwards with the addition of two more assets to the fleet.
- The growth is expected to be more than 40% YoY, with high EBITDA margins of 80%+. The company has shortlisted and is in advanced negotiations for these assets, planning to acquire old assets and get them ready.

PEC (Rajahmundry):

- The PEC, which commenced operations in April 2025, is progressing smoothly with stable production and ongoing optimization initiatives.
- The management expects EBITDA margins of ~50% from this contract, reflecting strong profitability and operational efficiency.

Drilling Rigs Segment:

- 2 new rigs are being imported from China, with one expected to be deployed in Dec'25 and the second in Q4 FY26.
- The company has submitted bids for multiple new rig tenders and is currently awaiting the outcomes, indicating a strong order pipeline.

Outlook & Guidance:

- *Revenue Growth:* The company expects to close FY26 with a growth of more than 35%+ YoY. For FY27, expected to be minimum 35% YoY, potentially higher, driven by the full-year contribution from the PEC, additional rigs, and Dolphin Offshore.
- *EBITDA Margins:* EBITDA margins are expected to improve further and grow upwards beyond 45% in coming quarters, driven by the increasing volume from the production enhancement contract and new assets. Standalone margins (excluding other income) are also expected to improve to 40% from the current 37% in coming quarters.
- *Long-term Growth Visibility:* Based on the existing order book, a 30-40% growth rate is clearly visible for the next 2 years. This momentum can continue beyond two years, depending on further additions to the order book.
- *Government Push:* The government's strong push for energy self-reliance and increased domestic oil and gas production is evident from the volume of tenders, inquiries, and orders received, as well as initiatives like PEC.
