Investors are advised to refer disclosures made at the end of the research report.

ABDL's robust manufacturing and distribution capabilities, supported by backward integration and portfolio premiumization, should drive strong growth and profitability in the company, in our view. Company should benefit from the cut in custom duties on the import of raw scotch. ABD Maestro should drive the growth in super premium and luxury portfolio going ahead, however due to higher brand investments the venture is expected to become EBITDA positive only by FY28E. Over FY25-28, we estimate revenue CAGR of 14.2% driven by a volume CAGR of ~11%. We project P&A volumes to grow at 20.6% CAGR while mass premium portfolio volumes to growth at 2.7% CAGR during FY25-28. We expect EBITDA to grow at CAGR of 23.6% during the same period. We have build in EBITDA margin expansion of ~327 bps over FY25-28 taking the margin from 12.2% in FY25 to 15.5% in FY28E. We anticipate PAT CAGR of 31.5% over FY25-28. We reiterate our BUY rating on the stock with a revised target price of Rs 720 (vs Rs 738 earlier), based on 47x Dec 2027 EPS.

Conference call takeaways

Financial performance and margin expansion

- Margin drivers: Improvement was attributed to a better product mix, operating leverage, and early benefits from backward integration. The company has revised its long-term EBITDA margin guidance for FY28 to 17%/18% (up from 15%) due to faster-than-expected gross margin progress.
- Realization: Realization per case improved by 0.7% in Q3, driven by the shift toward premium products and selective price increases at the industry level.

Strategic Brand performance

- Iconic White: This brand is the standout performer in the Prestige & Above (P&A) segment. It sold 7.7 mn cases in 9MFY26, surpassing its total FY25 volume of 5.7 mn cases, and is on track to reach 10 mn cases in FY26. It is currently running at a 12-mn-case annual run rate (ARR).
- Officer's Choice: Maintains its leadership in the mass premium segment and remains India's top exported whiskey. It continues to deliver strong gross margins of ~45%.
- Sterling Reserve (SRB) B7: While currently experiencing some volume degrowth, the company launched a refreshed blend and plans to introduce contemporary packaging in Q1FY27 to regain traction.
- Canteen Stores Department (CSD): Four brands—Jolly Roger Rum, SRB B7, Kyron, and Iconic White—have received approval for the CSD market, opening a highly profitable growth channel.

Premiumization and luxury portfolio (ABD Maestro)

- Luxury brands: The luxury portfolio now consists of nine brands. Zoya has grown 300% since its launch, with 30% of sales coming from flavors.
- Revenue contribution: The luxury portfolio generated an ARR of Rs 400mn by end of Dec 2025, and expects the ARR to touch Rs 800 mn by end of March 2026.

Backward integration and capex

- Phase 1 Projects: A new pet bottle manufacturing facility is fully commissioned. A malt distillery in Telangana and an ENA plant in Maharashtra are on track to enhance gross margins by 300 bps by Q4 FY28.

- Phase 2 Investments: ABD announced a Rs 1.1 bn investment in Uttar Pradesh for a fully automated bottling facility, which will save a franchise fee of Rs 27 per case. Another Rs 540 mn is being invested in Maharashtra to expand bottling capacity at the Aurangabad facility.
- Self-sufficiency: The company aims to increase its in-house ENA production from the current 70 mn liters to 200 mn liters by the end of FY28 to match its total consumption.

Regional challenges and market dynamics

- Telangana: Q3 volumes were impacted by a 6–8-week disruption caused by the retail license auction process, which led to temporary destocking by retailers. Despite this disruption, the P&A category in the state grew 17% with ABDL's P&A portfolio slightly outperforming at 17.5% growth. However, mass premium segment saw a 7.4% degrowth. Management noted that stocking patterns began normalizing in January 2026. ABDL also maintains 25% market share in the premium brandy segment in the state with its Kyron brandy. Management noted that some long pending overdues in the Telangana market were cleared in Q3 for the industry.
- Maharashtra: Policy-driven price changes negatively affected consumer affordability, leading to a double-digit industry volume decline. ABD has factored these lower levels into its future modeling. Following a High Court advisory, the industry players have applied to participate in the MML category, on similar terms Minakshi Agro subsidiary of ABDL has filed an application to participate in the MML category. Management believes they qualify for this category and if approved the newly expanded bottling facility will be used to serve the MML market. This represents a significant potential growth opportunity that is not yet factored into growth guidance.
- International expansion: ABD expanded its footprint from 14 to 31 countries over the last 21 months, with a target of 35 countries by Q4 FY26.

Outlook

- Growth guidance: Management is targeting double-digit value growth in Q4 FY26 as regional markets stabilize.
- UK FTA: The company remains optimistic about the India-UK FTA, guiding for potential implementation by Q2FY27, which could add an incremental 200 bps to margins.
