Aurionpro Solutions: From Services Player to Global IP-Led Powerhouse

Aurionpro Solutions Limited (ASL) follows a product-led, IP-driven model, with Banking & Financial Services contributing ~54% of revenue and the Technology Innovation Group ~46%. It monetizes its platforms through licensing, implementation, and maintenance with ~60% recurring revenue, enabling scalable, AI-driven, non-linear growth.

The global Transaction Banking market is expected to grow at a CAGR of ~13.5% through 2031, while the Automatic Fare Collection (AFC) market is projected to grow from USD 11.2 bn to USD 17.9 bn by 2029 (~7% CAGR). Meanwhile, India's data center capacity is expected to increase from ~1.3 GW in FY25 to ~15–17 GW by FY35 (~30–35% CAGR), driven by cloud, AI, and data localization demand. With presence across all three segments, we expect Aurionpro to capture this opportunity through its IP-led platforms, specialized offerings, and sustained R&D investments (~8–9% of revenue), enabling scalable growth, operating leverage, and margin expansion.

In the Banking platform segment, we expect Aurionpro to grow through cross-selling iCashPro and SmartLender across its existing bank and financial institution client base and expanding internationally, addressing a ~ USD 1.2–1.5 bn serviceable market. Average deal sizes are INR 60–70 cr for two modules, and the business generates ~60% recurring revenue through AMC, upgrades, and additional module sales, providing strong revenue visibility. The IP-led platform model enables operating leverage, as revenue growth does not require proportional increase in costs, supporting margin expansion. We expect the segment to deliver ~25–30% revenue CAGR with ~28–30% EBITDA margins.

In the Transit segment, Aurionpro is expected to benefit from metro expansion, open-loop upgrades, and system revamp opportunities. Its end-to-end capability enables participation across the project lifecycle, resulting in higher project value, recurring maintenance and revenue-share income, and stronger margins. Execution visibility remains strong, driven by projects such as Mumbai Metro (~INR 250 cr) and Delhi Metro, along with an executable order book of ~INR 600–700 cr over the next 4–5 quarters, supporting 20%+ margins.

Aurionpro's Data Center business follows a capital-light design and consultancy model, enabling participation in high-value projects without balance sheet risk. With project sizes of ~INR 100–125 cr and recent large wins including a ~ INR 350 cr Adani project, the order book has increased to ~ INR 500–600 cr, providing strong revenue visibility. As execution scales and hyperscale projects increase, margins are expected to expand from ~15–16% to ~20–22%.

Aurionpro has delivered ~32% revenue CAGR over the last three years, with EBITDA and PAT CAGRs of ~30% and ~36%, reflecting strong operating leverage and scalable growth. Over FY25–28E, we forecast consolidated revenue, EBITDA & PAT CAGRs of 28.8%, 29.9% & 29%, respectively, reaching INR 2,507 cr, INR 530 cr & INR 400 cr. EBITDA margins are expected to expand 50bps to 21.1%, while net margins are expected to remain stable. ROE/ROIC are expected to expand by 490/440 bps to 17.3/22.7%.

Valuation call – We initiate coverage on Aurionpro Solutions with a BUY rating. We recommend BUY at the CMP of INR 725, with price target of INR 1,352 (19X FY28 P/E), representing an upside of 86%.
Key Risks: - Competitive pressure, delays in metro and data center projects, and execution risks.

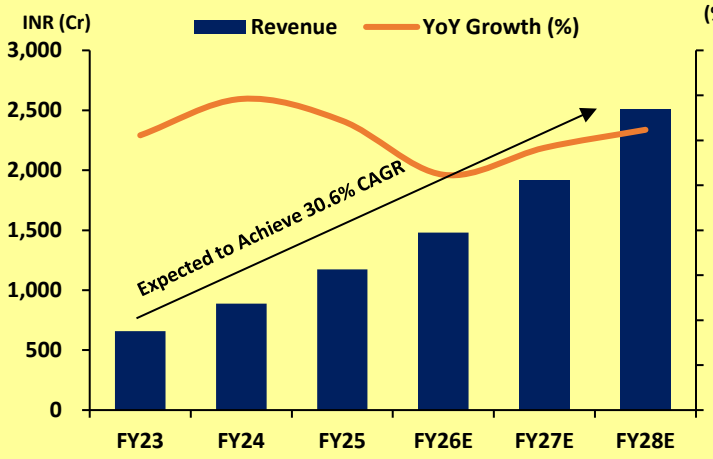
Why invest in Aurionpro?

In the past few years, Aurionpro Solutions Limited has undergone a significant transformation, which has been central to its sustained growth. The company made a strategic shift towards an IP-led business model starting in 2020. This pivot has played a major role in driving revenue growth consistently above 30% since FY22. This shift allowed Aurionpro to move beyond traditional service models, integrating intellectual property (IP) into its offerings, ensuring scalable and sustainable revenue streams.

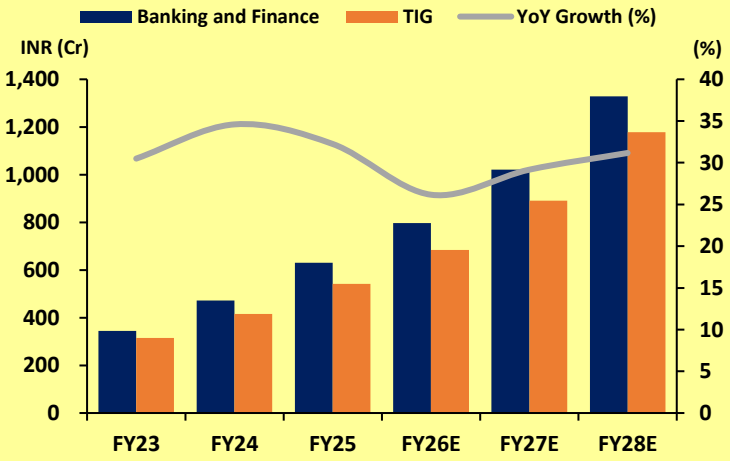
Aurionpro's Banking & Fintech segments have driven strong growth through its IP-led solutions in transaction banking, lending, and digital payments. Simultaneously, the Technology Innovation Group (TIG) has expanded into smart mobility and data centers, capitalizing on smart city and digital infrastructure demands. This strategic blend of legacy business ramp-up and diversification has enabled sustained double-digit growth in a competitive market.

We expect Aurionpro to continue increasing its revenue at a ~29% CAGR from FY25 to FY28E, driven by strong traction in its new business segments, particularly Transit Solutions and Data Centers. While we don't foresee a dramatic shift in the overall revenue mix, the TIG segment will gradually increase its contribution as the company secures more projects in smart mobility, data centers, and other emerging technologies. The Banking/Lending segment is expected to maintain its growth, supporting a well-balanced revenue expansion across Aurionpro's diverse portfolio.

Revenue Trajectory: Sustained High-Teens Growth with Strong Forward Visibility



Strong Growth Momentum Led by Banking & Finance and TIG Segment



Fueling Aurionpro's Revenue Growth: The Key Business Drivers

Key Growth Drivers

Transaction Banking / Lending Solutions

- IP-Led business model driving resilient growth
- Strong client wins with Indian and global banks like SBI and Bank of Ceylon

Transit Solutions

- Growth fueled by smart city and transit projects
- Increasing demand for Automatic fare collection systems

Data Centers

- Rising demand for data storage and hybrid cloud infrastructure.
- Strategic partnerships expanding capacity

Transaction Banking Solutions: Powering Financial Transformation with iCashPro

Aurionpro Solutions has established itself as a leader in the Transaction Banking Solutions space by providing a comprehensive, AI-driven platform that optimizes and enhances the banking experience for financial institutions. iCashPro is a specialized AI-driven end to end corporate banking solutions platform. Unlike broader core banking solutions from peers like Oracle and Finastra, iCashPro excels in its niche, providing deep functionality and quality tailored to large, growing banks. Its flexible pricing model and quick implementation make it a superior choice for banks seeking specialized solutions without overhauling their legacy systems, setting it apart in a dominated market.

Aurionpro's client base, including SBI, several PSU banks, and CSB Bank, demonstrates the product's reliability and depth. The average deal size for iCashPro's two modules typically ranges between INR 60-70 cr, with large projects reaching up to INR 100 cr. As banks expand their use of the platform, Aurionpro can upsell additional modules, driving higher-margin, accretive business. With 60% of revenue recurring, iCashPro's business model ensures sustainable growth of 15-16% annually, even without acquiring new clients, due to its ability to generate continuous business through upgrades and customizations.

AI-driven acquisitions like Arya.ai and Fintra have strengthened iCashPro, adding advanced AI capabilities and completing its transaction banking suite. Fintra enables Aurionpro to offer a comprehensive, integrated solution, facilitating cross-selling and expanding the platform's market value, positioning it ahead of competitors for continued growth.

Aurionpro earns revenue through license and implementation fees, with upfront payments for software and annual maintenance contracts (AMC). 60% of its revenue is recurring, providing strong future revenue visibility and stability. The company has shifted from selling its IP on a perpetual basis to offering it for a stipulated period, after which banks must re-purchase the software, creating recurring revenue opportunities. This change not only increases revenue share but also enhances customer retention due to the high level of service, making it difficult for customers to switch to competitors. This model ensures continued growth and predictable cash flows in the transaction banking space.

iCashPro: Driving Seamless Banking with Advanced Features

Lending Solutions: Empowering Banks with Smart, Scalable Corporate Loan Management

Aurionpro Solutions is strengthening its position in the lending solutions sector with a focus on AI-driven, end-to-end solutions that cater to both corporate and retail banking needs. Their flagship products, Smartlender and Integro, provide banks with the tools necessary to streamline loan origination, credit assessment, and risk management, all while integrating advanced AI capabilities.

Aurionpro's SmartLender platform offers a competitive edge in the lending solutions market by automating complex tasks in commercial and corporate lending, such as financial analysis, limits management, and collateral management. Powered by AI-driven architecture, it accelerates credit decision-making with advanced analytics and explainable AI, setting it apart from competitors. Integro Technologies, a key subsidiary, strengthens SmartLender's market position by providing robust credit risk management solutions and facilitating multi-country rollouts. With its strong market presence in Asia, the Middle East, and Africa, Integro's collaboration with Arya.ai further enhances SmartLender's autonomous lending capabilities.

Similar to its transaction banking model, Aurionpro's lending solutions benefit from a recurring revenue (~60%) structure. The shift from perpetual IP sales to offering software for a specified period allows Aurionpro to generate consistent revenue through re-purchase agreements and annual maintenance contracts. This model not only boosts revenue share but also strengthens customer retention, ensuring long-term growth and predictable cash flows in the lending solutions segment.

Aurionpro's partnership with Murex as a system integrator enhances its ability to assist banks with implementing and managing the MX.3 platform for treasury and capital markets. This partnership positions the company to participate in large-scale projects and secure long-term support contracts, generating steady annuity revenues. The acquisition of Fenixys accelerates Aurionpro's expansion into Europe and North America, strengthening its lending solutions offering with enhanced capital markets expertise and greater market reach.

Aurionpro is well-positioned to capitalize on the growing demand for AI-powered lending solutions. Banks are increasingly focusing on improving operational efficiency and reducing costs through technology, driving demand for Aurionpro's AI-enabled products. With a strong growth outlook of 30-35% over the next few years, Aurionpro is poised for significant expansion in the global lending solutions market.

End-to-End Lending Services Across Corporate & Retail

Chartis RiskTech Quadrant for Loan Origination System – Sustained Leadership

Source: Company Reports

Technology Innovation Group (TIG): Enabling Smart Mobility, Payments and Data Centre Solutions

Aurionpro plays a pivotal role in revolutionizing mass transit systems by providing end-to-end automated fare collection (AFC) solutions. The company designs, manufactures, and supplies the essential hardware components required for transit operations, such as automated gates, card readers, and validators. Along with the hardware, Aurionpro also offers proprietary AFC software, ensuring seamless integration and system management. This capability positions Aurionpro as a unique player, as they control the entire value chain from hardware design and manufacturing to software development and system implementation. The company's ability to deliver a comprehensive solution for metros, city buses, and ferries makes it the go-to partner for large public infrastructure projects.

Metro Solutions: End-to-End Value Chain Player

Aurionpro stands out in the metro transit segment by being the sole player that oversees every aspect of the AFC value chain. This includes not just the supply and integration of hardware but also the development of sophisticated software for fare collection. Unlike many competitors who focus on either hardware or software alone, Aurionpro integrates both, providing a complete solution that enhances system efficiency and reduces operational costs for transport authorities. Their involvement extends to major metro projects across India and internationally, including Delhi, Mumbai, Chennai, and cities in the Maldives and the US.

Revenue model combines hardware sales and software licensing. Hardware revenue is recognized upon delivery and installation of devices, while software revenue comes from licensing fees and, in some cases, a share of ticketing revenue. In early-stage projects with low footfall, the company receives a minimum payment from government authorities, reducing revenue risk until footfall grow, after which the revenue share from ticketing increases.

Projects typically range between INR 150 cr to INR 250 cr, reflecting the large scale of metro and transport infrastructure projects. Recent wins include significant contracts with Mumbai Metro (for two metro lines), Chennai Metro, Delhi Metro, and Bhopal and Indore metros. Additionally, the company has successfully deployed its solutions across city buses in California, Haryana, and UP, reinforcing its presence in both Indian and international markets.

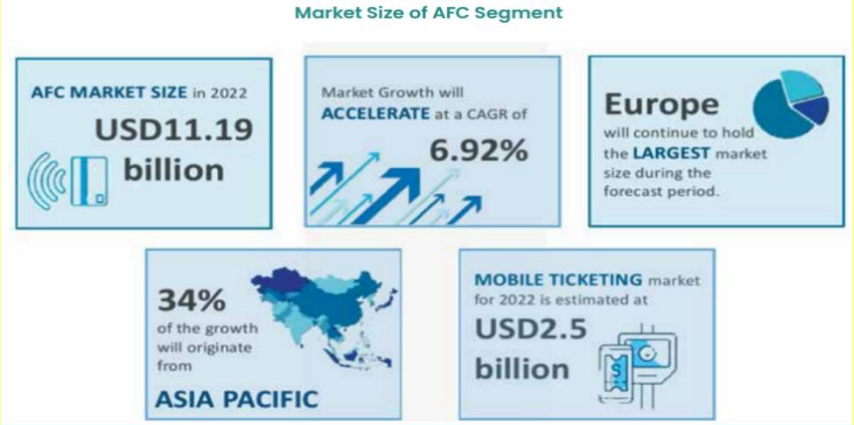
Proposed Metro Networks in India: Key Opportunities for Aurionpro

City & State	Proposed Network Length
Aurangabad Metrolite, Maharashtra	TBD
Bangalore Metrolite, Karnataka	60 km
Bhavnagar Metrolite / Metro Neo, Gujarat	TBD
Chandigarh Metro, Chandigarh, Punjab & Haryana	77 km
Chennai Metrolite, Tamil Nadu	15.50 km
Coimbatore Metro, Tamil Nadu	136 km
Delhi Metrolite, Delhi	40.88 km
Guwahati Metro, Assam	61.40 km
Jamnagar Metrolite / MetroNeo, Gujarat	TBD
Jammu Metro, J&K UT	43.50 km
Madurai Metro, Tamil Nadu	31 km
Mathura Metrolite, Uttar Pradesh	12 km
Prayagraj Metro, Uttar Pradesh	42 km
Raipur Metro, Chhattisgarh	TBD
Rajkot Metrolite / Metro Neo, Gujarat	TBD
Srinagar Metro, J&K UT	25 km
Uttarakhand Metro, Uttarakhand	58 km
Vadodara Metrolite / Metro Neo, Gujarat	TBD
Varanasi Metro, Uttar Pradesh	29.235 km
Vijayawada Metro, Andhra Pradesh	66.2 km
Visakhapatnam Metro, Andhra Pradesh	79.91 km
Warangal Metro Neo, Telangana	17 km

Aurionpro has already established itself as a key bidder and winner in major metro projects across India, making it a strong contender to capitalize on the country's expanding metro network. With an average order value ranging from INR 150 cr to INR 250 cr and a recurring revenue model driven by hardware and software solutions, the company is well-positioned to tap into the upcoming metro projects. As India rolls out new metro lines across cities like Bangalore, Chennai, and Varanasi, Aurionpro's proven track record and integrated solutions offer a clear path for sustained growth.

Aurionpro supports both closed-loop and open-loop AFC systems. Closed-loop systems, previously common in cities like Singapore and London, rely on proprietary prepaid cards for fare payments. However, as the industry transitions toward open-loop systems, Aurionpro's technology allows passengers to use their credit cards, debit cards, or mobile wallets for fare payments, making the system more convenient and flexible. Aurionpro's ability to support both systems positions it well as transit agencies worldwide shift toward open-loop solutions, driving the need for hardware and software upgrades.

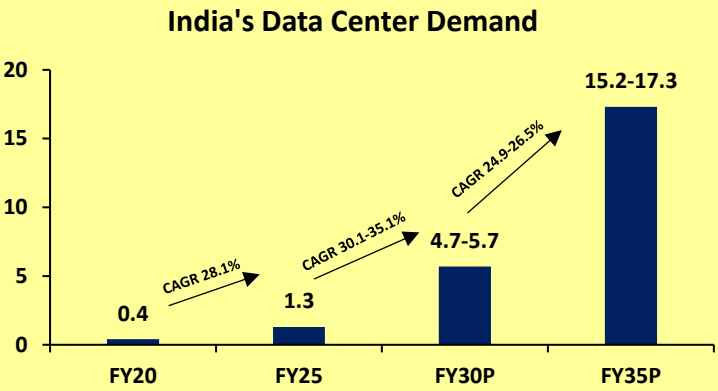
Aurionpro's ability to support both closed-loop and open-loop AFC systems positions it to capitalize on the global shift towards contactless payments. This transition to open-loop systems, driven by demand for convenience and flexibility, presents significant growth opportunities as transit agencies modernize their fare collection infrastructure.



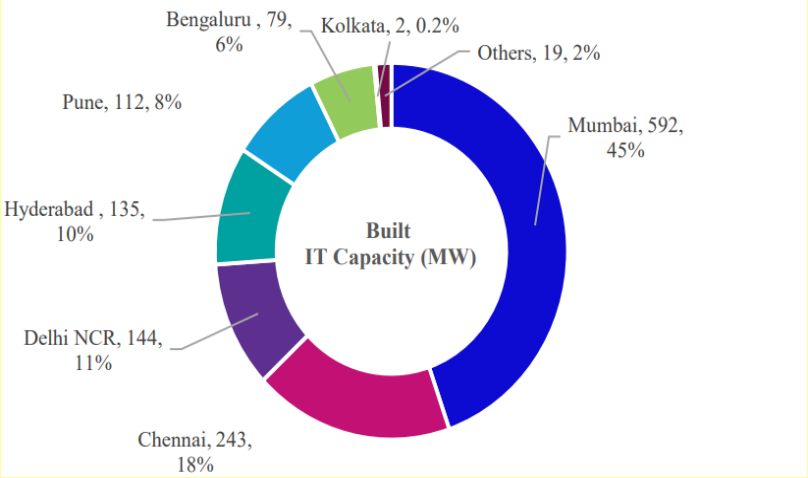
The global AFC market is estimated at ~$11bn and expected to grow at ~7% CAGR, driven by rapid urbanization, metro network expansion, and rising adoption of contactless ticketing and open loop payments, positioning Aurionpro to benefit from the shift toward technology driven public transport systems.

Source: Company Reports

Data Center Design & Engineering: Positioning for the Digital Infrastructure Boom



India's data center demand is poised for significant growth, with projections indicating a robust CAGR ranging from 28.1% (FY20 to FY25) to 30-35% (FY25 to FY30P). This rapid expansion reflects an increasing need for data storage and processing capacity, driven by digital transformation, the rise of cloud computing, and the growth of e-commerce, fintech, and other data-heavy industries. By FY35P, the demand is expected to reach 15.2-17.3 GW, which is a substantial leap from the 1.3 GW expected in FY25, signaling a multi-fold growth in the data center industry.



India's data center capacity is heavily concentrated in Mumbai (45%), followed by Chennai (18%), Delhi NCR (11%), Hyderabad (10%), Pune (8%), and Bengaluru (6%). These cities form the core data center clusters due to submarine cable connectivity, financial hubs, enterprise demand, and strong digital infrastructure.

This cluster-based development benefits Aurionpro because hyperscale data centers are typically built in such clusters, and design complexity increases significantly in hyperscale facilities, which is Aurionpro's core specialization.

How Aurionpro Will Capture the Data Center Opportunity

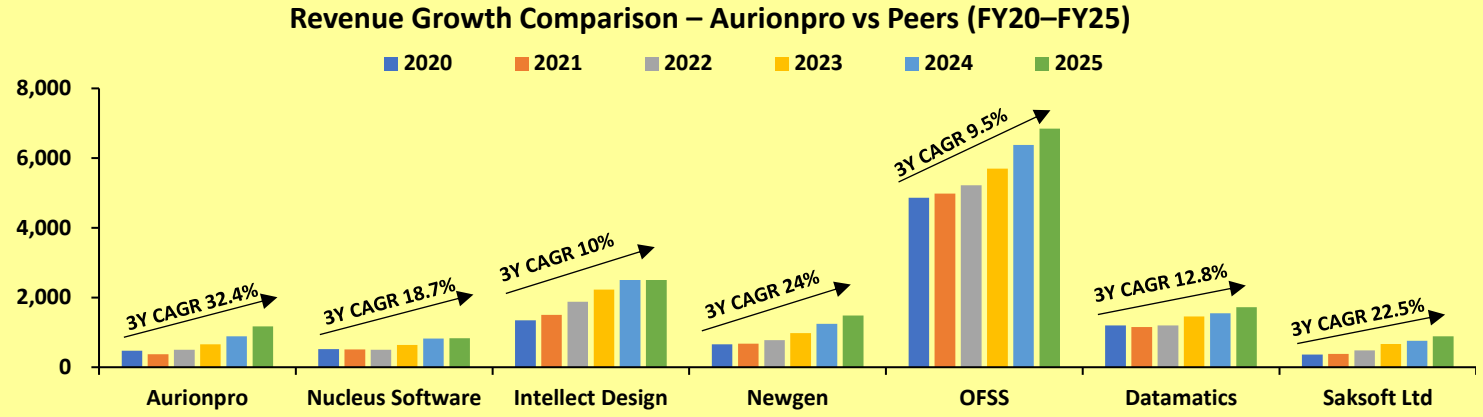
Aurionpro operates in the data center industry through a capital-light model, providing consultancy, design, and project management services for hyperscale and AI-enabled data centers. As data centers become larger and more complex, the importance of design, power, cooling, and security architecture increases, positioning Aurionpro in a high-value segment of the data center value chain without taking balance sheet risk.

Aurionpro's recent order win of ~350cr with Adani is a significant milestone, as the project is part of Adani's broader 1GW data center plan. Notably, India's data center capacity is heavily concentrated in Mumbai (~45% of total capacity as shown in the chart), which is also where a significant portion of hyperscale data center development is taking place. By being involved in large projects within these key data center clusters, Aurionpro gains strong execution visibility and establishes itself as a preferred design and project management partner for hyperscale data center developers. In addition to Adani, the company is also working with global hyperscalers like AWS, which strengthens its positioning in both domestic and international data center markets.

Aurionpro earns revenue through consultancy, design, and project management fees linked to project milestones, ensuring revenue visibility while remaining capital-light. This model supports margin expansion from ~15–16% to ~20–22% as more complex hyperscale projects are executed. The company typically operates with an average order size of ~INR 100–125 cr; however, recent large project wins have increased project sizes and nearly doubled the data center order book (earlier ~INR 300 cr out of ~INR 1,700 cr), indicating strong growth visibility and operating leverage in this segment.

Aurionpro: Outpacing Peers with Industry-Leading Growth Across Revenue, EBITDA and PAT

Aurionpro has outperformed most peers in revenue growth over the last three years, delivering a revenue CAGR of ~32%, higher than peers such as Nucleus Software (~19%), Intellect Design (~10%), OFSS (~9%), and Datamatics (~13%), and ahead of mid-sized peers like Newgen (~24%) and Saksoft (~23%). Over the five-year period, Aurionpro delivered ~20% CAGR, broadly in line with high-growth mid-sized peers and significantly higher than larger, mature players like OFSS and Datamatics, indicating strong and sustained growth momentum.



Aurionpro has also demonstrated strong profitability growth compared to peers, with EBITDA CAGR of ~30% and PAT CAGR of ~36% over the last three years, which is among the highest in the peer group. While some peers such as Nucleus Software have reported high EBITDA growth in the recent period due to a low base effect, Aurionpro's growth remains more consistent and supported by revenue expansion. Over the five-year period, Aurionpro reported EBITDA CAGR of ~22% and PAT CAGR of ~41%, which is higher than most peers, indicating improving operating leverage and margin expansion as the business scales. The strong growth across EBITDA and PAT, along with revenue growth, indicates that Aurionpro's growth is profitable and scalable, reflecting improvement in business mix, increasing share of platform-led revenues, and disciplined cost management.

Large Multi-Vertical Opportunity Landscape

Aurionpro's Vision 2030 roadmap highlights a broad and diversified technology opportunity exceeding $9Bn in serviceable addressable markets, spanning banking platforms, lending technology, transit infrastructure, enterprise AI, capital markets solutions and data center services.

Within this landscape, Enterprise AI represents the largest opportunity (~$2.8Bn) as financial institutions and enterprises increasingly embed AI-driven intelligence into core systems. This is followed by Data Center solutions (~$1.9Bn) and Transit technology (~$1.8Bn), reflecting strong structural demand driven by digital infrastructure investments, smart mobility initiatives, and data localisation requirements globally.

Aurionpro's Lending platforms (~$1.5Bn) and Transaction Banking solutions (~$1.1Bn) continue to benefit from rapid digitisation across global financial institutions, while Capital Markets technology (~$0.8Bn) offers additional growth through treasury, risk management and regulatory technology solutions.

Collectively, these segments represent a large and expanding opportunity pool, with Aurionpro targeting market share ranges of ~2–15% across different verticals, depending on the maturity and competitive intensity of each segment. The company's strategy of building IP-led enterprise platforms across multiple technology layers - software, AI capabilities, and integrated hardware solutions, positions it to capture opportunities across these high-growth markets.

Pecking Order of Peer Companies

Company Name	Comments
Newgen Software Technologies Ltd	**Q3FY26 Performance:** Newgen Software Technologies reported revenue of INR 400.3 cr (+5.0% YoY), with flat QoQ growth due to deal delays. Adjusted EBITDA stood at INR 106.2 cr (-1.9% YoY), while adjusted PAT was INR 90.1 cr (+1.3% YoY, +10.3% QoQ). Statutory PAT declined to INR 62.8 cr due to a one-off impact. Growth was driven by annuity revenue (INR 250 cr, +20% YoY) and subscription revenue (INR 134 cr, +29% YoY), led by strong US growth (+21% YoY). **Management Outlook:** Management expects license recovery (INR 100–120 cr run-rate) and improvement in India & EMEA. Focus remains on AI-led offerings (NewgenONE) and scaling subscription revenues in mature markets, with higher deal velocity and a stronger annuity mix. **Valuation:** Stock is trading at FY28 P/E – 13.75x.
Oracle Financial Services Software Ltd	**FY25 Performance:** Oracle Financial Services Software Limited reported strong revenue of INR 1,965.9 cr (+14.6% YoY, +9.9% QoQ), with PBT at INR 857.4 cr (+11.4% YoY) and PAT at INR 609.6 cr (+12.6% YoY, +11.6% QoQ). Growth was driven by the product segment (INR 1,773.5 cr), while margins remained robust despite a one-off employee cost impact. **Management Outlook:** Management remains focused on cloud-native transformation and SaaS expansion, with embedded AI/ML capabilities driving future growth. Key priorities include scaling corporate banking solutions, enabling real-time processing, and continued R&D investments to strengthen long-term competitiveness. **Valuation:** Stock is trading at FY28 P/E – 18.11x.
Intellect Design Arena Ltd	**Q3FY26 Performance:** Intellect Design Arena reported total income of INR 753 cr (+21.2% YoY, -4.6% QoQ). EBITDA stood at INR 122 cr (-8.9% YoY), while reported PAT declined to INR 28.5 cr (impacted by one-offs); PAT (ex-exceptional) was INR 51.5 cr (-26.6% YoY). Growth was driven by license-linked revenue (INR 391 cr, +34% YoY) and strong platform momentum, while margins were impacted by higher SG&A investments. **Management Outlook:** Management targets >INR 800 cr quarterly revenue run-rate, with a sustainable ~20% growth algorithm and >20% EBITDA margins. Focus remains on AI-led platforms (Purple Fabric), US market expansion, and mainframe-to-cloud + enterprise AI opportunities, with margin improvement expected as operating leverage kicks in. **Valuation:** Stock is trading at FY28 P/E – 15.78x.
Nucleus Software Exports Ltd	**Q3FY26 Performance:** Nucleus Software reported revenue of INR 220.0 cr (+7.0% YoY, +3.0% QoQ). EBITDA stood at INR 32.7 cr (flat YoY, strong QoQ recovery), while PAT declined to INR 20.7 cr (-40.9% YoY) due to a one-off impact. Growth was supported by a strong order book (INR 656.7 cr) and product-led revenue mix. **Management Outlook:** Management remains focused on FinnOne Neo migration (3–4 year cycle) and embedded AI integration across products. Growth is expected from MSME, gold loans, and co-lending segments, alongside expansion in the US and Australia, with efficiency gains driven by AI and partnerships. **Valuation:** Stock is trading at FY28 P/E – 11.90x.
Saksoft Ltd	**Q3FY26 Performance:** Saksoft Limited reported operating income of INR 250.8 cr (+10.6% YoY, -3.0% QoQ). EBITDA stood at INR 45.4 cr (+19.2% YoY), while PAT was INR 29.0 cr (+7.4% YoY, impacted by one-off). Sequential dip was due to slowdown in top clients, while margins remained stable at ~18%. **Management Outlook:** Management targets USD 500 mn revenue by 2030, with 80–85% organic growth. Focus remains on AI-led transformation, outcome-based contracts, and US market expansion, while maintaining 18–20% EBITDA margins through investments in sales and capabilities. **Valuation**: Not Rated. We assume an average mean of FY28 P/E – 15.01x of the peer.
Datamatics Global Services Ltd	**Q3FY26 Performance:** Datamatics Global Services Limited reported record revenue of INR 510.1 cr (+19.9% YoY, +4.1% QoQ) and EBITDA of INR 96.2 cr (+76.4% YoY), with margins expanding to 18.9%. PAT stood at INR 36.4 cr, impacted by a one-off charge; underlying profitability remained strong. Growth was led by Digital Operations (+53.8% YoY) and steady traction in Digital Technologies. **Management Outlook:** Management guides for high single-digit organic growth in FY27, with recovery in Digital Experiences from Q1. Focus remains on AI-first strategy, agentic AI solutions, and account mining, alongside M&A-led expansion and sustaining margin improvement through efficiency gains. **Valuation:** Stock is trading at FY28 P/E – 14.24x.

Valuation of Aurionpro

We have valued ASL using DCF methodology, assuming 11% WACC. This has given us a FY28 price target of INR 1,352 per share, representing an upside of 86% from the CMP.

Our Bull and Bear Case Scenarios

We have prepared our Bull and Bear case scenarios based on revenue growth, net margin, and P/E multiples:

- **Bull Case:** We have assumed a revenue CAGR of 30% and a net margin of 16.1% at the best-case P/E valuation of 19X. This will result in a price target of INR 1,427, an upside of 97% from CMP.
- **Bear Case:** We have assumed a revenue CAGR of 26% and a net margin of 14.5% at the lowest P/E valuation of 16X. This will result in a price target of INR 985, an upside of 36% from CMP.

Bull & Bear Case Scenario

Revenue CAGR of 30%, net margin of 16.1% and 19X P/E.		**Bull Case Price** *INR 1,427 per share*
Revenue CAGR of 28.8%, net margin of 15.9% and 18.7X P/E.		**Target Price** *INR 1,352 per share*
Revenue CAGR of 26%, net margin of 14.5% and 16X P/E.		**Bear Case Price** *INR 985 per share*
	BSE EXPERIENCE THE NEW	**Current Price** *INR 725 per share*

Aurionpro Solutions Limited SWOT Analysis in a nutshell

Aurionpro Solutions Ltd

Growth Drivers

- Smart mobility, transit payments and data centre infrastructure creating new growth opportunities.
- Rising global demand for AI-driven enterprise technology and digital transformation platforms.
- Investment in Arya.ai enabling explainable AI capabilities across banking, insurance and enterprise platforms.

Key Challenges

- Increasing competition from global enterprise technology and AI-native platform providers.
- Large government transit and infrastructure contracts involve complex execution, integration risks, and long project cycles.

New Trends

- Growing adoption of integrated hardware-software-payments platforms in transit ecosystems.
- Enterprise technology shifting from automation to AI-driven intelligent decision systems.

Investment Themes

- Expanding global footprint with strong APAC presence and strategic expansion into Europe and US markets.
- Aurionpro's continuous investments in research and development and its exploration of emerging technologies.
- Strategic acquisitions strengthening AI, fintech and capital markets technology capabilities.

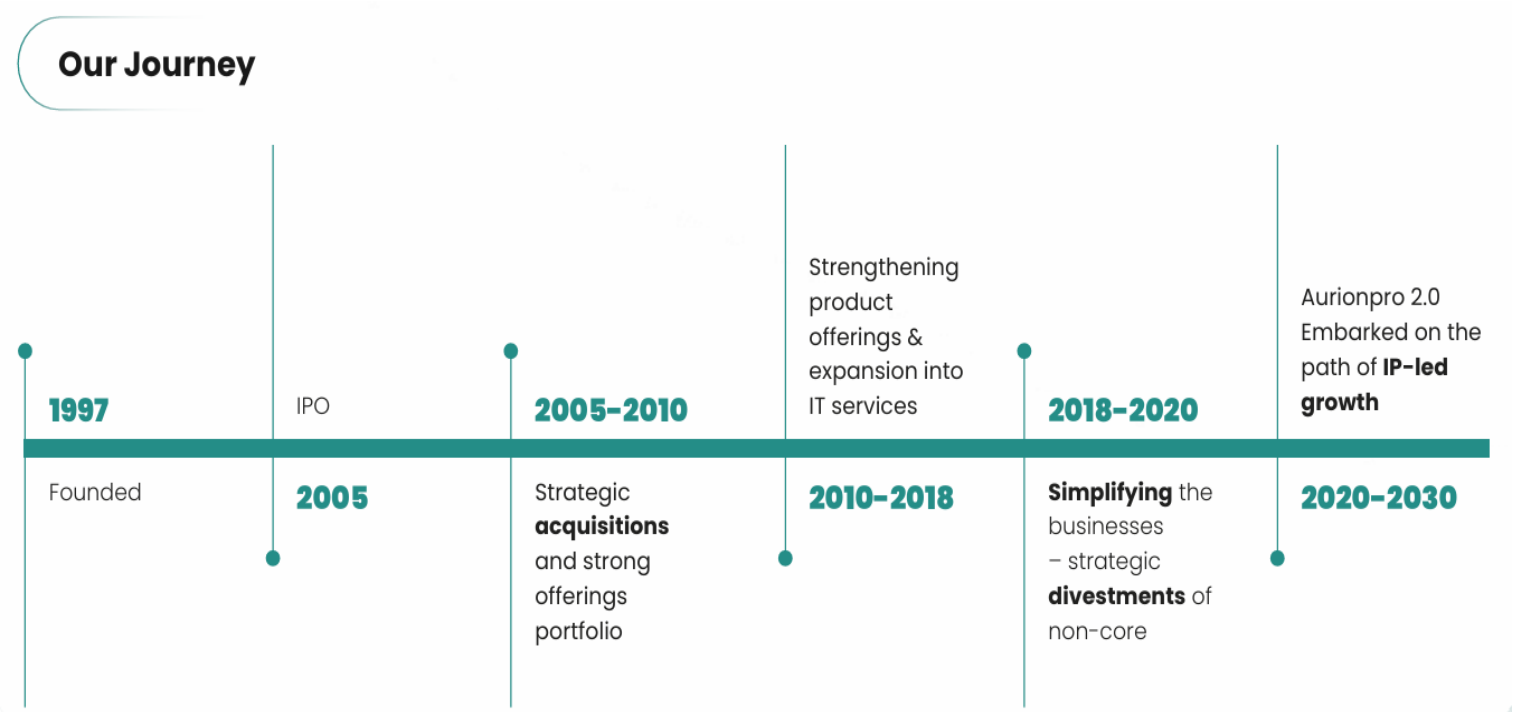
Aurionpro Solutions Limited – Business Overview

Aurionpro Solutions Limited is a global enterprise technology company that develops mission-critical software platforms and technology solutions for the banking, fintech, transit mobility, payments, and enterprise infrastructure sectors. Founded in 1997 and headquartered in Navi Mumbai, the company serves leading financial institutions, governments, and enterprises across more than 30 countries. Aurionpro's product ecosystem includes transaction banking platforms, lending and treasury solutions, capital markets technology, smart mobility and transit payment systems, enterprise AI platforms, and data centre infrastructure services. The company has progressively shifted its focus from traditional IT services toward building proprietary, IP-led enterprise platforms that enable digital transformation, automation, and AI-driven decision-making across industries.

Aurionpro's Evolution Toward an IP-Led Enterprise Technology Platform



Aurionpro's growth journey reflects a gradual but deliberate strategic transformation. After its IPO in 2005, the company strengthened its technology capabilities through targeted acquisitions and the development of specialized banking and enterprise software solutions. During the 2005–2018 period, Aurionpro expanded its global footprint while building a diversified portfolio of financial technology products and enterprise solutions. This phase helped establish the company's presence in key segments such as transaction banking, treasury systems, and financial infrastructure platforms.

A major strategic inflection point occurred during the 2018–2020 period, when the company undertook a series of portfolio rationalization initiatives, divesting non-core businesses and streamlining operations to focus on high-value technology platforms. This restructuring laid the foundation for Aurionpro's transition toward a scalable, product-led growth model.

The transformation accelerated under the leadership of Ashish Rai, who joined Aurionpro after senior leadership roles at global fintech firms including FIS, Finastra, and SunGard. Under his leadership, the company repositioned itself as a next-generation enterprise technology platform provider built on proprietary intellectual property. The strategy emphasized building scalable enterprise platforms, expanding global markets, and strengthening technology capabilities through strategic acquisitions and investments in artificial intelligence. This shift has significantly strengthened Aurionpro's growth trajectory, supported by increasing product adoption, global client expansion, and continued innovation across enterprise technology platforms.

Strategic Acquisitions Strengthening Aurionpro's AI, Banking and Mobility Platforms

Sr. No	Date of Acquisition	Acquired Entity	Consideration	Purpose
1	19-Apr-2024	Lithasa Technologies Private Limited (Arya.ai)	INR 125 cr	Acquisition strengthens Aurionpro's AI capabilities through explainable AI and autonomous decisioning models, enabling integration of AI-driven analytics and decision intelligence across banking, fintech, insurance, and enterprise platforms, enhancing the company's AI-native product ecosystem.
2	24-Jul-2024	Skanan Hardware Private Limited	INR 18.62 cr	Enhances Aurionpro's hardware manufacturing capabilities for transit and smart mobility solutions, supporting end-to-end delivery of automatic fare collection systems, payment terminals, and mobility infrastructure, strengthening integration between hardware and software platforms.
3	4-Feb-2025	Fenixys SAS	€10 million	Expands Aurionpro's capital markets and treasury technology capabilities, enabling stronger presence in European financial markets while enhancing its banking and fintech platform offerings for treasury, risk, and regulatory solutions.
4	11-Apr-2025	Fintra Software Private Limited	INR 23 cr	Strengthens Aurionpro's transaction banking and trade finance platform, enabling integration with iCashpro and corporate banking solutions, enhancing capabilities in trade finance automation, cash management, and corporate banking digitization.
5	15-Apr-2025	Clipston & Associates (now Aurionpro UK Limited)	GBP 120,000	Establishes a strategic foothold in the UK and European markets, supporting business development, client acquisition, and expansion of Aurionpro's enterprise technology and banking platforms in developed financial markets.

Banking & Fintech – AI-Led Digital Platform Ecosystem

Business Segments

A] Banking and Fintech

Aurionpro Solutions Limited operates its Banking & Fintech segment through a comprehensive suite of AI-led, platform-based solutions catering to both retail and corporate banking clients. The segment focuses on digitizing banking operations, improving customer experience, and enabling automation across transaction processing, lending, and payments.

Retail Banking

Aurionpro continues to strengthen its retail banking offerings through advanced customer experience (CX) solutions deployed across branches and assisted channels. Its portfolio includes Queue Management Systems (OptiQ), Self-Service Kiosks, Customer Feedback Platforms (Insight), and Digital Signage (Experia), enabling real-time analytics, customer flow optimization, and improved service delivery. These solutions, initially designed for banks, are now widely deployed across sectors such as airports, telecom, healthcare, and government services, expanding the addressable market.

Wholesale Banking

Aurionpro has significantly enhanced its corporate banking suite with integrated, AI-enabled platforms spanning transaction banking, trade finance, supply chain finance, and digital banking.

iCashpro+ **suite serves as a next-generation transaction banking platform offering capabilities across payments, collections, liquidity management, receivables, and financial supply chain, enabling banks to deliver seamless corporate banking experiences. This platform is benchmarked to handle 5 mn transactions per hour with over 6,000 concurrent users.**

AuroDigi**, provides a unified digital banking experience for corporate clients with API-first architecture, advanced analytics, and multi-entity capabilities.**

Fintra (Trade Finance Platform)**, digitizes end-to-end trade finance processes, reducing inefficiencies and improving turnaround times.**

Aurobees **integrates supply chain and financing solutions, enhancing transparency and optimizing working capital across ecosystems.**

Lending & Credit Platforms

Aurionpro's lending business has transitioned to a comprehensive, AI-driven ecosystem:
SmartLender and Integro Lending **Suite provide end-to-end credit lifecycle management, covering origination, underwriting, monitoring, and servicing across corporate, SME, and retail segments.**

Enterprise AI Integration

A key differentiator is the integration of AI capabilities through Arya.ai and AryaXAI, enabling explainable AI, autonomous decisioning, and intelligent automation across banking workflows. These platforms support use cases such as AI-driven onboarding, cashflow forecasting, fraud detection, and compliance monitoring, positioning Aurionpro as a next-generation AI-native fintech provider.

B] Technology Innovation Group [TIG]

Integrated Product Portfolio Across Transit, Phygital & Data Center Solutions

Source: Company Reports

Smart Mobility

Aurionpro's mobility business focuses on making public transport simpler and more convenient through integrated, technology driven solutions. It acts as a sole end to end solutions provider covering both hardware and software, enabling complete management of transit systems from ticketing and payments to fleet tracking and route planning. Through an open loop payment approach, supported by partnerships with players like Mastercard, commuters can use contactless cards, mobile wallets, and bank cards without needing separate tickets. This reduces waiting time, improves the overall travel experience, and helps transit authorities operate more efficiently.

Data Centre and Hybrid Cloud Services

Aurionpro has expanded into data center consulting, design, and hybrid cloud services, with a strong specialization in data center design supported by a dedicated and experienced team. The company focuses on delivering high-quality design solutions that form the backbone of large-scale data center infrastructure projects.

The business model is largely asset-light, with Aurionpro acting as a consulting and project management partner rather than investing its own capital. It provides end-to-end support across advisory, design, and execution oversight, while also offering modular infrastructure products such as Auro Edge Smart PODs, 42U server rack modules, and Auro Edge cabinets, enabling scalable and efficient deployment of data center capacity.

The rising demand for scalable and efficient IT infrastructure positions the company well to expand its presence through its expertise-led, low-capex model.

Smart City **Aurionpro integrates its mobility and digital infrastructure capabilities to deliver smart city solutions. The company works closely with governments and public sector entities to develop digital urban ecosystems, including intelligent transport systems, surveillance, and data-driven governance platforms. By combining mobility, cloud, and analytics solutions, Aurionpro enables cities to improve operational efficiency, enhance citizen services, and support sustainable urban development.**

Comparative Positioning of Transaction Banking Platforms

Evaluation Parameters	iCashpro (Aurionpro)	Intellect Cash Management (iGTB)	FinnAxia (Nucleus Software)	Fusion Cash Management (Finastra)	Oracle Banking Cash Management / FLEXCUBE
Core Product Positioning	Dedicated transaction banking & cash management platform	Enterprise-grade global & liquidity management suite	Corporate banking platform with lending ecosystem strength	Global cash & liquidity management solution	Core-integrated enterprise cash management module
Primary Market Focus	Corporate transaction banking modernization	Tier-1 global banks & multinational corporates	Banks focused on lending-led corporate relationships	Large international banks & global treasury operations	Large and mid-tier global banks
Functional Coverage	Payments, collections, liquidity, receivables management, forex services, corporate internet banking & trade Finance	Cash management, payments, receivables, liquidity management, treasury	Payments, reconciliation and corporate servicing integrated with lending lifecycle	Payments automation, liquidity management, treasury services, payables, receivables & virtual account management	Cash flow forecasting, receivables, reconciliation, liquidity monitoring & virtual account management
Architecture & Integration	API-led, microservices-based architecture enabling integration with CBS, ERP & fintech systems	Enterprise architecture with deep treasury integrations	API-first, SOA-based enterprise lending integration	Cloud-native, API-first modular architecture	Microservices cloud architecture integrated with FLEXCUBE core systems
Deployment Model	Cloud-ready, on-premise and hybrid deployment	Cloud-native, composable deployment model (Public, Private, or Hybrid)	Cloud native deployment, on premise and Hybrid	Cloud native deployment, on premise and Hybrid	Cloud-native deployment with core banking linkage
Customization Capability	High configurability and parameterization suited to regional banking needs	Extensive customization but implementation intensive	Moderate customization aligned to lending workflows	Modular, API-driven platform with low-code, white-label extensibility	Customization largely aligned to Oracle ecosystem
Corporate Client Experience	Unified corporate portal with real-time visibility and transaction dashboards	Advanced treasury visualization and multi-entity cash visibility	Corporate banking interface integrated with lending operations	Multi-channel corporate access with global payment visibility	Real-time dashboards with forecasting and analytics
Analytics & Intelligence	Transaction analytics and AI-enabled automation capabilities	Advanced treasury analytics & forecasting	Credit and operational analytics focus	Cash forecasting, liquidity analytics, reporting dashboards	Cash forecasting and AI/ML-enabled insights

Comparative Positioning of Credit Lending Platforms

Evaluation Lens	SmartLender / Integro (Aurionpro)	FinnOne Neo (Nucleus Software)	Intellect Lending Suite (Intellect Design Arena)	Newgen Loan Origination System (LOS)
Core positioning	End-to-end lending operations with strong focus on credit workflow controls (limits/collateral/monitoring) across corporate + retail/SME	Widely used lending platform with strong retail/SME lending coverage and loan lifecycle depth	Enterprise digital lending suite targeting large banks with broad product coverage	Workflow/BPM-led LOS typically chosen for process automation + document-heavy origination
Strength areas (where it tends to win)	Limits & collateral management, corporate credit lifecycle controls, monitoring/early warning orientation, modular adoption	Origination + servicing depth, mature lending stack, large installed base in India/EM	Suite breadth across lending products, enterprise architecture, scalability for complex environments	Workflow automation, document management, configurable process digitisation
Origination & underwriting workflow	Configurable credit workflows with governance checkpoints; modular build-out from origination to monitoring	Strong standardized origination flows; configurable product setups	Deep workflow configurability for complex lending programs	Very strong BPM-based origination workflows; key selection driver
Credit control layers (limits/collateral/monitoring)	Key differentiator due to integrated limits/collateral + monitoring	Present, but often strongest in origination/servicing layers	Strong capabilities but usually implemented as part of larger suite transformation	Usually requires integration with other systems/modules for deeper limits/collateral ecosystems
Implementation style	Modular rollout by credit function (origination → limits/collateral → monitoring → collections)	Rollouts often aligned to specific lending products (e.g., retail/SME products)	Larger, multi-phase enterprise programs	Faster workflow-led deployments, especially where LOS is the starting point
Revenue model alignment	License/subscription + implementation + AMC; expansion as modules get added	License/subscription + implementation + AMC; strong annuity base due to installed footprint	License/subscription + implementation + AMC; higher program size in enterprise deals	License + implementation heavy; recurring support/AMC thereafter

Phases of ASL's financial performance

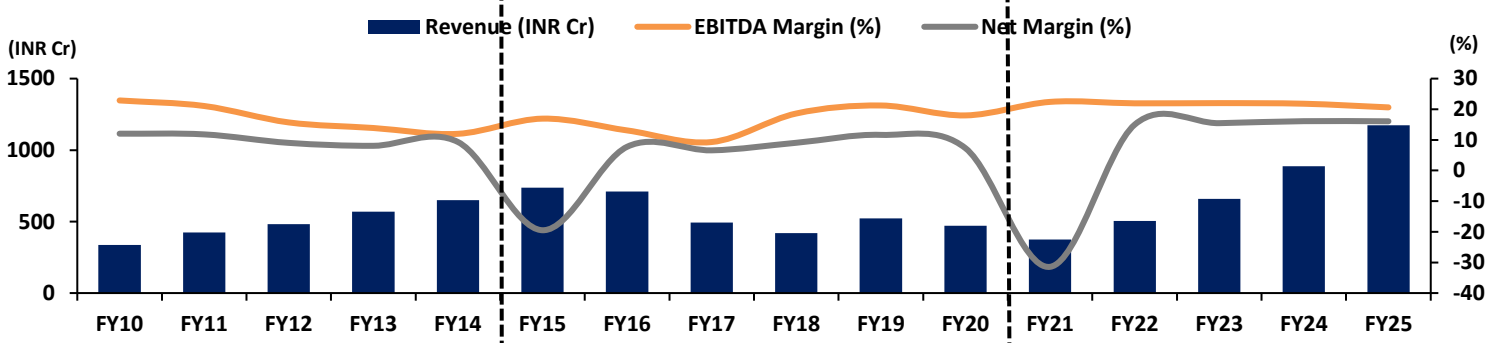
We have analyzed ASL's 15-year financial performance, a period marked by multiple market cycles. The analysis provides insight into ASL's path toward financial stabilization and sustainable growth.

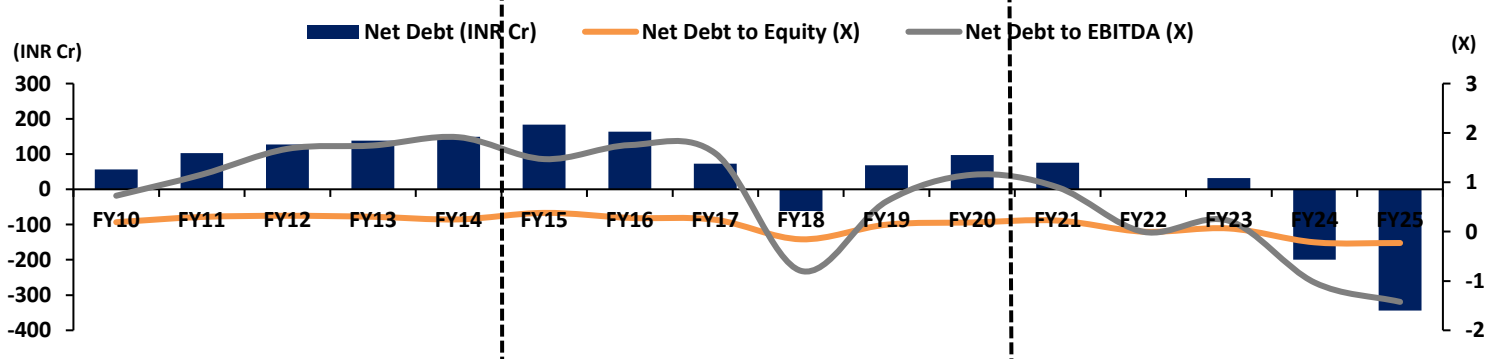
15 years of ASL's business performance

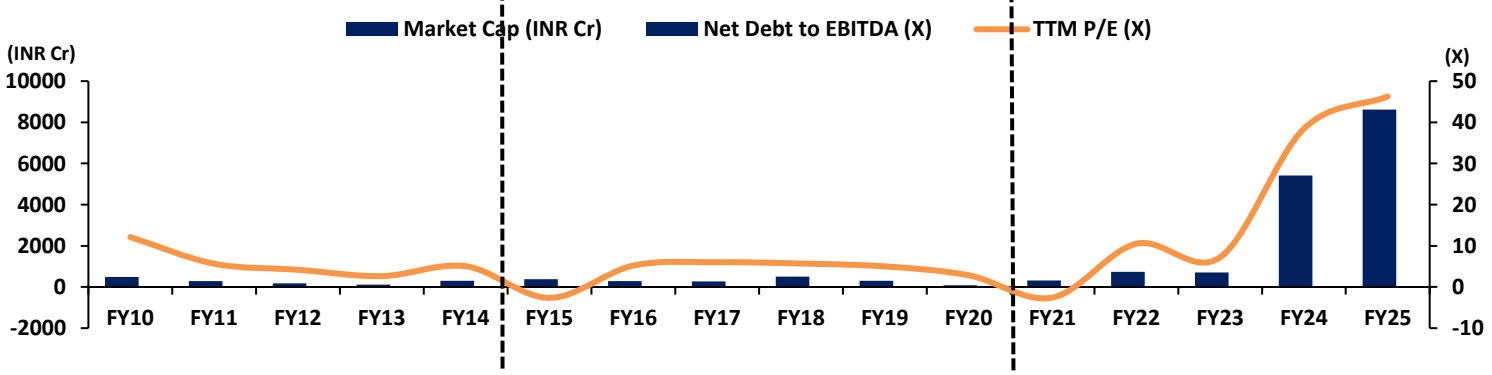
During FY10–FY15, Aurionpro focused on expanding its technology offerings and global presence. Revenue grew from INR 337 cr in FY10 to INR 738 cr in FY15 (~17% CAGR), driven by enterprise technology solutions and acquisitions. However, aggressive expansion and integration challenges led to margin pressure, with EBITDA margins declining from ~23% to ~17% and the company reporting a net loss in FY15. Leverage also increased during this period, with net debt rising to INR 184 cr, reflecting investments in business expansion.

Between FY15 and FY20, the company underwent a significant restructuring phase, divesting non-core businesses and focusing on strengthening its core enterprise technology platforms. Revenue declined from INR 738 cr in FY15 to INR 470 cr in FY20, reflecting portfolio rationalization. However, the company significantly improved its balance sheet, reducing net debt from INR 184 cr in FY15 to net cash by FY18, while stabilizing margins and restoring profitability. This phase laid the foundation for Aurionpro's transition toward a more scalable and focused technology platform model.

From FY20 onwards, Aurionpro entered a strong growth phase driven by its IP-led enterprise technology platforms and global expansion strategy. Revenue increased from INR 374 cr in FY21 to INR 1,173 cr in FY25 (~33% CAGR), supported by growth in transaction banking platforms, transit mobility solutions, and enterprise infrastructure services. Profitability improved significantly, with EBITDA rising from INR 84 cr to INR 242 cr and net margins stabilizing at ~16%. Strong cash generation enabled the company to move into a net cash position of INR 344 cr in FY25, while market capitalization expanded sharply as investors began recognizing its scalable platform-led business model.

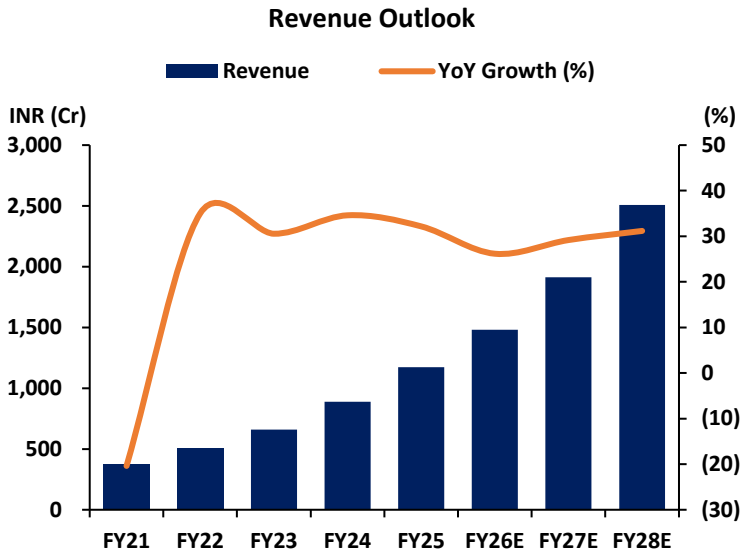


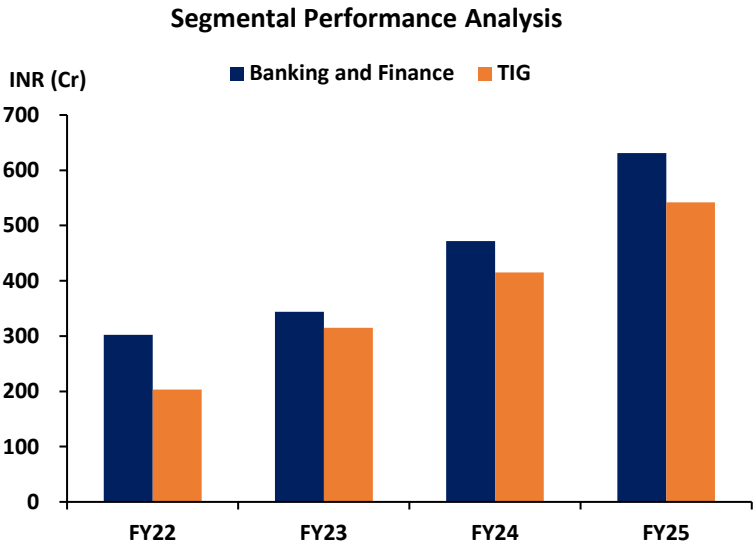


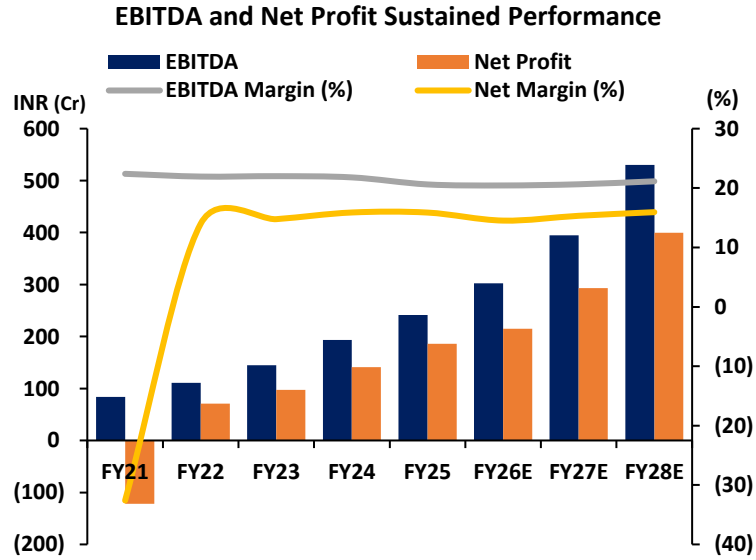


Click here to LISTEN to our research on Aurionpro Solutions Ltd

ASL's Key Investment Rationale







Aurionpro has demonstrated a strong and consistent growth trajectory over the past few years, with revenue increasing from INR 374 cr in FY21 to INR 1,173 cr in FY25, translating into a ~33% CAGR over FY21–FY25. This growth has been supported by increasing adoption of the company's enterprise technology platforms across banking, transit mobility, and enterprise infrastructure solutions. Going forward, we expect Aurionpro's revenue to grow from INR 1,173 cr in FY25 to INR 2,507 cr by FY28E, implying a ~28.8% CAGR over FY25–FY28E.

Key Growth Drivers: -

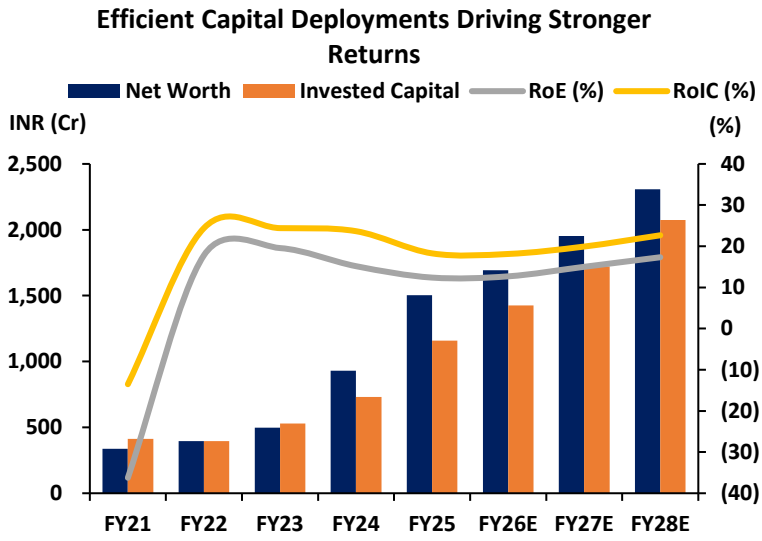
- **Data Centre Expansion - Rising hyperscale and enterprise infrastructure demand driving growth in data centre consulting and engineering services.**
- **Transit Mobility Solutions – Growing adoption of AFC, transit payments, and intelligent transport systems across global metro networks.**
- **Transaction Banking Platforms – Increasing bank digitalization driving demand for payments, liquidity management, and trade finance solutions.**

It operates primarily through two key segments: -
The Banking & Finance segment continues to remain a key revenue contributor, growing from INR 302 cr in FY22 to INR 631 cr in FY25, supported by increasing adoption of transaction banking platforms, lending solutions, and treasury and capital markets technologies by global financial institutions.

The TIG has emerged as a high growth segment, with revenue increasing from INR 203 cr in FY22 to INR 542 cr in FY25. Growth in this segment is primarily driven by strong traction in transit mobility solutions, smart ticketing systems, mobility payments & Data Centre.

Aurionpro has demonstrated strong profitability expansion alongside revenue growth. EBITDA increased from INR 84 cr in FY21 to INR 242 cr in FY25, reflecting improving operating leverage and the increasing share of high-margin enterprise technology platforms. Going forward, we expect EBITDA to grow from INR 242 cr in FY25 to INR 530 cr by FY28E, implying strong operating growth supported by scale benefits and increasing product-led revenues.

Similarly, net profit is expected to increase from INR 186 cr in FY25 to INR 400 cr by FY28E, reflecting improving profitability as the company scales its enterprise technology platforms globally. Despite ongoing investments in innovation, EBITDA margins are expected to remain stable at ~21–22%, supported by the company's IP-led product strategy and sustained R&D investments.

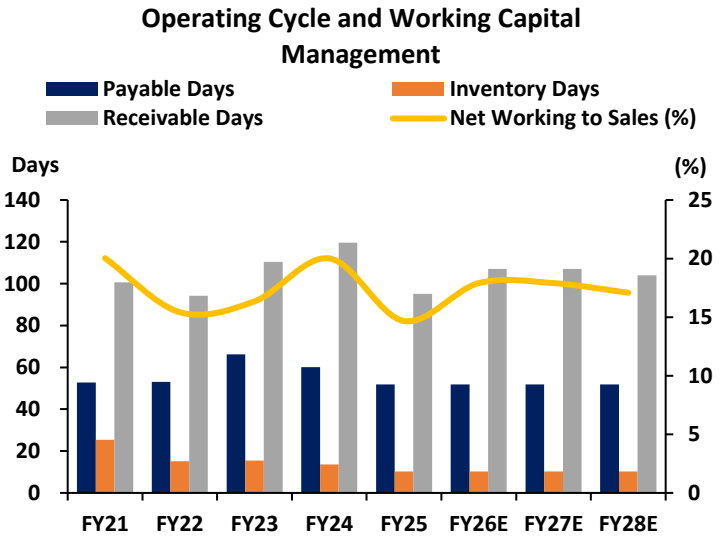


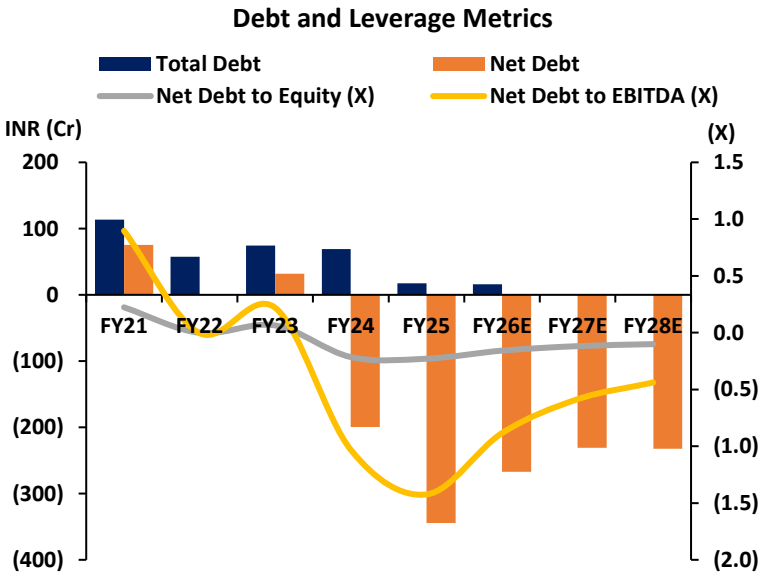
Strong earnings growth and disciplined capital allocation have significantly strengthened Aurionpro's capital base, with net worth increasing from INR 336 cr in FY21 to INR 1,503 cr in FY25, while invested capital rose from INR 412 cr to INR 1,159 cr as the company invested in platform development, acquisitions, and technology capabilities. This has translated into improving capital efficiency, with RoE rising from negative levels in FY21 to 12% in FY25 and RoIC improving to 18%.

Looking ahead, net worth and invested capital are expected to reach INR 2,306 cr and INR 2,074 cr by FY28E, respectively. Return ratios are projected to improve with RoE reaching ~17% and RoIC ~23%, supported by operating leverage and growing contribution from scalable IP-led enterprise platforms.

Historically, Aurionpro has maintained a stable operating cycle with payable days largely in the range of ~52–66 days, while inventory days declined from 25 days in FY21 to 10 days in FY25, reflecting improved operational efficiency. However, receivable days increased from 101 days in FY21 to 120 days in FY24 before moderating to 95 days in FY25, driven by higher exposure to enterprise and government-led technology projects.

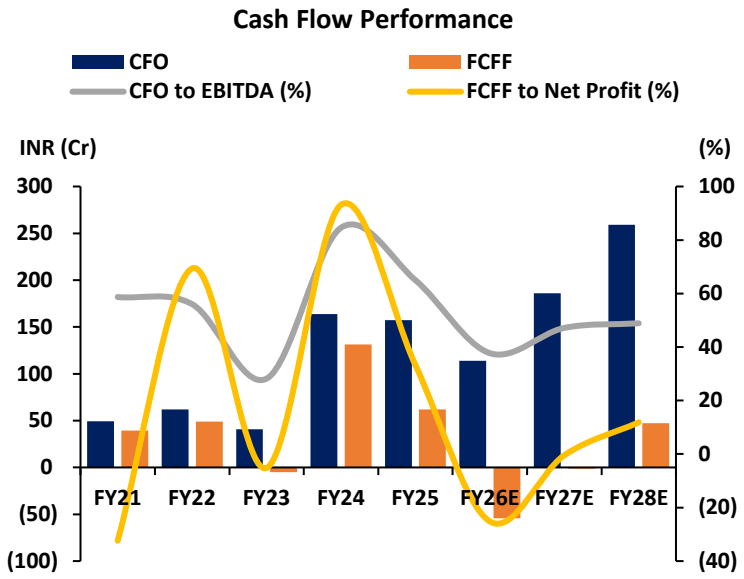
Going forward, payable and inventory days are expected to remain broadly stable at current levels, while receivable days are likely to stabilize around ~105 days with gradual improvement over time. As a result, net working capital to sales is expected to remain stable at ~17–18% over FY26E–FY28E, supported by disciplined working capital management.





Aurionpro has significantly reduced its leverage, with total debt declining from INR 114 cr in FY21 to INR 17 cr in FY25. Strong cash generation has enabled the company to move into a net cash position from FY24 onwards, with net cash of INR 344 cr in FY25, resulting in net debt-to-equity remaining negligible.

Going forward, the company is expected to remain net cash positive, supported by strong earnings growth and internal accruals. Consequently, net debt to EBITDA is expected to remain below 1x, indicating a strong balance sheet and sufficient financial flexibility to fund R&D investments in enterprise AI platforms and pursue strategic acquisitions to strengthen global capabilities and expand product platforms.



Operating cash flows have strengthened alongside earnings growth, with CFO increasing from INR 49 cr in FY21 to INR 157 cr in FY25, reflecting improved profitability and collections. Cash conversion has also remained healthy with CFO to EBITDA at ~65% in FY25, indicating strong operating cash generation from its platform-led business model.

Free cash flow has remained relatively volatile, with FCFF moving from INR 39 cr in FY21 to INR 62 cr in FY25, impacted by periodic investments in technology platforms and working capital. FCFF to net profit stood at ~33% in FY25, reflecting continued reinvestment in growth initiatives. Going forward, CFO is expected to increase to INR 259 cr by FY28E, while FCFF may remain volatile in the near term due to higher investments in R&D, enterprise AI capabilities, and strategic acquisitions, before improving as growth investments normalize.

Five step Dupont analysis for ASL

We have used five-step Dupont analysis to analyze ASL's financial strength.

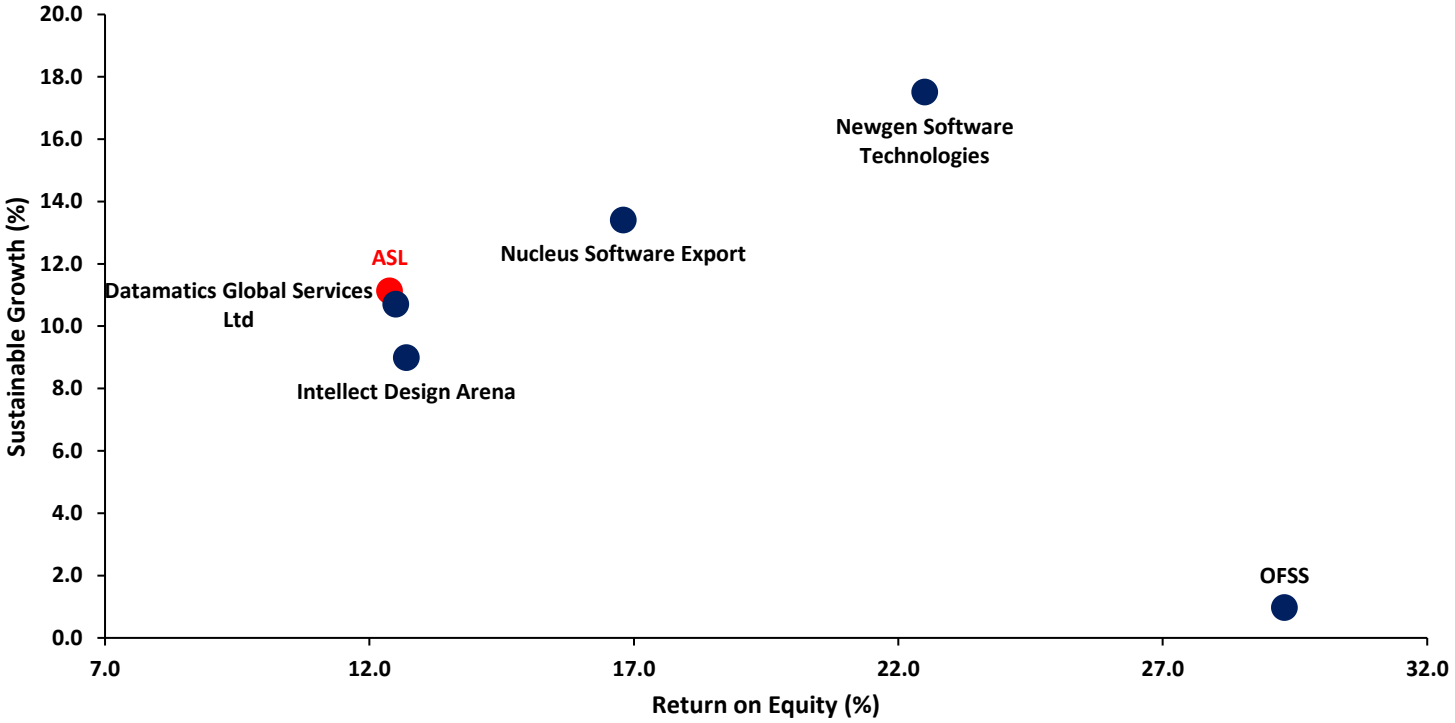
Five step Dupont Analysis for FY25 – Aurionpro vs peers

Companies	Tax Burden (X)	Interest Burden (X)	EBIT margin (%)	Total Asset Turnover (X)	Total Asset to Networth (X)	RoE (%)	Dividend Payout (%)	Sustainable growth (%)
ASL	0.8	1.0	18.0	0.6	1.3	12.4	10.1	11.1
Nucleus Software Export	0.7	1.0	26.4	0.7	1.4	16.8	20.2	13.4
Intellect Design Arena	0.8	1.0	18.1	0.7	1.4	12.7	29.2	9.0
Newgen Software Technologies	0.8	1.0	27.4	0.7	1.3	22.5	22.2	17.5
OFSS	0.7	1.0	48.3	0.7	1.2	29.3	96.7	1.0
Datamatics Global Services Ltd	0.8	1.0	15.1	0.8	1.5	12.5	14.4	10.7

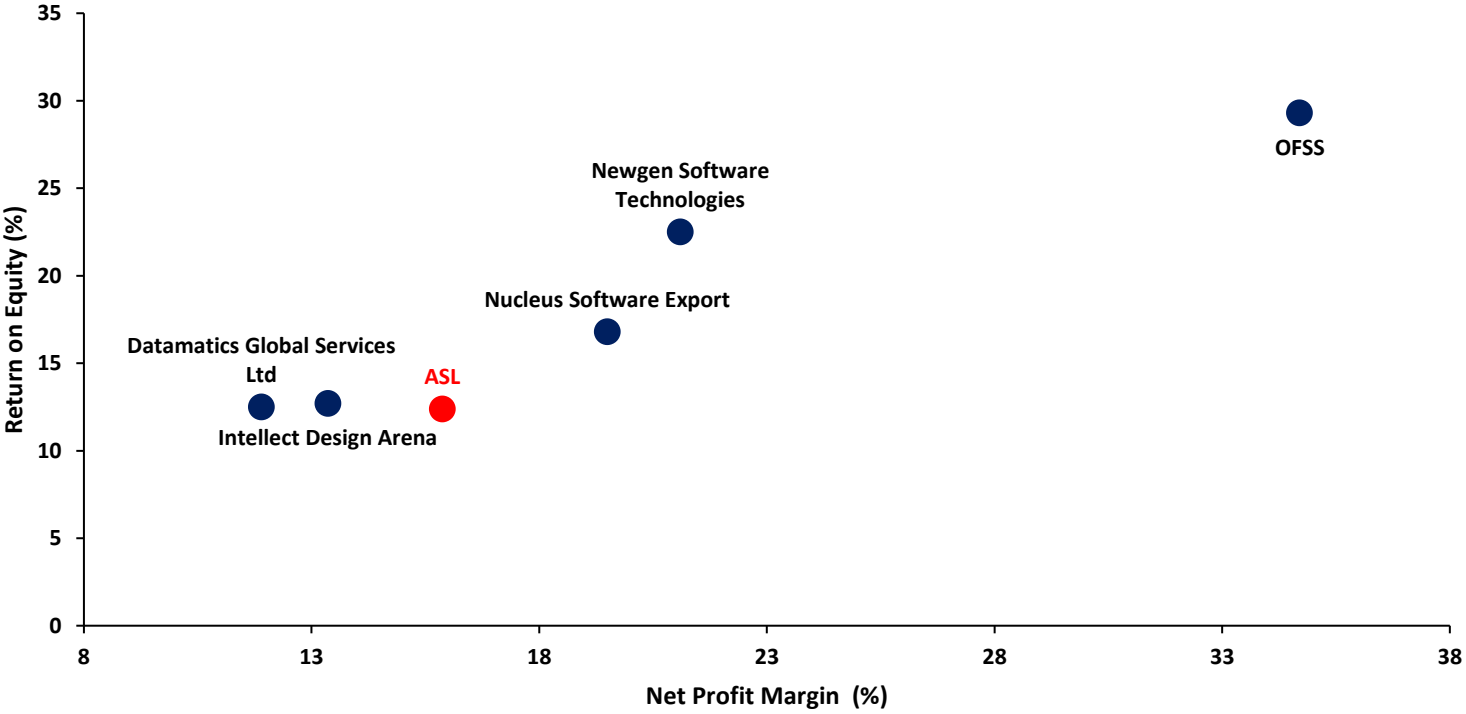
Aurionpro's DuPont analysis indicates that its RoE of 12.4% is largely supported by healthy operating margins and moderate capital efficiency, while maintaining a conservative balance sheet with negligible leverage. The company reported an EBIT margin of 18.0%, broadly comparable to peers such as Intellect Design Arena, though lower than high-margin software companies like Newgen, Nucleus and OFSS that operate with a more asset-light product mix. Aurionpro's asset turnover of 0.6x and asset to net worth of 1.3x reflect moderate capital utilization, influenced by its presence in project-led businesses such as transit mobility and enterprise infrastructure solutions.

The company maintains low financial leverage with an interest burden of ~1.0x, highlighting a prudent capital structure. Additionally, dividend payout remains relatively low at ~10.1%, enabling Aurionpro to retain earnings to support growth initiatives. This results in a sustainable growth rate of ~11.1%, reflecting the company's focus on reinvesting capital toward product development, enterprise AI capabilities, and strategic acquisitions to strengthen its IP-led platform ecosystem.

Comparative Positioning of ASL on Sustainable Growth and ROE



ASL's RoE and Net Margin Positioning Among Peers



Ventura Business Quality Score

Key Criteria	Score	Risk	Comments
Management & Leadership			
Management Quality	9	Low	Founder-led organization with over 25 years of legacy and a seasoned executive team comprising global banking, fintech, regulatory, and technology professionals.
Promoters Holding Pledge	8	Low	Promoters hold 26.88% as of Dec 2025, with no material pledge reported in FY25, reflecting aligned long-term vision and capital allocation discipline.
Board of Directors Profile	9	Low	Board comprises senior banking regulators, global CFOs, fintech leaders, and finance professionals, strong governance depth across banking, compliance, and capital markets.
Industry Consideration			
Industry Growth	9	Low	Operates across structurally growing segments – Transaction banking, Lending solutions, Transit, and Data centre.
Regulatory Environment or Risk	7	Medium	Exposed to evolving banking and data regulations, public-sector compliance norms, and rising cybersecurity risks.
Entry Barriers / Competition	7	Medium	Competes with global enterprise software and fintech players; differentiation supported by domain specialization and integrated offerings.
Business Prospects			
New Business / Client Potential	8	Low	Driven by global expansion and strategic focus on Enterprise AI (Arya.ai), TIG segment including transit and data centre solutions, along with continued scaling in banking and fintech.
Business Diversification	8	Low	Diversified revenue base across Banking, Lending, AI, Transit (hardware + software), Data Centres, and Payments; presence in 30+ countries.
Market Share Potential	8	Low	The company's emphasis on scalable business models, global partnerships, and targeted expansion in the US and European markets positions it for increased market penetration and a larger share in the industry.
Margin Expansion Potential	7	Medium	Limited room for margin expansion as the company remains focused on R&D investments and business expansion initiatives.
Earnings Growth	8	Low	Consistent multi-year revenue growth supported by strong execution and order visibility.
Valuation and Risk			
Balance Sheet Strength	9	Low	Strong liquidity with a current ratio of ~3x, minimal short-term borrowings, and receivable days expected to improve, indicating comfortable short-term financial stability.
Debt Profile	9	Low	ASL maintains a relatively low debt-to-equity ratio compared to industry peers, indicating a healthy financial position with less risk from debt burden.
FCF Generation	8	Low	We expect substantial FCF generation as profitability rises.
Dividend Policy	6	Medium	Pays a low dividend yield while prioritizing continued reinvestment into growth initiatives and strategic expansion.
Total Score	**120**	**Medium**	**The overall risk profile is moderate driven by strong fundamentals, diversified growth exposure, and financial stability, with moderate risks from regulatory factors and reinvestment-led margin constraints.**
Ventura Score (%)	**80**

Management Team

Key Person	Designation	Details
Mr. Paresh Zaveri	Chairman & Managing Director	He co-founded the company in 1997 and has been the strategic architect of its growth ever since. He brings 28+ years of experience in corporate finance, supply chain, general management, and strategic planning to his role with Aurionpro, and is also influential in advising a number of industry related organizations and enterprises.
Mr. Ashish Rai	Vice Chairman & Group CEO	He is a seasoned business leader with over 25 years of experience in building and leading fintech and enterprise software businesses globally. He has held leadership roles at global technology firms and brings deep expertise in banking, payments, and financial markets, driving Aurionpro's global expansion and product-led strategy.
Mr. Amit Sheth	Co-chairman & Director	He is one of the founding members of the company and has been instrumental in driving the Banking & Financial Services portfolio and geographic expansion. He brings 28+ years of experience in corporate finance, equities, and technology, with domain expertise in banking operations and cash management.
Dr. Rajeev Uberoi	Independent & Non-Executive Director	He has over three decades of experience in the banking and financial sector, having served in senior roles across domestic and multinational banks and regulatory institutions. His expertise spans banking supervision, risk management, compliance, and regulatory frameworks, supported by strong academic credentials in law and economics.
Mr. Ajay Kumar Choudhary	Independent Director	He is a distinguished central banker with over three decades of experience at the Reserve Bank of India, concluding his service as Executive Director. His expertise includes banking regulation, supervision, Basel III frameworks, and fintech-related regulatory initiatives.
Ms. Sudha Bhushan	Independent Director	She is a qualified Company Secretary, Chartered Accountant, and Insolvency Resolution Professional with over a decade of experience in audit, assurance, foreign exchange regulations, and international transaction advisory. She brings expertise in tax structuring, FDI advisory, and regulatory matters across complex corporate transactions.
Mr. Ajay Sarupria	Director	He has 23 years of experience in capital and private equity markets, focusing on backing professional management teams and supporting businesses through multiple funding rounds until listing or exit. He brings strong expertise in investment strategy and capital raising.
Mr. Shekhar Mullati	President & Global Head - Banking	He oversees sales, operations, and delivery across Asia Pacific, the Middle East, and Africa. He brings 28 years of experience across multinational banking and technology organizations, with expertise in corporate banking, financial services, and enterprise technology leadership.
Mr. Sanjay Bali	President & Global Head - TIG	He is part of the Executive Management team and brings over 29 years of experience across sales, services, and project management. He leads the Tech Innovation Group globally and oversees government and public sector business, focusing on infrastructure and turnkey solutions.
Mr. Sanjay Varma	President – Fintech	He brings over 31 years of experience in the Information Technology industry, specializing in fintech and banking solutions. His expertise spans sales, business transformation, professional services, and product management, driving growth and profitability in the Fintech Solutions Group.

Key Risks & Concerns

- Aurionpro operates in a highly competitive IT services market with established players and agile startups. Intense competition could lead to price pressure, margin erosion, and market share loss.

- Cybersecurity threats are increasingly common and can have a significant impact on companies in the IT industry. Aurionpro needs to invest in robust cybersecurity measures to protect its data and systems.

- Aurionpro has actively pursued acquisitions to expand its business like Fenixys and Arya.ai. Successful integration of these acquisitions is critical for the company to realize the expected benefits.

- Aurionpro's performance is heavily dependent on its experienced management team. Any significant changes or disruptions could impact on the company's direction and success.

- A significant share of transit, smart mobility, and public-sector banking projects are linked to government bodies. Budget reallocations, policy shifts, tender delays, or payment cycle elongation could strain working capital and impact cash flow stability.

- Significant R&D is being allocated to AI-native platforms. Enterprise AI adoption cycles can be long, and evolving global AI regulations (model explainability, compliance, data sovereignty) may increase compliance costs or delay commercialization.

- Expansion into Europe and the Middle East through acquisitions increases exposure to regional regulatory frameworks, currency volatility, and geopolitical uncertainties that may affect deal pipelines or profitability.

Auditor's qualifications

In the auditor's opinion, the consolidated financial statements of Aurionpro Solutions Limited and its subsidiaries for the year ended 31 March 2025 give a true and fair view in conformity with the Indian Accounting Standards (Ind AS) and other accounting principles generally accepted in India. The auditors have issued an unmodified opinion and have not reported any qualifications, reservations, or adverse remarks on the consolidated financial statements.

Ventura Commodities Limited, Ventura Guaranty Limited, Ventura Insurance Brokers Limited and Ventura Allied Services Private Limited are associates of VSL. Research Analyst (RA) involved in the preparation of this research report and VSL disclose that neither RA nor VSL nor its associates (i) have any financial interest in the company which is the subject matter of this research report (ii) holds ownership of one percent or more in the securities of subject company (iii) have any material conflict of interest at the time of publication of this research report (iv) have received any compensation from the subject company in the past twelve months (v) have managed or co-managed public offering of securities for the subject company in past twelve months (vi) have received any compensation for investment banking merchant banking or brokerage services from the subject company in the past twelve months (vii) have received any compensation for product or services from the subject company in the past twelve months (viii) have received any compensation or other benefits from the subject company or third party in connection with the research report. RA involved in the preparation of this research report discloses that he / she has not served as an officer, director or employee of the subject company. RA involved in the preparation of this research report and VSL discloses that they have not been engaged in the market making activity for the subject company. Our sales people, dealers, traders and other professionals may provide oral or written market commentary or trading strategies to our clients that reflect opinions that are contrary to the opinions expressed herein. We may have earlier issued or may issue in future reports on the companies covered herein with recommendations/ information inconsistent or different those made in this report. In reviewing this document, you should be aware that any or all of the foregoing, among other things, may give rise to or potential conflicts of interest. We may rely on information barriers, such as "Chinese Walls" to control the flow of information contained in one or more areas within us, or other areas, units, groups or affiliates of VSL. This report is for information purposes only and this document/material should not be construed as an offer to sell or the solicitation of an offer to buy, purchase or subscribe to any securities, and neither this document nor anything contained herein shall form the basis of or be relied upon in connection with any contract or commitment whatsoever. This document does not solicit any action based on the material contained herein. It is for the general information of the clients / prospective clients of VSL. VSL will not treat recipients as clients by virtue of their receiving this report. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of clients / prospective clients. Similarly, this document does not have regard to the specific investment objectives, financial situation/circumstances and the particular needs of any specific person who may receive this document. The securities discussed in this report may not be suitable for all investors. The appropriateness of a particular investment or strategy will depend on an investor's individual circumstances and objectives. Persons who may receive this document should consider and independently evaluate whether it is suitable for his/ her/their particular circumstances and, if necessary, seek professional/financial advice. And such person shall be responsible for conducting his/her/their own investigation and analysis of the information contained or referred to in this document and of evaluating the merits and risks involved in the securities forming the subject matter of this document. The projections and forecasts described in this report were based upon a number of estimates and assumptions and are inherently subject to significant uncertainties and contingencies. Projections and forecasts are necessarily speculative in nature, and it can be expected that one or more of the estimates on which the projections and forecasts were based will not materialize or will vary significantly from actual results, and such variances will likely increase over time. All projections and forecasts described in this report have been prepared solely by the authors of this report independently of the Company. These projections and forecasts were not prepared with a view toward compliance with published guidelines or generally accepted accounting principles. No independent accountants have expressed an opinion or any other form of assurance on these projections or forecasts. You should not regard the inclusion of the projections and forecasts described herein as a representation or warranty by VSL, its associates, the authors of this report or any other person that these projections or forecasts or their underlying assumptions will be achieved. For these reasons, you should only consider the projections and forecasts described in this report after carefully evaluating all of the information in this report, including the assumptions underlying such projections and forecasts. The price and value of the investments referred to in this document/material and the income from them may go down as well as up, and investors may realize losses on any investments. Past performance is not a guide for future performance. Future returns are not guaranteed and a loss of original capital may occur. Actual results may differ materially from those set forth in projections. Forward-looking statements are not predictions and may be subject to change without notice. We do not provide tax advice to our clients, and all investors are strongly advised to consult regarding any potential investment. VSL, the RA involved in the preparation of this research report and its associates accept no liabilities for any loss or damage of any kind arising out of the use of this report. This report/document has been prepared by VSL, based upon information available to the public and sources, believed to be reliable. No representation or warranty, express or implied is made that it is accurate or complete. VSL has reviewed the report and, in so far as it includes current or historical information, it is believed to be reliable, although its accuracy and completeness cannot be guaranteed. The opinions expressed in this document/material are subject to change without notice and have no obligation to tell you when opinions or information in this report change. This report or recommendations or information contained herein do/does not constitute or purport to constitute investment advice in publicly accessible media and should not be reproduced, transmitted or published by the recipient. The report is for the use and consumption of the recipient only. This publication may not be distributed to the public used by the public media without the express written consent of VSL. This report or any portion hereof may not be printed, sold or distributed without the written consent of VSL. This document does not constitute an offer or invitation to subscribe for or purchase or deal in any securities and neither this document nor anything contained herein shall form the basis of any contract or commitment whatsoever. This document is strictly confidential and is being furnished to you solely for your information, may not be distributed to the press or other media and may not be reproduced or redistributed to any other person. The opinions and projections expressed herein are entirely those of the author and are given as part of the normal research activity of VSL and are given as of this date and are subject to change without notice. Any opinion estimate or projection herein constitutes a view as of the date of this report and there can be no assurance that future results or events will be consistent with any such opinions, estimate or projection. This document has not been prepared by or in conjunction with or on behalf of or at the instigation of, or by arrangement with the company or any of its directors or any other person. Information in this document must not be relied upon as having been authorized or approved by the company or its directors or any other person. Any opinions and projections contained herein are entirely those of the authors. None of the company or its directors or any other person accepts any liability whatsoever for any loss arising from any use of this document or its contents or otherwise arising in connection therewith.
